Nova Scotia farm well water quality assurance study, phase I : final report

by the Nova Scotia Dept.'s of Environment, Agriculture and Marketing, and Health and Fitness. Fredericton : The Dept.'s, 1990. iii, 12 p. Bibliogr.
MICROLOG 91-00586 1 fiche

As part of ongoing environmental monitoring and research efforts, the Departments of Environment, Agriculture and Marketing, and Health and Fitness are conducting a cooperative study of rural well water supplies in Kings County. Initiated in 1988, this project is designed to assess the quality of drinking water supplies in the intensively farmed areas of the County. As one component of this study, 234 randomly selected wells were sampled in the summer and fall of 1989 to obtain an overview of water quality in the study area. Of these, 98 wells were tested for a range of pest control products, inorganic parameters and bacteria, and 136 wells were tested for inorganic parameters only. This report presents the results of the initial random survey and outlines proposed work for the remaining two years of the project.

**Novel improvements in production of
alcohols from surplus grains : final
report**

by W.M. Ingledew and K.C. Thomas. Regina : Saskatchewan Agriculture Development Fund, 1990. 50 p. : ill.
MICROLOG 91-05709 1 fiche

Final report of a project to apply the very high gravity fermentation technology developed in the laboratory to fuel alcohol production and in the process, to develop techniques usable in industry to convert Saskatchewan-grown grains to industrial alcohol in the most efficient and economical way possible. A comparison of wheats was made and very little difference was discovered among varieties, therefore Schmidt wheat was used throughout. The report describes the methodology used to increase ethanol concentration in batch fermenters from the usual 6-8 per cent v/v to as high as 20 per cent v/v and to increase the rate of alcohol production under the conditions required for high alcohol content.

**Numerical analysis of a flawed
pressure vessel**

by A.S. Oddy and J.M.J. McDill. Ottawa : Canada Centre for Mineral and Energy Technology, Metals Technology Laboratories, 1990. ii, 27 p. : ill. Bibliogr. (Report ; MTL 90-45(TR))
MICROLOG 91-03592 1 fiche

Analysis of 4 defects in a pressure vessel. The first stage in the assessment was a nonlinear, elastoplastic, finite deformation, finite element analysis of the defects thought to be most likely to cause failure. Three independent determinations of the severity of the conditions at the crack tip and therefore the risk of fracture were made. These were based on the J integral, using a virtual crack advance technique, the crack tip opening displacement, from the displacements calculated around the crack tip, and a continuum damage analysis.

Plastic collapse predictions were also made.
• CA CM PS SC

The Numerical modelling of shear bands in geological materials

by R.G. Wan. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. 183 p. : ill. Bibliogr. (Report ; MRL 90-108(TR))
MICROLOG 91-03584 3 fiche

Failure in geomaterials is often characterized by the localization of inelastic deformations in the form of shear bands for ductile materials (clays) or microcracks for brittle materials (rocks and concrete). This thesis blends theoretical analysis of rupture as a problem of bifurcation with numerical techniques such as the finite element method for its modelling. The kinematics of deformation-ensuing localization is described by modifying the variational statement or principle of virtual work to account for plastic dissipation along an internal discontinuity surface in the soil structure. The numerical method is tested with benchmark problems. In particular, the problem of the indentation of a semi-infinite body by a rigid flat punch is attempted considering the spreading of a kinematic discontinuity surface. The progression of the shear band as it pervades through the mesh is traced.

Nutritional evaluation of low-mucilage canola meal : technical/final report

Regina : Saskatchewan Agriculture and Food, Agriculture Development Fund, 1990. 17 p. ISSN 0829-9455
MICROLOG 91-01749 1 fiche

Canola seed contains mucilage, a starch-like compound which is poorly digested by monogastric animals. The development of a low-mucilage (low-M) strain of canola (derived from Candle) allowed the comparison of the effect of the canola meal (CM) from this strain with that of Candle, a regular cultivar, on the gains, feed efficiency and nutrient digestibility of growing pigs. The effect of the carbohydrate-digesting enzyme beta-glucanase was also tested to see if it would improve feed utilization and mucilage breakdown in the digestive system. Twelve barley-wheat (2:1) diets were formulated to contain 0%, 6% and 12% each of CM with and without the addition of the enzyme source. Seventy-two crossbred barrows, mainly the progeny of Landrace-Yorkshire crossbred sows and Lacombe boars, were randomly allotted to test diets and fed according to a controlled feeding schedule through the liveweight range of 23-57 kg. Pig weights and feed intakes were measured weekly.

The Nutritional value of awned and non-awned, wheat chaffs and their responses to ammoniation

by J.A. Kernan...et al. Regina : Saskatchewan Agriculture Development Fund, 1989. v, 20 p. : ill. Bibliogr. (SRC publication ; no. R-814-2-E-89) ISSN 0829-9455
MICROLOG 91-01758 1 fiche

Chaff from cereal crops may be a valuable ruminant feed nutritionally, but there are unresolved problems in the ammoniation process, particularly dealing with whether stacks require plastic covering and/or the consequences of not covering stacks. While the potential for the use of awned varieties of

cereals as a livestock feed has increased, the presence of the awns renders it unpalatable to animals. This study was undertaken to determine how ammoniation physically affected both the awned chaff and non-awned chaff; to compare intakes and digestibilities of both types of chaff, untreated and ammoniated, with and without a plastic cover, using wethers and steers; and to assess the nutritive values of the chaffs through a feeding trial with pregnant beef cows.

Oaths of allegiance and the Canadian House of Commons

by J.R. Robertson. Ottawa : Library of Parliament, Research Branch, 1990. 17 p. Bibliogr. (Background paper ; BP-241E) French ed. (*Les Serments d'allégeance et...*) on the same fiche. ISBN 0-660-13915-4
MICROLOG 91-04884 1 fiche

Questions have recently arisen with respect to the oath of allegiance that is required to be taken by all parliamentarians. Two basic issues are involved. First, is it necessary to take the oath, and what are the consequences of a failure or refusal to do so? Second, what are the consequences of an alleged violation or breach of the oath, and how is the validity of such an allegation established? This paper discusses the main issues surrounding the oath of allegiance. It reviews relevant precedents in Canada and Great Britain and some of the arguments that may be raised.

Observation and prediction of the 1986 breakup on the Athabasca River upstream of Fort McMurray, Alberta

by D.D. Andres. Edmonton : Alberta Research Council, 1988. vii, 88 p. : ill. Bibliogr. (Open file report ; no. 1988-08)
MICROLOG 91-02461 1 fiche

The City of Fort McMurray is located on the Athabasca River at the confluence of the Clearwater River. Ice jams often form downstream and cause serious flooding in the lower part of the city. Although the annual ice jams are well characterized and ice jam rating curves were developed to relate ice jam water levels to the discharge, very little is known about the breakup process itself. This report describes the 1986 breakup observations on the Athabasca River upstream of Fort McMurray and addresses a simple model which may be applicable in forecasting the onset of breakup. The report includes a brief literature review of breakup prediction, a summary of meteorological conditions (air temperature and solar radiation) prevailing in the Athabasca River basin during the 1986 spring melt period, and estimates of the depletion of the snowpack and resulting discharge increases in the river. The report also assesses the applicability of the model, carries out a calibration and conducts a sensitivity analysis to identify the most relevant model parameters.

Observations of breakup on the Athabasca River near Fort McMurray, 1986 and 1987

by C.D. Malcovish, D.D. Andres and P. Mostert. Edmonton : Alberta Research Council, 1988. vii, 51 p. : ill. Bibliogr. (Open file report ; no. 1989-10)
MICROLOG 91-02474 1 fiche

The City of Fort McMurray, situated at the confluence of the Athabasca and Clearwater Rivers in northeastern Alberta, is susceptible to occasional spring flooding. Since the most recent flooding in late April of 1979, considerable effort has been spent in both observing breakup processes along the Athabasca River and in documenting the hydraulic characteristics of the associated ice jams. This report summarizes the 1986 and 1987 breakup observations made between Mountain Rapids and the Suncor Oil Sands Development, approximately 14 km upstream and 27 km downstream of Fort McMurray, respectively. Data gathered during these two events have also been analyzed and compared with accepted theories in river ice hydraulics.

Observations préliminaires sur le régime alimentaire de la Bernache du Canada sur la côte est de la baie James, au printemps

par A. Reed, D. Goyette et G. Lameboy. Ottawa : Service canadien de la faune, 1990. 5 p. Bibliogr. (Cahiers de biologie ; no 191) L'éd. anglaise (Preliminary observations

on...) : 91-01186/1. ISSN 0703-0967 ISBN 0-662-96375-X
MICROLOG 91-02044 1 fiche

Cette étude permet de mieux connaître les besoins alimentaires des Bernaches du Canada sur la côte nord-est de la baie James, en vue d'aider les Cris à aménager des étangs pour ces oiseaux. On y présente un résumé des résultats des analyses des contenus stomacaux des bernaches examinées, et on présente les observations touchant les aires d'alimentation. A partir de cette information ainsi que d'une recherche documentaire, on brosse un tableau préliminaire du régime alimentaire printanier de la Bernache du Canada sur la côte est de la baie James. Finalement, on formule des recommandations quant à la poursuite des recherches.

Occupation and cancer in Ontario : review of the options for establishing a cancer-occupation data base for Ontario : summary report

by L.D. Marrett and E. Weir. Toronto : Industrial Disease Standards Panel, 1989. 70 p. ISBN 0-7729-7122-6
MICROLOG 91-01556 1 fiche

Ontario has no systematic means for generating hypotheses linking cancer incidence and employment, industry, occupation or workplace exposures. This review was commissioned to determine whether an occupational cancer database can be developed for the province by linking occupational data with appropriately matched records of the Ontario Cancer Registry. The review examined a number of sources for existing occupational data and different means for generating new data. Factors such as cost, data quality, feasibility, accessibility, scientific validity and statistical power were considered, and some rough estimates of time frames and staffing requirements provided. The review focused on linkage of existing occupational data collected prior to a diagnosis of cancer as reported to the Ontario Cancer Registry, and collection of new occupational data on cancer patients reported to the Registry. This report summarizes the methods, findings and recommendations.

Occurrence and significance of VA mycorrhizal symbiosis in Saskatchewan : final report

Regina : Saskatchewan Agriculture Development Fund, 1990. 62 p. : ill. Bibliogr. ISSN 0829-9455
MICROLOG 91-05743 1 fiche

Most agriculturally important crops coexist with fungal root endophytes forming beneficial symbiotic associations called vesicular-arbuscular mycorrhizae (VAM). Improved crop growth associated with VAM infection is often associated with increased nutrient uptake, producing an interest in the use of VAM as an inoculant to take the place of added fertilizers. This study surveyed the distribution of VAM genera across the major Saskatchewan soil zones and determined the infectivity of VAM in crops grown in each soil zone; studied factors which could affect mycorrhizae populations, including cropping sequence, soil management practices, and herbicide application, and identified management practices which would encourage effective symbiotic relationships between indigenous VAM and susceptible crops; and isolated, assessed and developed mycorrhizal inoculants for use in Saskatchewan.

Oceanographic data collected from the Sir John Franklin in the Beaufort Sea, September 1989

by R.W. Macdonald...et al. Sidney, B.C. : Dept. of Fisheries and Oceans, Institute of Ocean Sciences, 1990. v, 100 p. : ill. Bibliogr. (Canadian data report of hydrography and ocean sciences ; no. 80) ISSN 0711-6721 MICROLOG 91-00339 2 fiche

This report covers data collected from the CCGS Sir John Franklin during a cruise to the Canadian Beaufort Sea from August 21-September 5, 1989. The cruise was conducted to collect chemical and CTD data at a deep station in the Canada Basin, and to survey intensively the shelf break with the Mackenzie Canyon as a focus. The report includes conductivity, temperature and depth data, using a Guildline CTD system and water samples (hydrocasts at 6 shelf edge stations and one deep station) for salinity, temperature, dissolved oxygen, nutrients (reactive silicate, phosphate, nitrate plus nitrite), and chlorophyll. • CA CF NO NR PS SC

Off-farm sediment impacts in the Saskatchewan River Basin

M.A. Carson and Associates. Regina : Environment Canada. Water Resources Branch, Saskatchewan District, 1990. 148 p. ill., maps. Bibliogr. MICROLOG 91-04412 2 fiche

This study identifies the amount of sediment in the Saskatchewan River which comes from farmland and how much contaminant is bound up with this sediment; the percentage of the sediment from farmland and the percentage of sediment-bound contaminants in the stream network from farmland; the impacts of sediment and sediment-bound contaminants from all sources in the river system; the proportion of the impacts attributable to sediment and sediment-related contaminants from farmland; the importance of these impacts in the different areas affected, and the regional patterns. The study identifies parts of the Saskatchewan River network in the which sediment supply from farmland is high, then assesses what impacts, if any, have resulted from this excess farmland sediment; determines where problems have been identified as resulting from high sediment levels in the water system, then assesses how much, if any, of this sediment impact is due to farming. Oil pipeline performance review, 1987

Calgary, Alta. : Canadian Petroleum Association, Pipeline Division, 1988. 20 p. : ill. CSI 99512.004. MICROLOG 91-00972 1 fiche (Available on fiche only)

All liquid hydrocarbon pipelines in Canada, including crude oil, refined products and high vapour pressure (HVP) lines are requested to participate in this industry analysis by submitting voluntary, confidential performance and failure reports. Pipelines included in this review fall within the scope of CAN3-Z183-M86, oil pipeline transportation systems. However, only oil lines and HVP pipelines downstream of production facilities and refined petroleum product lines are covered. Multi phase lines, producer operated pipelines and flow lines are not covered. Incidents resulting in a spill of 1.5 cu m or more of oil, or any amount of HVP material, and any incident involving an injury, a death, a fire, or an explosion are classified as reportable. The report includes a general overview, a review of performance and failure, reviews of the current year with the previous year, and a 10-year average.

Oil spill information tailored to the shoreline environ of Pukaskwa National Park

by Anne Young ; for Jennie Sparkes. Ottawa : Environment Canada, Parks Service, Natural Resource Conservation, 1990. 52 p. : ill., maps. Bibliogr.
MICROLOG 91-05907 1 fiche

During the shipping season, which generally runs from the beginning of April to the end of December, Bunker C oil, gasoline, diesel fuel oil and light heating oil are regularly shipped into Thunder Bay past the park's coastline. This report provides park staff with a quick reference guide to aid in the response to oil spills off the shore of the park. The guide covers the physical properties of the four oils shipped; shoreline sensitivity; effects on small water organisms, birds, and fish; the use of containment booms; and the recovery of the spilled oil by skimmers or sorbents.

Oil spill response atlas for the southwest coast of Vancouver Island

by D. Dickins...et al. ; for Environmental Emergencies and Coastal Protection Branch, BC Environment ; produced by D.F. Dickins Associates Ltd. ; in association with Hammond Bay Environmental Services...et al. Vancouver, B.C. : D.F. Dickins Associated Ltd., 1990. iii, 192 p. : ill., maps. Bibliogr. ISBN 0-7726-1184-X
MICROLOG 91-01638 3 fiche

First in a series of atlases covering the B.C. coast. The atlas provides a synthesis of environmental information relevant to the planning and implementation of oil spill countermeasures along the southwest coast of Vancouver Island and is designed to link the environmental characteristics and resources of the region to practical considerations of oil spill response. This linkage is achieved through a ranking system which numerically describes the relative sensitivity of different coastal areas to the effects of a marine oil spill. The ranking system allows users to assign priorities to specific areas requiring protection and/or immediate cleanup. The study area covers the southwest coast of Vancouver Island from Christopher Point (Race Rocks) to Cape Beale, including the communities of Sooke, Port Renfrew, Jordan River and Anacis, the Pacific Rim National Park and the West Coast Trail. On the use of liftable axles by heavy trucks

by J.R. Billing. Toronto : Ministry of Transportation, Transportation Technology and Energy Branch, 1990. ii, 20 p. : ill. Bibliogr. Paper no. 910504 presented at the 70th Annual Meeting, Transportation Research Board.
MICROLOG 91-01507 1 fiche

Size and weight studies in the U.S. are addressing options to increase the allowable gross weight of heavy trucks. These options require more axles per truck and if the truck configuration and equipment are not tightly controlled by regulation, many of these axles would be liftable axles, now common on heavy haul trucks in central and Atlantic Canada. Allowing the use of liftable axles controlled by the driver may lead to axle weight compliance problems and damage to roads and bridges, although shippers and consumers benefit with a low-cost transportation system. The paper presents a preliminary exploration of the use of liftable axles in central and Atlantic Canada, summarizing the concerns of highway and truck engineers, and presenting findings from a recent study on the economic impact of hypothetical changes to regulations that would constrain the use of liftable axles.

Ontario. Industrial Disease Standards Panel : Annual report 1988

Toronto : The Panel, 1989. 30, 36 p.
Bilingual. CSI 56215.001. ISSN 0836-1487
MICROLOG 91-02690 1 fiche

This annual report of the Panel for the calendar year contains four main sections which feature material pertinent to ongoing issues and two articles in appendices. The opening section discusses the issue of disease clusters in the workplace, particularly with regards to cancers. Section B gives Workers' Compensation Board decisions on Panel reports of findings. Following sections deal with the Panel's current agenda of investigations (in tabular form) and financial statements for the 1987-88 fiscal year. This year the articles discuss, firstly, the evaluation of cancer clusters in the workplace and the difficulty in establishing the cause-effect pattern which is necessary to identify carcinogens, and secondly, the criteria for the evaluation of evidence of the carcinogenicity in humans of occupational exposures.

**Ontario aggregate and sectoral
macroeconomic impacts of proposed
revisions to Regulation 308**

Informetrica Limited. Toronto : Ministry of the

Environment, Policy and Planning Branch,
1990. v. 332 p. ISBN 0-7729-5959-5
MICROLOG 91-04186 4 fiche

This report assesses the effects on the Ontario economy of 4 scenarios that represent alternative proposals for revising Regulation 308. Effects are measured both for total activity and incomes, and for the output and employment of sectors in the province. Effects on the total Canadian, and other-province, economies are also reported. Alternative scenarios are differentiated by the magnitude of additional pollution-control and monitoring equipment that would have to be installed (scenarios A-C), and by implementation timing (5 years for A-C, and 20 for E). The study also presumes that private producers attempted to pass their additional current costs on in the form of price increases, while public-sector organizations and the Government of Ontario covered additional costs through increased taxes.

This report presents financial and physical information, submitted by farmers, by farm type and major enterprise. Farms were selected based on the size of the enterprise and the detail of information in their records. Each type of farm includes information on income, an investment summary, various measures of performance efficiency and profitability, debt servicing capacity, a whole farm summary, details on livestock per unit, and details on crops per tillable acre. General information is also given on 1989 crop and weather conditions and the methodology. The report covers dairy farms, beef feedlots, beef cow, swine-farrow, swine-farrow to finish, swine-finishing, cash crop, and sheep operations.

Ontario Waste Management Corporation : Annual report 1989-90

Toronto : The Corporation, 1990. 14, 14 p. : ill. Bilingual. CSI 56143.001. MICROLOG 91-03967 1 fiche

The Corporation was established in 1981 to design, construct and operate a province-wide system for the treatment and disposal of liquid industrial and hazardous wastes, and to develop a long-term program to assist in the reduction and recycling of such wastes. This report presents highlights of the year; a report on

environmental assessment review and facility design of its proposed waste management facility; a market assessment of the amount, type and sources of special wastes; the promotion of industrial waste reduction; and public consultation and communication in the Niagara Region. A financial statement is included. EV ON PR PW SC

Description of the natural gas bus program, presented in point form, including the objectives of the program, its history, a description of the vehicle and its fuel consumption, the garage, and the fuelling station. A life-cycle cost analysis is also included. EN ON PR SC TR

Open arms and alternative clinical trial designs : report

by Martin T. Schechter ; with response by the Canadian AIDS Society. Ottawa : Health and Welfare Canada, 1990. 47, 50 p. Bibliogr. Bilingual (*Essais à option libre et...*). ISBN 0-662-57741-8 MICROLOG 91-05036 2 fiche

This document reviews alternative designs in clinical trials of HIV therapies, particularly the concept of open arms, and discusses the relative advantages and disadvantages of such designs. Material is based on submissions and letters to the Expert Advisory Committee on HIV Therapies or to the Department of Health and Welfare, background papers distributed to the Committee, and extensive discussion. The document presents an overview of the various opinions expressed and offers a variety of opinions. CA CI HE

Open file report on selected mineral occurrences of Cape Breton Island

by G. Demont. Halifax : Dept. of Mines and Energy, 1991. 159 p. : maps. Bibliogr. (Open file report ; OFR 91-002) MICROLOG 91-02935 2 fiche

This report describes the preliminary findings of research into mineral occurrences on Cape Breton Island. Occurrences with the best mineral potential, or representative of certain geological environments were included. The description of the samples is given in a simplified format until further analyses and thin section work can be completed. AP NR PR PS SC

Operating characteristics and performance of the AERECO humidity-controlled ventilation system, phase II : monitoring and performance analysis

Scanada Consultants Limited. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. viii, 97 p. : ill. Bibliogr. CANMET contract: 03SQ.23216-6-6324/07. ISBN 0-662-18841-1 MICROLOG 91-04784 2 fiche

AERECO humidity-controlled ventilation systems rely on humidity levels generated by the occupants for determining the necessary ventilation rate. This project assessed and evaluated this system for its operating and performance characteristics, particularly for its ventilation effectiveness in typical Canadian houses. The field monitoring program was designed to gauge how well the ventilation system and the house respond to changes in indoor humidity. The system was installed in

two single storey detached houses near Ottawa, Ontario and was monitored from December 1989 to April 1990. Relative humidity, temperature, indoor/outdoor pressure difference, extractor flows, air inlet response, ambient conditions and energy consumption were continuously monitored using a computerized data acquisition system. Frequent field visits were made to ensure proper functioning of the system and the monitoring equipment.

Operating guidelines and procedures

Joint Secretariat. Environmental Impact Screening Committee. Inuvik, NWT : The Committee, 1987. 11 p.

MICROLOG 91-01694 1 fiche

The Western Arctic Claims Settlement Act requires the environmental screening of developments of consequence to the Inuvialuit Settlement Region that could have a significant negative environmental impact. It provides for the establishment of an Environmental Impact Screening Committee to carry out the screening of these developments. The provisions governing the activities of the Committee are established within the Inuvialuit Final agreement. This document contains procedures which will govern the activities of the Committee with regard to the screening of individual development proposals.

Operational stream rehabilitation trial at Clint Creek, Sewell Inlet

by H.D. Klassen. Victoria : Ministry of Forests,

1991. vi, 34 p. : ill. Bibliogr. (Land management report ; no. 68) ISSN 0702-9861 ISBN 0-7718-8935-6

MICROLOG 91-04298 1 fiche

This investigation of the suitability of stream rehabilitation in the Queen Charlotte Islands was initiated by stream degradation resulting from old logging practices and mass wasting. This trial incorporated techniques developed in previous studies and advanced them in work carried out cooperatively with Western Forest Products Ltd., Sewell Inlet operation. The trial undertook an operational field demonstration to rehabilitate a small stream using large organic debris emplacements; evaluated the initial performance of operational habitat restoration using this method; provided guidelines to facilitate industry cooperation in future operational stream rehabilitation projects and, where appropriate, recommendations for reducing costs and improving efficiency of operational procedures; and compared the fish habitat and durability of log emplacements in Clint Creek to those of previous stream rehabilitation projects.

Operational test of wave-forecasting models during the Canadian Atlantic Storms Program (CASP)

by B.M. Eid and V.J. Cardone. Ottawa : Environmental Studies Research Funds, 1987. viii, 256 p. : ill. Bibliogr. (Environmental Studies Research Funds report ; no. 076) ISBN 0-920783-75-9

MICROLOG 91-01124 3 fiche

Description of the work to set up and test a regional spectral ocean wave model for providing real-time wave forecasting during the Canadian Atlantic Storms Program (CASP), from January 15-March 15, 1986. The ocean data gathering program (ODGP) spectral ocean wave model, a fully directional spectral model which resolves the spectra into 24 directional bands and 15 frequencies, was used for the test. A modified version of the ODGP was developed to include shallow-water equations describing wave propagation in the CASP-OC area. A large number of field measurements (both wind and wave) were collected from a number of locations on the U.S. east coast, Georges Bank, Scotian Shelf and the Grand Banks of Newfoundland. These data sets were used for the evaluation of both wind and wave predictions. This study provided a comprehensive evaluation and statistical measures of the accuracy of the operational wave model when driven by two different wind fields. In addition, a 1-D shallow-water wave model was tested within the area.

The Opportunities and challenges of North American free trade : a Canadian perspective

by D. Husband...et al. Ottawa : Investment Canada, 1991. v, 85 p. : ill. (Working paper ; no. 7) French ed. (Les Débouchés et défis...) : 91-04438/2. CSI 22289.200.

MICROLOG 91-04259 1 fiche

This report presents detailed trade and investment data germane to a better understanding of the opportunities and challenges of a North American Free Trade

Agreement. It also provides insight into a number of key questions that are often raised about the yet-to-be-defined agreement. One of the most fundamental of these questions is whether a free trade agreement can at the same time be a 'fair' trade agreement when two of the proposed partner (the United States and Canada) are highly advanced countries, while the third partner (Mexico) is very much a developing country. The analysis begins, therefore, with a review of why free trade is in Canada's interests.

Optimal road user charges and income distribution in Kenya

by D.S.O. Nalo. Montreal : Université de Montréal, Centre de recherche sur les transports, 1991. vi, 45 p. Bibliogr. (Publication ; no. 779)
MICROLOG 91-05312 1 fiche

This paper presents a method of calculating optimal road user charges taking into account distributional considerations. The proposed method uses a second best pricing policy in calculating the optimal level of road user charges. This method is an improvement over previous work which uses average cost in calculating optimum level of road user charges. It leads to optimal road use charges in which users pay for the social cost of their road use and, at the same time, ensures an equitable income distribution.

Optimization of fly ash replacement in high volume fly ash concrete : final report

W.S. Langley and Associates Limited. S.I. : The Corporation, 1991. i, 30 p. : ill. CANMET contract: 99100-01-SQ.
MICROLOG 91-04680 1 fiche

This paper describes research performed to determine the optimum fly ash content in the high volume system. Optimum is defined as the fly ash content for a given water-cementitious ratio which produces the most economical concrete on the basis of cost per MPa. Three series of concrete mixtures were evaluated. Mixtures were performed at a water cementitious ratio of 0.25, 0.27 and 0.32 at fly ash replacement (based on total

cementitious) of 50, 55, 60 and 65 percent. The fly ash content varied from 45 to 60 percent for these tests. Materials included Portland cement; low calcium fly ash from the coal fired thermal generating plant in Lingar, NS; coarse aggregate from a Halifax quarry; fine aggregate (natural sand); superplasticizer; air-entraining mixtures; and concrete mixtures. Compressive strength specimens were cast for laboratory storage and testing at 3, 7, 28, and 91 days. Three specimens were tested at each age.

Optimizing switching evolution in a multi-service environment

by P. Soriano, M. Gendreau and F. Soumis. Montreal : Université de Montréal, Centre de recherche sur les transports, 1991. ii, 44 p. : ill. (Publication ; no. 793)
MICROLOG 91-06717 1 fiche

This paper addresses the problem of optimally planning the evolution of switching in a local telephone network, a problem which belongs to the family of multilocation capacity expansion problems and consists in determining the choice and time of placement of switching equipments (switches and remote concentrators) at various nodes of the network over a long-term planning horizon, while satisfying demands and minimizing costs. The paper presents a modelling approach which takes all of this into account without restricting the solutions to single-transition strategies and yields an integer linear program that remains tractable for real-sized networks. A combined brand-and-bound/column-generation algorithm is proposed to solve it, and it is then shown how this model can be integrated into a decision support system.

Options in applying insecticide to cattle on summer pasture : technical/final report

Regina : Saskatchewan Agriculture Development Fund, 1987. 16 p. : ill. ISSN 0829-9455
MICROLOG 91-01764 1 fiche

Black flies are the dominant pest species in northeastern Saskatchewan, where cattle producers have traditionally used smudges, sheds, insecticide ear tags, manually-applied insecticides and stand-alone backrubbers as protection methods. This report assesses the utility of a self-treatment insecticide station to apply permethrin and dichlorvos-crotoxyphos mixtures and an electrostatic sprayer for protecting cattle against biting flies and, in particular, black flies. Cooperating cattle producers in the 'black fly zone' were solicited through mass media, public meetings and personal contact. Seventy-four producers signed agreements, 63 installed a self-treatment station, and 46 completed evaluations.

In late 1985, the Public Advisory Committees (PACs) to the Environment Council of Alberta began working toward a draft conservation strategy. A Prospectus was published and the PACs are now concentrating on preparing sectoral discussion papers, of which this paper is one. The paper explains the current management of Alberta's forests; describes the growing pressures, especially from the expanding forest industry; examines the complex interaction of forest users, issues related to timber management, and other forest resources; and discusses progress toward the sustainable development of the forest and the barriers to this achievement.

Our future generation : electricity for tomorrow

Saskatchewan Power Corporation. Regina : The Corporation, 1990. 30 p. : ill.
MICROLOG 91-02017 1 fiche

This publication was developed to provide the public with information about the forecasts of SaskPower's requirements for electrical power, and to outline the wide range of options for matching the need for electricity with the resources available. The document discusses current electrical power demand, forecasted demand for the next 10 years, and the possible options for meeting a demand forecasted to be up to 4.4 percent per annum. These options include reducing demand, increasing supply, generating electricity without burning fuels, and importing electricity from neighbouring utilities or buying from other generators. Demand and supply side initiatives by SaskPower are also described.

Overfishing outside the 200 mile limit : Atlantic coast

by C. Emery. Ottawa : Library of Parliament, Research Branch, 1990. 14 p. Bibliogr. (Current issue review ; 90-6E) French ed. (*La Surpêche à l'extérieur...*) on the same fiche. ISBN 0-660-13926-X
MICROLOG 91-06067 1 fiche

When Canada extended jurisdiction over fisheries in 1977 and created a 200-mile exclusive fishing zone, certain areas of the continental shelf, over which important migrating fish stocks passed, remained outside federal control. Excessive fishing by foreign fleets in these areas undermines Canadian conservation measures and has contributed to the problems in the Atlantic fishery. This report gives background information to the problem and analyses the difficulties in Canada's relationship with the International Commission for the Northwest Atlantic Fisheries and the North Atlantic Fisheries Organization, and the measures taken to set quotas and prevent overfishing outside the 200-mile limit. A chronology is also given.

Overhead imaging for verification and peacekeeping : three studies

by A.V. Banner. Ottawa : Dept. of External Affairs, Arms Control and Disarmament Division, 1991. xii, 44 p. : ill. Bibliogr. (Arms control verification studies ; no. 6) French ed. (*Imagerie aérospatiale pour...*) : 91-03900/1. ISSN 0828-3664 ISBN 0-662-18200-6
MICROLOG 91-03899 1 fiche

This paper examines commercially available overhead remote sensing systems and their applications for international security. The paper describes the basic operating characteristics and features of commercially available systems, then uses two case studies to examine potential applications. In the first, imagery acquired during the Soviet withdrawal from Afghanistan in 1988 and 1989 is used to assess whether commercially available satellite imagery would be useful for monitoring large scale withdrawals of conventionally armed forces. In the second case study, imagery of selected sites in Namibia and Angola is used to examine whether such imagery could have supported United Nations peacekeeping operations in those countries. Potential applications of airborne remote sensing systems are also demonstrated using previously acquired imagery to show the kinds of results which could be obtained using commercially available systems.

Oxalate content in feeds and its metabolism by ponies : technical/final report

Regina : Saskatchewan Agriculture Development Fund, 1990. 27 p. Bibliogr. ISSN 0829-9455
MICROLOG 91-01887 1 fiche

Oxalic acid is an organic acid produced during normal plant growth, with oxalate accumulation depending on cation uptake and source of nitrogen used during growth. Chronic ingestion of moderate amounts of oxalate can lead to clinical bone disease in horses. Low oxalite concentrations have been reported in various Saskatchewan forages, suggesting that oxalate antagonism may have caused a reduction in calcium availability from cereal hays when fed to ponies. This study quantified oxalate concentrations in prairie forages and evaluated the metabolism of forage oxalate by ponies. Oxalate was determined in feed, feces and acidified, freeze-dried urine and was analyzed using a gas chromatograph. Calcium in feeds and feces was determined by atomic absorption spectroscopy after acid digestion of samples. Two hundred feed samples were analyzed for concentrations of oxalate. Pony geldings were used to evaluate the digestibility of chopped alfalfa, brome, oat and slough hay.

Parasitic fauna of blue halibut *Reinhardtius hippoglossoides* (Walbaum, 1792) from selected regions of species occurrence

by J. Wierzbicka. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1991. 115 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences : no. 5520) Originally published in Polish, in Poland. ISSN 0704-3716
MICROLOG 91-04127 2 fiche

This paper makes a detailed study of the parasitic fauna of blue halibut from the North Atlantic Labrador region to the Barents Sea, and includes all systematic groups of parasites. The study compares the parasitic fauna from these two ecologically different environments.

The paper also evaluated the degree of infection and, in particular, determined the occurrence of parasites which are pathogenic for humans and localized them in the fish. Fish from the Labrador area were caught on June 26, 1976 (155) and those from the Barents Sea on May 6, 1977 (106). Examined fish were classified by age, weight and length. Studies of a small number of fish from the North Pacific were also carried out in 1981 in a fishing area in the north Bering Sea. All fish underwent detailed parasitic examination.

This study consists of a state-of-the-art review of current Canadian policies and programs as they relate to parking for disabled persons. The study includes a review of available literature and a comprehensive survey of existing parking policies and programs in Canada at the federal, provincial and municipal

levels. It provides an overview of various parking-related issues and concerns of mobility impaired persons. Conclusions of the study includes such aspects as vehicle registration, inter-jurisdictional recognition of permits, on-street parking supply, off-street parking supply, parking space design standards and enforcement. Recommendations are made concerning appropriate mechanisms to ensure adequate parking supply and consistency, conformity and reciprocity in Canadian parking policies.

Party discipline in the Canadian Parliament and provincial legislatures

by L. Mensch. Edmonton : Legislative Assembly, 1991. 23 p. Bibliogr.
MICROLOG 91-06262 1 fiche

There has been a great deal said in the media recently about the increasing cynicism of the Canadian electorate. Many people feel they are too far removed from the political process and that their elected legislators do not take into account the wishes of the public when they form policy and pass laws. A major concern voiced is that, once elected, politicians no longer represent their constituents but rather the party itself. Perhaps in part because of the apparent cynicism of Canadians, some academics and political parties have proposed rather dramatic reforms to the legislative process. They suggest a loosening of party discipline, more free votes in the House and direct involvement of the electorate in creating policy and laws. This report examines the nature of party discipline, its history in Canadian politics and the ways in which our legislative process would be altered if such a reform were introduced in the Legislature.

Pas de refuge dans le besoin : les services de résidence et de soutien à domicile pour personnes handicapées

par S.T. Torjam. North York, Ont. : Institut G. Allan Roeher, 1991. vi, 175 p. : ill. Bibliogr. L'éd. anglaise (Poor place : disability-related...) : 91-00285/2. CSI 99190.200. ISBN 0-920121-53-5
MICROLOG 91-07186 2 fiche (Available on fiche only)

La pauvreté fait partie de la réalité quotidienne dans la vie des personnes handicapées au Canada. Afin de comprendre les raisons sous-jacentes de cette pauvreté, l'Institut G. Allan Roeher a entrepris l'étude d'un certain nombre de politiques. Il a examiné les racines du problème et propose des solutions de remplacement pour s'attaquer aux problèmes du système. Cette étude examine les sources de financement pour ces services et les conséquences de cette structure financière. Elle comporte également une analyse de la loi actuelle et du système de financement ainsi que des mécanismes de prestation de services. Enfin, on présente des solutions de remplacement dont certaines sont conformes aux ententes de financement qui existent déjà, tandis que d'autres exigent la mise en place de nouveaux mécanismes.

Passive solar potential in Canada, 1990-2010

Scanada Consultants Limited. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. xxiii, 97 p. : ill. Bibliogr. CANMET contract: 69SZ.23216-8-9043. ISBN 0-662-17939-0
MICROLOG 91-01233 2 fiche

Project to provide data on the energy conservation potential to be achieved through the use of passive solar design features and components in residential and commercial buildings. The study focuses on passive solar technologies to enhance the energy performance of buildings regardless of shape, layout, orientation, or lot size. The study estimated the passive solar energy contribution in the building stock 'as is', in absolute terms and as a fraction of energy requirements; assessed the overall potential of existing and emerging technologies to increase the contribution, considering both technically possible and market-likely scenarios; and assessed, through case studies, the specific potential of high thermal performance windows, daylighting and solar storage or utilization mechanisms for net benefits in heating, lighting and cooling.

Passive solar potential in commercial buildings : four case studies

Enermodal Engineering Ltd. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. 46 p. : ill. CANMET contract: 23283-8-6064-01-SZ. ISBN 0-662-18320-7
MICROLOG 91-02423 1 fiche

The use of 'super-windows' and daylighting strategies can have significant impact on building dynamics and energy costs in commercial and apartment buildings. This report presents 4 case studies describing how passive solar design principles can be used to reduce commercial building energy consumption and capital cost. The project was originally intended to perform detailed examinations of 3 buildings that successfully combined all aspects of passive solar design, but there were very

few candidates which used all aspects. Therefore it was decided to present 4 case studies with less in-depth analysis of each. Two of the studies would describe actual buildings and two would describe how a single passive feature had been applied in numerous buildings. The individual case studies included an apartment building and an office building, both in Toronto, Ontario.

Patterns and trends in the domestic fishery in and near the Mackenzie River watershed : a synthesis of a survey of fish users in Dene and Métis communities

Rawson Academy of Aquatic Science. Ottawa : Indian and Northern Affairs Canada, Northern Affairs Program, 1990. xiii, 81 p. : ill. Bibliogr. (Environmental studies ; no. 66) ISBN 0-662-18104-2
MICROLOG 91-00069 2 fiche

During construction of the Norman Wells pipeline (1982-85), concern was raised by domestic fishermen about the quality of fish, some of which had external lesions and internal abnormalities, caught in the Mackenzie River, NWT. As one of a number of federal studies to investigate the causes and impacts of fish abnormalities, this study was initiated to assess the state of domestic fisheries and examine the potential socio-economic impacts of the fish abnormalities. Interviews were conducted with 202 actively fishing households from 11 communities in and near the Mackenzie River Valley between August and December 1988, and were based on a 148-question questionnaire. The data, based on participant recall of the fishery over the previous 8 years, were examined for general patterns and trends rather than definitive quantitative descriptions.

Peary caribou calving and postcalving periods, Bathurst Island complex, Northwest Territories, 1989

by F.L. Miller. Edmonton : Canadian Wildlife Service, Western and Northern Region, 1991. viii, 72 p. : maps. Bibliogr. (Technical report series ; no. 118) ISSN 0831-6481 ISBN 0-662-18566-8 MICROLOG 91-03742 1 fiche

Peary caribou are classified as an endangered distinct geographical population, although there is pressure from the Inuit community of Resolute Bay for hunting activity. The complex of islands centred on Bathurst Island was selected as the current Peary caribou study area to pursue investigations of springtime intra- and inter-island migrations or environmentally forced movements of Peary caribou. This report covers activities in the preliminary year (1989-90) of the project. Peary caribou were aerially surveyed on south-central Queen Elizabeth Islands in June and July 1989 to obtain data on relative numbers, distributions, and movements, and for the chronology of calving period, initial calving success, and early mortality of calves. The islands of Vanier, Cameron, Alexander, Massey, and Marc were systematically surveyed by air.

Peatland hydrology, Bog 569 : Pigeon Hill, New Brunswick

GEMTEC Limited. Fredericton : Dept. of Natural Resources and Energy, Minerals Resources, 1991. xvi, 91 p. : ill., maps. Bibliogr. (Open file report ; 91-10) ISSN 1183-5508 MICROLOG 91-05213 2 fiche

The draining of peatlands for peat production can result in degraded runoff water quality characterized by increased suspended solids, increased dissolved organic carbon and reduced pH. Without mitigation, these problems can have major environmental implications on downstream aquatic ecosystems. This study was conducted to address some of the issues involved in peatland development. The medium sized peat bog selected for the study is located on the island of Lamèque in northeastern NB. A 50 ha portion of it is currently operated for horticultural purposes. The hydrological characteristics of the bog were evaluated by examining the relationship between precipitation,

groundwater levels, and surface water flow rates and quality over a 3-month period during the fall of 1990. A simple model was developed to describe this relationship.

La Pêche au filet dérivant : une perspective légale -- Rév.

par S. Maciunas et C. Morris. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 19 p. Bibliogr. (Bulletin d'actualité ; 90-2F) L'éd. anglaise (*Driftnet fishing : a legal...*) sur la même fiche. Révisé le 10 septembre 1990. ISBN 0-660-93256-3 MICROLOG 91-06068 1 fiche

Bon nombre de personnes s'interrogent sur les conséquences que la pêche massive du saumon en haute mer a pour l'environnement. Les gouvernements, à l'instar des environnementalistes, s'opposent au gaspillage inhérent aux méthodes de pêche au filet dérivant, qui entraînent la destruction d'une grande quantité de poissons et de mammifères marins qu'on ne désire pas pêcher, ainsi que d'oiseaux de mer. Bien que la pêche au filet dérivant soit pratiquée dans divers océans, ce document s'attache surtout à cerner les problèmes qu'elle pose dans le Pacifique Nord et à les étudier dans une perspective légale. Il examine finalement les ensembles de règlements et de dispositions législatives régissant cette pratique.

Ce document donne une vue d'ensemble de la structure et du rendement des pêches

commerciales au Canada, et indique la place qu'occupe l'industrie canadienne dans le monde pour le commerce des produits de la pêche et la production du poisson par rapport aux autres principaux pays pêcheurs. On y décrit la position du Canada sur le plan international, la demande des produits de poisson au Canada et aux États-Unis, l'importance de l'industrie de la pêche par rapport à d'autres secteurs de l'économie canadienne et la participation du Canada et d'autres pays aux pêches du nord-ouest de l'Atlantique et du nord-est du Pacifique. Finalement, on se penche sur la structure des débarquements et des revenus bruts des pêcheurs, de la production et des recettes brutes tirées des produits de la pêche canadienne, de l'emploi des pêcheurs et des travailleurs d'usine, et le nombre de bateaux que représente la flotte de pêche canadienne, ainsi que des importations et des exportations des produits de la pêche par les principaux pays.

People, parks and preservation : sustaining opportunities

by G.S. Swinnerton. Edmonton : Environment Council of Alberta, 1991. 89 p. : ill. Bibliogr.
MICROLOG 91-04622 2 fiche

This document begins by defining terms used throughout the paper. It reviews the status and history of the outdoor recreation reserves in Alberta, and the benefits derived from them, and evaluates the future demand and the adequacy of the outdoor resource base. It also provides an inquiry into the relationship between competitors for the resource base. The author discusses how recreation resources might be managed to affect sustainable development. The report concludes with a description of the legislative and regulatory

framework within which outdoor recreation is practised.

Peregrine Falcon reintroduction : 1990 nest site report

by D. Simkins and J. Rossiter. Ottawa : Parks Canada, Fundy National Park, Resource Conservation, 1990. 9 p. Bibliogr.
MICROLOG 91-01942 1 fiche

In 1989, a pair of peregrine falcons were successful in establishing a nest 2 km east of Alma village near Owl's Head in Fundy National Park. In 1990, observations of the nest site began on April 3d to determine the date of arrival of the returning falcons. Observations were carried out by park staff and were almost daily until the chicks hatched, then once or twice a week, always in open view and for 1 1.5-2 hours. Observers recorded incubation, feeding, food exchanges and adult behaviour. This report describes the observation program and results, as well as other nest sites in the area.

Periphyton communities as biological polishing agents in mine waste waters and the precipitation process in tailings : final report

by M. Kalin, W.N. Wheeler and R.O. Van Everdingen. Toronto : Boojum Research Limited, 1991. vi, 159 p. : ill. Bibliogr.
CANMET contract: 09182-01-SQ.
MICROLOG 91-04696 2 fiche

Implementation of ecological engineering as a decommissioning technology for acid-generating, base metal mining wastes was conducted on a site in northern Ontario 65 km northeast of Ear Falls where a zinc-copper concentrator was operated from 1971-81. Since 1986 the site has been investigated intensively to determine the measures required to implement ecological engineering technology. Rates of sulphide oxidation and iron precipitation were estimated through analysis of water collected from piezometers since 1986, water level monitoring, evaluation of climatological records, and measurement of hydrological and physical characteristics of the tailings mass. Sulphide oxidation and iron precipitation rates are related to the annual recharge at the tailings site. Biological polishing, using two algal groups, was used to control zinc concentration in those water bodies affected by the tailings.

Permafrost and terrain research and monitoring : Norman Wells Pipeline, vol. II : research and monitoring results, 1983-88

by K.L. MacInnes. Ottawa : Indian and Northern Affairs Canada, Northern Affairs Program, 1990. xxxiii, 204 p. : ill. Bibliogr. (Environmental studies ; no. 64) ISBN 0-662-17881-5
MICROLOG 91-01651 3 fiche

The Norman Wells pipeline, owned and operated by Interprovincial Pipe Line (NW) Ltd.,

is the first completely buried oil pipeline in the discontinuous permafrost zone of northern Canada. This report on the permafrost and terrain research and monitoring program is given in two volumes, the first of which reviews environmental and engineering considerations and aspects of pipeline construction and operation. Volume 2 presents results from 1983-88, along with conclusions and recommendations. The report covers methods, procedures and data bases; climate during monitoring; selected parameters needed to evaluate the thermal behaviour of the pipeline; pipe and ground temperatures, thaw depths, thaw settlement; overall terrain conditions during construction and operations, and the thermal performance of wood chip insulation. Observations and results are compared to the expected or predicted responses outlined during the pipeline project's conceptual and final design and assessment phases.

Perspective canadienne sur la pollution atmosphérique

par J. Hilborn et M. Still. Ottawa : Environnement Canada, État de l'environnement, 1990. 86 p. : ill., cartes géogr. Bibliogr. (Rapport sur l'état de l'environnement ; Rapport EDE no 90-1) L'éd. anglaise (Canadian perspectives on air pollution) : 91-06645/1. ISSN 1180-3177 ISBN 0-662-96086-6 MICROLOG 91-06646 1 fiche

Ce rapport sur l'état de l'environnement présente les causes de certains problèmes de pollution de l'air aux échelons local et global et leurs effets tant sur la santé que sur le milieu. Il décrit ensuite de façon détaillée les sources, les émissions, les concentrations et les effets sur l'environnement et la santé de six polluants atmosphériques courants : les particules en suspension dans l'air, l'anhydride sulfureux, le monoxyde de carbone, les oxydes d'azote, l'ozone de la basse troposphère et les hydrocarbures. Les caractéristiques de polluants atmosphériques toxiques sont plus difficiles à décrire, et ce sont plutôt les différentes façons d'étudier ces polluants qui sont illustrées dans ce rapport, par élément chimique, comme dans le cas du plomb; par catégorie de substances chimiques, dont les hydrocarbures aromatiques polycycliques; d'après le mode de pollution, par exemple, la combustion du bois de chauffage résidentiel; et, par secteur géographique, par exemple, Junction Triangle à Toronto, une petite zone industrielle qui possède des sources de pollution locales.

voir Recherche sur les pesticides et rapport annuel de surveillance, 1988-89

Pesticides in Ontario municipal drinking water from surface sources, 1987

by J.E. Patrick. Toronto : Environment Ontario, 1990. iv, 41 p. ISBN 0-7729-6940-X
MICROLOG 91-00765 1 fiche

A monitoring program specifically for the detection of pesticides in surface waters was not conducted by the Ministry of the Environment (MOE) in 1987. However, samples of raw and treated water, collected from a limited number of municipal surface waterworks, were analyzed for pesticides as part of the MOE drinking water surveillance program and the Ontario Ministry of Agriculture and Food pesticide monitoring program. This report covers pesticide results from the two programs for 1987. Thirteen pesticides were monitored at 6 water treatment plants situated in agricultural areas where pesticides are used extensively. The locations were limited to those sites where positive results were found in 1985 and 1986.

Petro Canada : report

Canada. Parliament. Senate. Standing Committee on Energy and Natural Resources. Ottawa : The Senate, 1990. 133, 147 p. : ill. Bibliogr. Bilingual (Petro-Canada : rapport). MICROLOG 91-00499 4 fiche

The policy initiatives resulting in the 1975 creation and development of Petro-Canada were, and remain, controversial. The 1984 directive that Petro-Canada conduct its affairs as a private sector company was followed by the February 1990 budget announcement of its pending privatization. In the spring of 1989, the Committee decided that more attention

should be paid to Petro-Canada's role as a state oil company in the broader context of Canadian policy development. This report gauges Petro-Canada's past accomplishments in both its business and public policy roles, and presents the Committee's views regarding appropriate choices for its future. Subjects considered include the high per capita use of energy; the international price of oil; the increasing dependence of the U.S. on imported, and in particular, OPEC oil; the commitments made in the Free Trade Agreement; the opportunity to preserve a preferred position in energy supply; and the growing recognition of the impact that energy development is having on the environment.

Petro-Canada : rapport

Canada. Parlement. Sénat. Comité sénatorial permanent de l'énergie et des ressources naturelles. Ottawa : le Sénat, 1990. 147, 133 p. : ill. Bibliogr. Bilingue (Petro-Canada : report). MICROLOG 91-00499 4 fiche

Ce rapport tente de faire le point sur les réalisations passées de Petro-Canada tant du point de vue commercial que gouvernemental, et expose la position du comité sur les choix à faire dans l'avenir. Les questions qui ont été examinées dans le cadre de cette étude sont : la forte utilisation d'énergie par habitant au Canada en raison du climat, de la géographie, de l'industrialisation et du mode de vie; la dépendance accrue des Etats-Unis à l'égard du pétrole importé et du pétrole en provenance des pays de l'OPEP, et la possibilité que la vulnérabilité des Etats-Unis au chapitre des approvisionnements de pétrole puisse, dans un marché continental dominé par eux, avoir des répercussions pour le Canada; les engagements pris par le Canada dans l'Accord de libre-échange; la possibilité pour les Canadiens de conserver une position privilégiée au chapitre des approvisionnements énergétiques en situation de libre concurrence, par l'adoption d'une politique à cette fin; et, la conscience grandissante des conséquences du développement énergétique sur l'environnement.

Le Pétrole et le gaz naturel dans l'ouest canadien

Ottawa : Energie, mines et ressources Canada, 1989. 32 p. : ill. ISBN 0-662-95022-4
MICROLOG 91-05102 1 fiche

Depuis de nombreuses années, le Canada semble jouir d'un approvisionnement sans fin de pétrole et de gaz naturel classiques. Cette production provient presque entièrement de l'Ouest canadien. Cependant, devant l'épuisement des réserves canadiennes de pétrole classique, l'industrie du pétrole et du gaz naturel met tout en oeuvre afin de trouver des méthodes efficaces de production et de traitement des nouveaux pétroles. Ce document examine la complexité de l'industrie du pétrole et du gaz naturel dans l'Ouest canadien.

Petrology, tectonic setting, and economic potential of Devonian peraluminous granitoid plutons in the Canso and Forest Hill area, eastern Meguma Terrane, Nova Scotia

by J.D. Hill. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1991. ii, 96 p. : ill., map. Bibliogr. (Bulletin : 383) Fold. map not filmed. ISBN 0-660-13837-9
MICROLOG 91-04537 2 fiche

Petrological studies of igneous rocks are carried out to gain a better understanding of the geological evolution and economic potential of particular regions. The Meguma Terrane in mainland NS consists primarily of peraluminous granitoid plutons which intrude Cambro-Ordovician metasedimentary rocks of the Meguma Group. Interest in granitoid plutons has been stimulated in recent years by the discovery of granite-hosted mineralization such as the East Kempville tin deposit. Two segments of the eastern Meguma Terrane, the Canso and Forest Hill regions, were selected for an integrated program involving mapping, structural analysis, petrography, geochemistry and isotopic investigation. This report presents the results of the program.

Pharmacokinetic studies of cefazolin in horses and cattle

Regina : Saskatchewan Agriculture and Food, Agriculture Development Fund, 1989. 59 p. : ill. Bibliogr. ISSN 0829-9455
MICROLOG 91-05733 1 fiche

Cephalosporin antibiotics are a valuable group of antibiotics in veterinary medicine for dogs and cats because they have greater activity against many bacteria than traditional antibiotics and are associated with fewer side effects. The use of cephalosporins in large animal medicine has been limited, however, because they are eliminated from the body very quickly, usually in less than one hour. This report presents the results of a study to examine the feasibility of synthesizing an insoluble, sustained-release form of cephalosporin, cefazolin, and injecting it intravenously and intramuscularly into horses and cattle. An assay was developed using high pressure liquid chromatography and plasma concentrations measured following each injection.

Photovoltaic systems and wind turbines : lightning protection review

D&K Savva Enterprises Ltd. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1989. iv, 25 p. : ill. Bibliogr. CANMET contract: 069SZ.23216-8-9051. ISBN 0-662-17237-X

MICROLOG 91-01225 1 fiche

The chances of lightning damage to wind turbines is increasing as these machines become larger and more numerous on individual sites. In contrast to the wind turbines, large photovoltaic (PV) power plants ranging from 100 kW to multimegawatts are still a few meters high, although there are a few tall PV plants which are secured on pedestals, with heights ranging from 5-20 meters. This study reviewed current knowledge on lightning and lightning protection methods on wind turbine and PV power plants; reviewed published data on lightning stroke damages to wind turbine and PV power plants; and provided a critical assessment and recommendations.

Physical and hydrological characteristics of ponds in reclaimed upland landscape settings and their impact on agricultural capability

by S.R. Moran...et al. Edmonton : Alberta Land Conservation and Reclamation Council, Reclamation Research Technical Advisory Committee, 1990. xii, 76 p. : ill., maps. Bibliogr. (Report ; RRTAC 90-4)

MICROLOG 91-05328 1 fiche

In 1985, a one hectare pond developed in the upland reclaimed landscape at Vesta Mine in an area where extensive ponding had not previously been observed. Because of the thickness of the spoil (20-25 m) and the proximity to the active pit (a few hundred metres), it was inferred that the pond was perched above the water table. This pond was instrumented in September 1987 to monitor the subsurface water and salinity regime. Observations continued throughout 1988 and 1989 and provide the basis of this report.

The report describes the methodology of the study, the results and the characteristics of hydrologic upland settings, and discusses the impact of such perched ponds on agricultural capability.

Phytotoxicology assessment survey investigation in the vicinity of American-Standard, Cambridge, 1989

Ontario. Air Resources Branch. Toronto : The Branch, 1991. 25 p. : maps. ISBN 0-7729-8219-8
MICROLOG 91-05925 1 fiche

As a result of a vegetation complaint investigation conducted in 1988, it was suspected that the American-Standard plant was a source of boron and fluoride emissions. Foliage and soil was analyzed and showed elevated levels of boron. A visual survey was also conducted, showing the same damage. On August 31 and September 6, 1989 a survey was conducted at 18 sites in the vicinity of the plant to assess the character, magnitude and extent of pollution effects on vegetation and soils. At each site, vegetation was examined for air pollution injury symptoms and observations were recorded. Injury severity ratings and percentage of injured leaves on plants were the main parameters assessed. Following this, Norway maple or silver maple foliage was collected for chemical analysis. A visual analysis was also conducted. This report presents the results of the analyses.

Phytotoxicology assessment survey investigation in the vicinity of Libbey-St. Clair, Wallaceburg, 1989 : report

by G.N. Vasiloff. Toronto : Environment Ontario, Phytotoxicology Section, 1991. 9 p. ISBN 0-7729-7868-9
MICROLOG 91-03280 1 fiche

Annual vegetation assessment surveys have been conducted annually in the vicinity of the Forhan Street South industrial park in Wallaceburg since 1976, with the exception of 1988. In the course of the surveys, vegetation was examined for evidence of air pollutant injury and sampled for fluoride, boron and various heavy metals emitted by several different industrial sources. While problems associated with excessive fluoride and chromium levels have been solved through abatement measures, there is still a problem with boron emissions from the Libbey-St. Clair Glassworks plant. In August 1989, 12 sites were investigated in the vicinity of the Glassworks. At each site, foliage of survey trees was examined for evidence of visible boron-induced injury and foliar samples were collected. This report provides the results of that analysis.

Phytotoxicology assessment survey investigation in the vicinity of the Glenridge landfill site, St. Catharines 1989 : report

by G.N. Vasiloff. Toronto : Environment Ontario, Phytotoxicology Section, 1991. 12 p. ISBN 0-7729-7844-1
MICROLOG 91-03282 1 fiche

A visual surveillance of vegetation was conducted in and around the Glenridge Landfill site in St. Catharines for evidence of leachate or leachate gas-induced injury. The landfill site is located in a former quarry consisting of fractured limestone atop the brow of the Niagara Escarpment and has been operating since 1976. The quarry leachate system currently consists of a separate connection to the city sanitary sewer system as well as an open pipe whose liquid runs down the Escarpment through a residential area. Testing of the vegetation at the landfill site was conducted in September 1989. Observations for air pollution foliar symptomatology were made on a wide range of indigenous vegetation species at each of the survey sites. This report provides the results of the visual surveillance.

**Pickering NGS vacuum building post-
douse inspection of floor slab,
underside**

by J.J. Deans. Toronto : Ontario Hydro,
Research Division, 1990. i, 18 p. : ill. Bibliogr.
(Report ; no. 90-209-K)
MICROLOG 91-04556 1 fiche

As part of the in-service inspection program, a douse test was carried out at the Pickering Nuclear Generating Station vacuum building in June 1990 to demonstrate the system's operational integrity. All the available water in the storage tank (approximately 9400 cu m) was emptied onto the floor slab in approximately 10 minutes. This report summarizes observations on the quality and overall assessment of the condition of the floor slab following the douse test. Visual examination, nondestructive tests and measurements of water leakage through the floor slab were carried out.

Pickering round whitefish sampling, spring 1989

by L.P. King. Toronto : Ontario Hydro, Research Division, 1990. iv, 15 p. : ill. Bibliogr. (Report ; no. 90-145-K)
MICROLOG 91-00794 1 fiche

Round whitefish populations in the vicinity of Pickering Nuclear Generating Station have been studied extensively in the course of preoperational, interim and postoperational environmental studies conducted to obtain permission to draw cooling water from Lake Ontario for Pickering B. Studies identified an area close to the discharge as being a likely spawning area, while entrainment studies in 1988 collected advance hatch larvae from the common intake. This study assessed the feasibility of two types of larval emergence traps for round whitefish collection, and evaluated the timing of larval emergence with respect to predictive models and the timing of round whitefish larval entrainment. Twenty-nine emergent traps were deployed between March 13 and March 20, 1989. Traps were serviced at approximately 5-day intervals, with final retrieval May 2, 1989. Continuously recording (hourly) thermographs were placed on the bottom inshore and offshore.

Pilot pesticide container and residue management project

by E.J. Yee and W. Omiucke. Winnipeg : Manitoba Hazardous Waste Management Corporation, 1989. iii, 38 p. : ill. Bibliogr. MICROLOG 91-03937 1 fiche

This report describes a pilot project initiated by the Corporation to develop a comprehensive management capability for pesticide containers and residues. The project evaluated various procedures and techniques that could be further developed to provide a complete and cost effective commercial service to address

this particular problem in compliance with present regulatory standards. A relatively small rural collection site containing 1400 metal and 2100 plastic containers was selected in the Rural Municipality of Rossburn for the pilot project. A process was developed based on managing all containers and the resultant solid and hazardous waste components in an environmentally sound manner; unrinsed containers considered as regulated hazardous waste and unsuitable for conventional solid waste management or recycling; solid waste recycling maximized to the extent practical; and landfill disposal of uncontaminated or decontaminated solid waste used conditional on only Class 1 facilities be used, volume reduction maximized and municipal approvals available.

Les Pipes à fumer de Place-Royale

par M. Savard et P. Drouin. Québec : Gouvernement de Québec, Ministère des affaires culturelles, 1990. 409 p. : ill. Bibliogr. (Collection dossiers ; no 67) ISBN 2-551-14214-8
MICROLOG 91-04639 5 fiche

Le mandat de ce document consiste à réaliser l'inventaire et l'analyse des pipes à fumer mises au jour lors des fouilles archéologiques de Place-Royale à Québec. Cette recherche avait pour but de mettre sur pied une collection de référence des pipes des 17^e, 18^e et 19^e siècles, de créer un fichier descriptif illustré de celles-ci, de documenter les artefacts sélectionnés et de rédiger un rapport synthèse. L'étude devait également tenter de mieux situer la pipe dans les modes de vie des diverses époques. A part un chapitre sur l'histoire et les méthodes de fabrication de la pipe et un autre sur l'habitude de fumer au pays, l'étude constitue un répertoire analytique chronologique et géographique de la collection de pipes de la période historique.

Placer potential of the Newfoundland continental shelf, a preliminary assessment : final report

prepared for Newfoundland and Labrador Dept. of Mines and Energy. St. John's : Memorial University of Newfoundland, Centre for Cold

Ocean Resources Engineering, 1989. iv, 46 p. : ill. Bibliogr. (Open file ; NFLD 1922) MICROLOG 91-02805 1 fiche

The success of offshore placer mining operations in other parts of the world and a recent upsurge in mining exploration in Newfoundland provided the impetus to study the offshore placer potential on the continental shelf around the island of Newfoundland. A regional assessment of the coastal and marine placer potential of Newfoundland was conducted by compiling and mapping data upon which the development of modern marine placers and the preservation of relict placers in the offshore depend. Data includes coastal lode and placer mineral occurrences, onshore Quaternary geology, sea level history, onshore drainage patterns, nearshore sedimentology, coastal exposure, and shelf gradient. This report describes how these criteria can be used in the assessment of the marine placer potential as a source-conduit (transport corridor)-sink framework. A classification scheme and set of sedimentation models developed for high latitude marine placer deposits are used to assess placer potential.

Plains Hydrology and Reclamation Project : summary report

by S.R. Moran...et al. Edmonton : Alberta Land Conservation and Reclamation Council, Reclamation Research Technical Advisory Committee, Plains Coal Reclamation Research Program, 1990. xv, 105 p. : ill., maps. Bibliogr. (Report ; RRTAC 90-8)
MICROLOG 91-04566 2 fiche

Between 1979 and 1988, the Plains hydrology and reclamation project investigated interactions of groundwater, soils and geology as they affect successful reclamation of surface coal mines in the plains of Alberta. The project was conducted to develop a predictive framework that would permit projection of success for reclamation and impact of mining on water resources over a long-term basis. Differences in physical and chemical properties of the pre-mining soils, overburden, and subsurface water were used as keys to project promising conditions. Phase I of the project lasted from 1979-84 and left a number of unresolved conditions. Phase II focused on the unresolved issues of the design and construction of a landscape that minimized salt buildup, the agricultural productivity of reclaimed lands, and hydrologic implications of the reclamation process. The study area was the Lake Wabamun mining area.

Plan for the evaluation of research in Canada : report

Royal Society of Canada. Committee for Evaluation of Research. Ottawa : The Committee, 1989. 40, 42 p. *Bibliogr.* *Bilingue* (Plan d'évaluation de la recherche...). ISBN 0-920064-30-2
MICROLOG 91-05224 1 fiche

This plan is the response of the Royal Society of Canada to a request by the Government of Canada to define the coordination and management of a program to assess and report publicly on Canadian research output in the natural sciences and engineering, medicine, the social sciences and the humanities. Priority was to be given to evaluation of university research. The depth and breadth of experience of the fellows of the Society allow it to make a major contribution to the monitoring and enhancement of Canadian research capability. The proposed evaluation plan is based on a review of the circumstances, structure, and characteristics of Canadian scholarship and research. Work is to begin on 4 fronts: identification and collection of information on which to base evaluation programs; identification and recruitment of Canadian and international peers who will serve on evaluation committees and on a university research committee; establishment of communications and collaborative links with professional and learned societies; and, development of a detailed work plan for evaluation of university research.

L'objet de ce document est de jeter un regard sur la première décennie, soit 1979-88, pendant laquelle on a planifié les niveaux d'immigration, en comparant les niveaux annuels annoncés et le nombre d'immigrants effectivement admis chaque année pendant cette période, de même qu'en retraçant l'évolution du processus de planification. Le document précise également les raisons pour lesquelles on a commencé à planifier les niveaux d'immigration. CA EX ST

Planning and development issues in the Pacific rim : Japanese multifunction polis in Australia : the newest new city proposal or just another export from Japan?

by D.W. Edgington. Vancouver, B.C. : University of British Columbia, Centre for Human Settlements, 1990. 15 p. Bibliogr. ISBN 0-88865-369-7 MICROLOG 91-00858 1 fiche (Available on fiche only)

The Japanese Ministry of International Trade and Industry (MITI) has approached the Australian Federal Government with a proposal

to develop, in Australia 'A Multifunction Polis scheme for the 21st Century.' This paper addresses the following questions concerning this unusual proposal: Why would MITI suggest building such a centre in Australia, involving international public and corporate research and development, and one which also concentrates on new 'high touch', or human service-based industries, as well as the development of culture in its broadest meaning? Moreover, what type of city are the Japanese interested in building in Australia; and how does this match Australian development priorities, as well as the latest critical thinking on the role of cities in an age of information technology and service sector development? • CA CO EX

Planning for sustainability : towards integrating environmental protection into land-use planning : a discussion paper

by R.L. Doering...et al. Toronto : Royal Commission on the Future of the Toronto Waterfront, 1991. 125 p. (Report ; 12) ISBN 0-662-1829-9 MICROLOG 91-06675 2 fiche

This report outlines the existing land-use planning and environmental assessment process in Ontario; describes various problems in the current system; presents some general principles that could be used to better integrate environmental considerations into land-use planning in a fair and consistent way; and concludes that although a comprehensive public inquiry is needed to study and consult on the issues before any recommendations can be made to government on whether and how a fully integrated system could be developed, there are some modest reforms which could be implemented now.

Planning for the future : a proposal for services for people with mental handicaps

Victoria : Ministry of Social Services and Housing ; Ministry of Health, 1991. 16 p.
MICROLOG 91-02233 1 fiche

Woodlands and Glendale Lodge are scheduled to close in 1994. As the population in institutions for people with mental handicaps is declining, services in the community are being built up. Many parents, advocacy groups and professionals have been involved in planning and developing community services for people with mental handicaps. This paper describes the range of community services today and proposals for the future of services for adults.

Plantation performance related to Canadian fire weather index system : 10-year consequence of a time-of-planting study in the coast-interior transition zone

by F. Pendt... et al. Victoria : Forest Resources Development Agreement, 1990. vi, 20 p. : ill. Bibliogr. (FRDA report ; 161) ISSN 0835-0752 ISBN 0-7726-1316-8
MICROLOG 91-06867 1 fiche

Plantation performance of Douglas-fir in the Coast-Interior Transition biogeoclimatic subzones has generally been poor and planting time has been frequently cited as one reason for this. This project examined plantation performance by time of planting in relation to site and climatic conditions, using the Canadian Forest Fire Weather Index System. Twelve research plots in the Pemberton Valley and the Fraser Canyon were planted, four per year, two in each geographic area. Each location was divided into two sites, each of which had two 50-tree rows per planting date. Although 12 plots were begun, the ages of the various experiments and survival limited remeasurement to only five locations. All locations had been freshly clearcut-logged and slash burned.

The Plasma production of titanium silicides and titanium-iron-silicides : final report

by C.A. Pickles and J.M. Toguri. Kingston, Ont. : Queen's University, Metallurgical Engineering Dept., 1990. 185 p. : ill. Bibliogr. CANMET contract: 79196-01-SS.
MICROLOG 91-04710 2 fiche

In this report, the Facility for the Analysis of Chemical Thermodynamics system is used to develop an accurate model of the Ti-Fe binary system, which is then compared to previous experimental and theoretical results. In addition, metallographic and carbothermic reduction methods were investigated for the recovery of titanium and silicon. The experiments were performed in a plasma furnace, with the oxidation resistance measured by thermogravimetry and the nature of the oxide determined by x-ray methods. The growth of titanium silicide in a copper melt was studied and its subsequent extraction by leaching techniques is reported.

Plume dispersion measurements from an oil sands extraction plant, March 1976

by D.S. Davison, C.J. Fortems and K.L. Grandia. Edmonton : Alberta Oil Sands Environmental Research Program, Meteorology and Air Quality Technical Research Committee, 1986. xv, 195 p. : ill., maps. Bibliogr. (AOSERP report ; 13)
MICROLOG 91-03678 3 fiche

A plume survey field program was conducted in March 1976 to determine the diffusion coefficients and turbulence parameters associated with the Great Canadian Oil Sands plant effluent plume. Airborne measurements were conducted under various meteorological conditions ranging from stable inversions to neutral stability cases. Five cases were selected for detailed analysis of plume geometry, mass flux calculations, and turbulence characteristics. Comparisons were made between observed plume structure and the Gaussian-predicted profiles. Lateral and vertical plume spread was derived from each case and compared with the Pasquill-Gifford stability classes. Significant comparisons were made between observed diffusion estimates and the estimates of the standard deviations of the horizontal and vertical wind components.

The Point No Point Treaty Council : innovations by an inter-tribal fisheries management cooperative

by E. Pinkerton and N. Keitlah. Vancouver, B.C. : University of British Columbia, School of Community and Regional Planning, 1990. v, 54 p. : ill. Bibliogr. (Discussion paper ; no. 26) ISSN 0828-2412
MICROLOG 91-05585 1 fiche (Available on fiche only)

This report analyzes the fisheries management system of the Point No Point Treaty Council, a management cooperative of four treaty tribes in western Washington State. The report first examines the cooperative's ability to represent the varying interests of its member tribes and to be accountable to them, considers its ability to conduct effective biological management focusing particularly on the local perspective the cooperative contributes to management activities conducted jointly with the Washington Dept. of Fisheries or performed alone. Reasons why various aspects of management are improved are discussed and the advantages of the management cooperative

structure over individual tribal management are considered.

Policing in relation to the Blood Tribe : report of a public inquiry

Commission of Inquiry-Policing in Relation to the Blood Tribe. Edmonton : The Commission, 1991. 2 v. Contents: Vol. 1 : Findings and recommendations -- vol. 2 : Executive summary. ISBN 0-7732-0534-9
MICROLOG 91-03317 4 fiche

On April 20, 1988 Chief Roy Fox of the Blood Tribe forwarded a letter to the Premier of Alberta which indicated that he was concerned about the increasing incidents of deaths and murders of his members under mysterious circumstances, and which demanded a Public

Inquiry to pursue these matters. On June 16, 1988, it was agreed that a Public Inquiry would be called. This document includes the evidence that was heard in three phases: Phase I examined a number of sudden deaths identified by the Blood Tribe where circumstances were considered suspicious or the investigation was perceived by the Blood Tribe to be incomplete or unacceptable. Phase II examined an incident generally referred to as the Cardston Blockade. And Phase III reviewed Native culture and how it perceptually interacts with federal and provincial policing policies and procedures. This report contains this evidence and provides a summary of major conclusions and recommendations.

by G. Schmitz. Ottawa : Library of Parliament, Research Branch, 1990. 18 p. Bibliogr. (Current issue review ; 88-3E) French ed. (Le Changement politique au nord...) on the same fiche. Revised September 10, 1990. ISBN 0-660-13889-1 MICROLOG 91-04810 1 fiche

The Yukon and Northwest Territories have been undergoing considerable political changes in recent years. Governmental and administrative processes have been transformed, and the question of evolution towards provincial status is now frequently raised. This paper discusses full responsible government in the territories, future political development and settling aboriginal claims, provincial status, and division of the N.W.T.

Une Politique des espèces sauvages pour le Canada

Conseil canadien des ministres de la faune. Ottawa : Service canadien de la faune, 1990. 32 p. L'éd. anglaise (A Wildlife policy...) : 91-03703/1. ISBN 0-662-96453-5 MICROLOG 91-03720 1 fiche

Cette politique constitue une mesure d'envergure nationale à partir de laquelle des politiques et des programmes fédéraux, provinciaux, territoriaux et non gouvernementaux relatifs à ces espèces peuvent être élaborés. Son objectif est de maintenir et d'améliorer la santé et la diversité des espèces sauvages du Canada dans l'intérêt de ces dernières et pour le bénéfice des générations présentes et futures de Canadiens. Parmi les titres de ce document, on retrouve: étendre la portée de la politique des espèces sauvages; les espèces sauvages dans le contexte des politiques environnementales et économiques; la participation des autochtones à la gestion des espèces sauvages; pour une meilleure conservation des espèces sauvages; et, faire participer le public.

Politique en matière d'alimentation et de nutrition en milieu scolaire

Fredericton : Ministère de l'éducation, 1991. 8, 6 p. Bilingue (Food and nutrition policy...). ISBN 0-88838-629-X MICROLOG 91-05881 1 fiche

Le but de la politique en matière d'alimentation et de nutrition est de contribuer au bien-être et à la santé des élèves du Nouveau-Brunswick en leur permettant de former des habitudes alimentaires saines par le biais de l'éducation et de le faire de manière responsable sur les plans économique, social, et environnemental. A cette fin, le ministère de l'Éducation a effectué un sondage en juillet 1990 sur les directives et normes applicables aux programmes alimentaires scolaires dans les écoles du Nouveau-Brunswick dont les résultats servent de fondement à la politique proposée. Ce rapport se penche principalement sur cette question.

Poll Haven local integrated resource plan : Annual report 1989-90

Alberta. Regional Resource Management Committee. Edmonton : The Committee, 1990. iv, 15 p. CSI 34126.007. ISBN 0-86499-739-6
MICROLOG 91-00435 1 fiche

This first annual report provides an overview of the resource management and development activities that have occurred under the Poll Haven Local Integrated Resource Plan from May 11, 1989 to March 31, 1990. The report deals with the resource sectors identified in the Plan (access, ecological resources, fisheries resources, forage resources, recreation, timber, water and watershed resources and wildlife), summarizing for each the various activities of the involved government agencies. Only those resource sectors for which implementation activities have occurred are identified. In addition to addressing those activities that have taken place specially as a result of the Plan, this report also contains a summary of the ongoing operational activities of the agencies involved in the Plan.

Poll Haven local integrated resource plan : implementation document

Alberta. Regional Resource Management Committee. Edmonton : The Committee, 1990. iii, 14 p.
MICROLOG 91-00434 1 fiche

The approved Poll Haven Integrated Resource Plan (IRP) sets out the Government of Alberta's policy for the use and management of

public lands and resources in an 80 sq km area of the eastern slopes in southwestern Alberta. This document outlines a plan for action by identifying, ranking and placing project initiatives in a work plan that has been proposed by, or are consistent with, the IRP. The document also describes for provincial government agencies, industry, interest groups, and the general public what work is to be carried out within the planning area. The work program covers access, ecological resources, fisheries, forage, historical resources, mineral resources, recreation, timber resources, water and watershed, and wildlife.

Poor places : disability-related housing and support services

by S.R. Torjman. Downsview, Ont. : G. Allan Roeher Institute, 1990. v, 136 p. : ill. Bibliogr. ISBN 0-920121-52-7
MICROLOG 91-00285 2 fiche (Available on fiche only)

This study describes the major sources of funds which sustain the support services: The Canada Mortgage and Housing Corporation, the Canada Assistance Plan, Established Programs Financing and Extended Health Care Services. It analyzes the problems that arise as a direct or indirect result of these funding arrangements. It also proposes a variety of policy options for improving the availability and quality of support services. In addition, it considers funding sources for personal supports including personal support networks, brokerage, and advocacy. Finally, it strongly advocates the funding of only those organizations whose programs embody three fundamental principles of equality: inclusion, citizenship and self-determination.

Population aging and government deficits in Canada

by D.K. Foot. Ottawa : Institute for Research on Public Policy, Studies in Social Policy, 1987. 13 p. Bibliogr. (Discussion paper ; 87.A.4)
MICROLOG 91-01499 1 fiche

The impacts of population growth and aging on government deficits remains largely an unresolved issue in the theoretical and empirical literature. The facts that population growth and aging affect government expenditures and, most likely, government revenues are beyond dispute; what remains at issue is the magnitude of these impacts and hence their net impact on government deficits. This document reviews the traditional demographic approach to these issues which focuses on the concept of a dependency ratio. It also provides an examination of government revenues where, it is argued, the least is known about the impacts of population aging. In addition, it also reviews relevant existing literature on intergovernmental fiscal transfers, and briefly examines the alternative approach of simulation models, including macroeconomic models. It concludes with a brief concluding section summarizing the main findings.

Population aging and the Canadian labour force

by D.K. Foot. Ottawa : Institute for Research on Public Policy, Studies in Social Policy, 1987. 18 p. Bibliogr. (Discussion paper ; 87.A.5) CSI 99545.207.
MICROLOG 91-01536 1 fiche

Over the past 25 years, labour force growth in Canada has been unmatched in any other Western industrialized economy. This growth can be attributed to two complementary forces: a baby-boom generation which came of labour force age over the period, and increases in labour force participation rates, especially among females. This paper documents these historical factors, and examines compositional details. It also discusses whether these trends can be expected to continue into the future. It explores the possibility of changing management styles and practices, and changing organizational structures. It concludes with a summary of the main findings.

Population change and the Canadian economy : a survey of the issues

by F.T. Denton and B.G. Spencer. Ottawa : Institute for Research on Public Policy, Studies in Social Policy, 1987. 38 p. (Discussion paper ; 87.A.2) CSI 99545.208.
MICROLOG 91-01537 1 fiche

The purpose of this paper is to provide an overview of the demographic changes that have taken place in recent decades in Canada, the changes that are in prospect for the next several decades, and the manner in which the Canadian economy is likely to be affected by these changes. It includes a brief review of Canada's population history and presents some basic demographic projections to the year 2036. It then examines how the population and the economy interact with each other, and the role of immigration in the determination of economic-demographic change. It also discusses the demographics of subpopulations, and the demographics of the stock of physical capital. In addition, it looks at the economic effects of population at the level of the individual, and issues relating to changes in life expectancy. It focuses on just what is meant by 'economic growth', and whether there is a population crisis. Finally, it sets forth a list of topics or research areas that the authors think deserve consideration.

Population change and the future labour force : a discussion paper

by F.T. Denton and B.G. Spencer. Ottawa : Institute for Research on Public Policy, Studies in Social Policy, 1987. 35 p. Bibliogr. (Discussion paper ; 87.A.3) CSI 99545.209.
MICROLOG 91-01542 1 fiche

The population of Canada has been growing for as long as records have been kept, as has the labour force. However, the path of growth has been very uneven, ranging from very rapid growth in some decades to much slower growth in others. The rate of population growth has slowed considerably in recent years, largely because of the dramatic decline in the birth rate, and the rate of labour force growth is now slowing too. Most observers expect birth rates to remain low by historical standards, in which case low rates of population and labour force growth will persist for many decades to come. If so, the demographic future will be unlike the past. This paper provides some projections of likely future changes, places them in historical context, and discusses some of the implications associated with such changes.

Population estimates and seasonal distribution of birds around Boundary Bay, British Columbia : progress made to 30 April, 1990

by R.W. Butler...et al. Delta, B.C. : Environment Canada, Canadian Wildlife Service ; Surrey, B.C. : Ministry of Environment, Wildlife Branch, 1990. 21 p. : ill., maps. Bibliogr.
MICROLOG 91-01170 1 fiche

In August 1989, representatives for the Corporation of Delta met with counterparts from the Municipality of Surrey, and federal and provincial governments to prepare guidelines for an environmental and land-use study of lands adjacent to Boundary Bay. From that meeting arose terms of reference for a 4-part study on human activity and the environment in the area, approved in April 1990. The proposed study included ecological, foreshore planning and rural land-use components. A separate study to identify environmentally sensitive areas in Surrey was added. This is the first progress report from the ecological study, describing the Boundary Bay areas and ecosystem, the methods of population estimates, and the results of the study for beaches and farmlands.

Pornography -- Rev.

by J.R. Robertson. Ottawa : Library of Parliament, Research Branch, 1990. 17 p. (Current issue review ; 84-3E) *French ed. (La Pornographie) on the same fiche. Revised November 7 1990.* ISBN 0-660-13853-8
MICROLOG 91-04866 1 fiche

For many, pornography is not only considered immoral insofar as it expresses an ideology and view of the sexes and their relationship that is repugnant, but it is also argued that it causes actual harm. On the other hand, there are those who contend that there is no convincing evidence of any causal relationship between pornography and actual physical harm, and that any other effects are too attenuated or insignificant to justify the infringement of the constitutionally guaranteed freedom of expression. This review gives a survey of this debate.

Port Alice SO2 impacts : air quality, soil, vegetation and health

by J.W. Van Barneveld...et al. Victoria : Ministry of Environment, 1989. xxv, 206 p. : ill. Bibliogr. (MOE working report ; 74) ISSN 0821-0659 ISBN 0-7718-8860-0
MICROLOG 91-03622 3 fiche

Port Alice is located near the northern extent of the Vancouver mountains. There has been a sulphite pulpmill there since 1918, located on the northern shore of Neroutsos Inlet in the northern part of Vancouver Island. In 1985 and 1986 a preliminary investigation was conducted to study and evaluate environmental impacts, using available or collected preliminary information, and identifying missing information required for a comprehensive assessment. Emissions and their effects were tracked along the path through the atmosphere into vegetation and the soil. The available information on production, emissions, and air quality was reviewed and evaluated. Field samples of vegetation and soil were taken from 7 sites at various distances and in 3 directions from the mill. Additional samples were taken from a site near Port Hardy, where increased rain acidity had been observed, and from a site in the Tsitika drainage which was thought to reflect pristine environmental conditions.

Portable audio-visual terminal for disabled persons

Neil Squire Foundation. Ottawa : Canada Mortgage and Housing Corporation, Project Implementation Division, 1990. 13 p. : ill. MICROLOG 91-06250 1 fiche

Evaluation of a hands-free design concept for a home control system for persons with severe physical disabilities. The report covers the development and evaluation of a prototype system that consisted of a main control section which performed all the operational tasks, and a portable communications display terminal which provided voice access to the control section. The prototype was designed and assembled to determine the viability of using the communications terminal for voice control of home appliances, entertainment, communications and security devices. The terminal and main control package were installed in the home of a quadriplegic for testing, and user response and technical performance characteristics were monitored.

The Portrayal of gender in Canadian broadcasting : summary report, 1984-88

Erin Research. Ottawa : Canadian Radio-television and Telecommunications Commission, 1990. 107, 109 p. : ill. *Bilingual (La Représentation des femmes...)*. CSI 22205.001. ISBN 0-662-58027-3
MICROLOG 91-04702 3 fiche

One of the initiatives of the CRTC has been to conduct research that will provide an accurate description of women and men in the broadcast media. This report presents research data from two points in time, the 1984 fall season and 1988 fall season. A major purpose of the study is to determine whether the portrayal of women and men has changed over this time. It focuses on two issues: the numerical representation of women and men in programming and advertising; and the roles in which women and men appear in programming and advertising.

Poser des gestes concrets : la garde des enfants, les choix

Toronto : Conseil consultatif de l'Ontario sur la condition féminine, 1990. 40, 40 p. : ill. *Bilingue (Action on issues...)*.
MICROLOG 91-00919 2 fiche

Les parents ont de tout temps eu besoin d'aide pour s'occuper de leurs enfants et, dans le passé, une grande partie de cette aide était fournie par des membres de la famille, des voisins ou des amis. Ce genre de services non rémunérés est beaucoup plus rare de nos jours et les parents se tournent vers le gouvernement dans l'espoir d'obtenir les services de garde d'enfants dont ils ont besoin. En conséquence, la pression exercée sur les services existants est considérable et la question de la garde des enfants est hautement visible. Ce document examine et évalue les divers types de garderies d'enfants actuellement disponibles et donne des conseils sur la façon de les choisir et de les utiliser.

The Post-flood morphometry and bathymetry of Split and Stephens lakes, 1989

by B.C. Cherepak. Winnipeg : Manitoba Natural Resources, Fisheries, 1990. v, 78 p. : ill., maps. Bibliogr. (Manuscript report ; no. 90-08) *Fold. maps not filmed*.
MICROLOG 91-00340 1 fiche

Split and Stephens Lakes, located on the lower Nelson River, were flooded for hydro-electric development and the Churchill River Diversion. This report presents the results of calculations for basic basin morphometric parameters (lake size, depth, volume) for the post-flood water levels. Bathymetric maps were produced for both lakes. The results will aid in determining the impacts on the various aquatic habitats affected by the development. Bathymetric maps were produced and morphometric parameters were calculated to help evaluate the possible impacts of hydro-electric development on the lakes.

Post-secondary international education in the '90s

Victoria : Ministry of Advanced Education, Training and Technology, International Education, 1991. 14 p. : ill.
MICROLOG 91-04245 1 fiche

This document outlines the commitment of the B.C. government to international education policy, and the need for a greater commitment in that direction. Through expenditures in curriculum development, student awards, project development, the B.C. Centre for International Education (BCCIE), Marketing, and other programs the Ministry of Advanced Education, Training and Technology are playing an active role in strengthening B.C.'s commitment to international education. Statistics highlight B.C.'s share of international student enrolment and their involvement in international education in Canada. Selected international education projects proposed by B.C. post-secondary institutions are outlined. Future strategies to increase B.C.'s success in an international education including networking, enrichment of existing institutions, etc. are generally described, and these are placed in the framework of B.C.'s policies regarding international education.

Postglacial history of the bowhead whale and of driftwood penetration : implications for paleoclimate, central Canadian Arctic

by A.S. Dyke and T.F. Morris. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1990. 17 p. : ill., maps. Bibliogr. (Paper ; 89-24) ISSN 0068-7650 ISBN 0-660-13719-4
MICROLOG 91-00863 1 fiche

The report presents the frequency distribution of 53 radiocarbon dates on bowhead bones collected during 4 summer field seasons on

Somerset and Prince of Wales Islands in the central Arctic. These data are used to document changes in the summer ranges of the whale during the last 10,500 years and to infer the sea ice conditions that have governed these changes. The information presented on bowhead ecology serves as a background for assessing its postglacial history. Changes in frequency of boreal driftwood penetration into the Arctic Archipelago during postglacial time were interpreted in relation to changes in sea ice conditions. The frequency distribution of 57 radiocarbon-dated postglacial driftwood samples from the same islands are compared to the changes in bowhead abundance to assess the utility of the driftwood record as a paleosea-ice indicator and to infer changes in oceanographic circulation patterns.

The Potential of Lanxide ceramic as a material for permanent moulds

by K.G. Davis, J.R. Emmett and J.-G. Magny. Ottawa : Canada Centre for Mineral and

Energy Technology, Metals Technology Laboratories, 1990. ii, 5 p. : ill. (Report ; MTL 90-38(TR))
MICROLOG 91-01026 1 fiche

Environmental regulations associated with the use of sand in foundries are becoming more and more restrictive, making the use of re-usable moulds more viable. While the lower melting point alloys regularly use metal molds, the higher melting point alloys such as cast iron and steel are still made in sand moulds. Ceramic composites in which SiC particles are infiltrated with molten aluminum then oxidized to Al₂O₃ were recently introduced by the Lanxide company. This report gives a preliminary estimate of the suitability of Lanxide ceramic for use as a permanent mould material for the higher melting point alloys. Small samples of standard and special grades of Lanxide SiC-Alumina ceramic were subjected to thermal shock tests by pouring cast iron into a water-cooled copper mould with a small sample of the ceramic set into its base. Fifty castings were poured over each sample, with variations including coating the ceramic surface with different substances, and directing the incoming stream either directly onto the sample or onto another area of the mould base.

Pour mieux comprendre l'autonomie des aînés, rapport no 2 : leurs stratégies de prise en charge

Ottawa : Conseil consultatif national sur le troisième âge, 1990. 28 p. : ill. Bibliogr.

L'éd. anglaise (Understanding seniors' independence...) sur la même fiche. ISBN 0-662-96011-4
MICROLOG 91-03400 1 fiche

Ce rapport porte sur les stratégies qu'utilisent les aînés pour surmonter les obstacles à l'autonomie. On y trouve une description des types de stratégies qu'emploient les aînés pour faire face aux sept principaux obstacles signalés, suivie de plusieurs avenues de solutions qui tiennent compte des stratégies d'adaptation communiquées par les personnes consultées. Les résultats communiqués dans ce document proviennent des réponses de 800 participants à une enquête que le CCNTA a menée en 1988 afin de connaître les difficultés rencontrées par les aînés qui veulent vivre autonomes. L'échantillon qui a pris part à la consultation se composait de 503 aînés répondant pour eux-mêmes, de 70 aînés répondant pour leurs associations ou des aînés qu'ils avaient observés, et de 227 fournisseurs de services, des milieux professionnel et non professionnel, qui travaillent avec les aînés.

Pour nous conduire à l'an 2000 : un nouveau cadre législatif en matière d'éducation : document de consultation

Winnipeg : Education et formation professionnelle Manitoba, 1991. 31 p. *L'éd. anglaise (Creating a framework for the future...)* : 91-04150/1.
MICROLOG 91-06838 1 fiche

Le système d'éducation public du Manitoba fournit ses services à environ 200 000 élèves âgés de 5 à 21 ans. En outre, 1 500 à 2 000 adultes s'inscrivent annuellement aux programmes offerts par les divisions scolaires. La clientèle scolaire manitobaine comprend également environ 10 000 élèves qui fréquentent les écoles privées et 300 élèves qui font leurs études à la maison. Ce document de consultation a pour objet d'amorcer une révision globale de la législation manitobaine dans le domaine de l'éducation. Il énonce quelques-unes des questions principales qui doivent être examinées à la lumière des changements qui se sont produits dans notre société.

Pre-commercial thinning of jack pine

by R. Vassov and W.D. Baker. Thunder Bay, Ont. : Ministry of Natural Resources, Northwestern Ontario Forest Technology Development Unit, 1988. iii, 25 p. Bibliogr. (Technical report ; no. 12)
 MICROLOG 91-00056 1 fiche

Jack pine is one of the most important commercial species in northwestern Ontario. Much of the jack pine regeneration effort following harvesting or fire has been site preparation followed by direct seeding. Natural seeding also follows fire from serotinous cones. This review synthesizes the current literature on pre-commercial thinning of jack pine for growth response, method of thinning, wood quality, end product and economic considerations. In addition, major gaps in knowledge are identified and possible future areas for research and development are suggested.

Division, 1990. viii, 33 p. : ill., map. Bibliogr. (Ontario Geological Survey report ; 277) *Fold. map not filmed.* ISSN 0704-2582 ISBN 0-7729-6787-3 MICROLOG 91-05490 1 fiche

This report, based on a reconnaissance investigation in 1987, describes the geology of Yarrow and Doon townships, emphasizing the rocks of the Huronian Supergroup. The map area covers 187 sq km and is centred 11 km southwest of the town of Matachewan in the District of Timiskaming. The report covers the general, structural and economic geology of the area, including descriptions of specific properties. NR ON PR PS SC

Preconditioning and destressing summary of field investigations

by S. Dufresne. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. v, 37 p. : ill. Bibliogr. (Report ; MRL 90-144(LS)) MICROLOG 91-04540 1 fiche

Literature survey of destressing and preconditioning practices used in underground mines throughout the world. The report describes the main concepts underlying rock preconditioning; the purpose of destressing; design parameters; computer modelling; restrictions and risks associated with the practice; and observations and methodologies proposed by different authors whose work has been reviewed. Field experiments undertaken in Canada, the US and South Africa are also described. • CA CM NR PS SC

Predation by harbour seals and sea lions on adult salmon in Comox Harbour and Cowichan Bay, British Columbia

by M.A. Bigg...et al. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, Pacific Biological Station, 1990. iv, 31 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1769) ISSN 0706-6457 MICROLOG 91-03661 1 fiche

Harbour seals, Steller sea lions and California sea lions are known to feed on salmon in estuaries and rivers during summer and fall before the fish spawn, resulting in numerous control programs. Little is actually known about how these pinnipeds hunt salmon or the impact of their predation on salmon stocks in such areas. This report presents the results of a 1989 examination of the hunting behaviour and impact of predation on prespawning chinook, pink, coho, and chum salmon by harbour seals at Comox Harbour and Cowichan Bay and by California and Steller sea lions at Cowichan Bay. Field studies involved censuses of harbour seals and sea lions to determine the seasonal variation in abundance relative to salmon migrations; observations of pinniped predatory activities; and kill rates on salmon to assess predation impact. The value of using direct field observations to describe pinniped predations is discussed. • BC CA CF FI SC

Predicting biomass of white pine regeneration

by W.G. Murray. Chalk River, Ont. : Forestry Canada, Petawawa National Forestry Institute, 1991. 3 p. : ill. (PNFI technical reports ; 10) ISSN 1180-2618 ISBN 0-662-18603-6 MICROLOG 91-04146 1 fiche

The coniferous stand on the Frontier Lake fire research site at CFB Petawawa is a mixture of jack pine, white pine, and red pine, with jack pine being the dominant species. White pine forms the understorey regeneration throughout. During test-fire experiments, portions of these saplings will undergo combustion, with the extent depending on sapling size and fire

intensity. Since the fire will not consume the whole sapling, postfire observations and biomass prediction equations derived for this site would suffice in determining understorey fuel consumption. Seventy-one young trees were randomly selected for destructive sampling from various parts of the site and equations were developed based on the most easily measured parameter. CA FO ON SC

Predicting the daily occurrence of people-caused forest fires

by B. Todd and P.H. Kourtz. Chalk River, Ont. : Forestry Canada, Petawawa National Forestry Institute, 1991. v, 16 p. : ill. Bibliogr. (Information report ; PI-X-103) ISSN 0706-1854 ISBN 0-662-18819-5 MICROLOG 91-04733 1 fiche

People are responsible for starting two out of every three forest fires in Canada. To efficiently suppress these fires while they are still small, a modern forest fire control organization must be able to predict their numbers and locations one day in advance. During the past 20 years, various prediction methods have been developed and tested. This report presents the current state of one of the paths taken. The procedure is encoded into a computer program which uses databases containing the region's historical fire occurrence patterns and tomorrow's predicted weather and fuel moisture index values. The program was originally developed for use in Maniwaki in southwestern Quebec. CA FO SC

Preliminary assessment of the Alberta garden suite pilot project

Lovatt Planning Consultants. Edmonton : Alberta Municipal Affairs, 1990. xiii, 87 p. : ill. ISBN 0-88654-279-2 MICROLOG 91-00617 2 fiche

Alberta Municipal Affairs is conducting a garden suite pilot project as a cooperative effort with the City of Lethbridge and the County of Parkland. Garden suites are self-contained residential units located on the property of a host family to accommodate the provision of support services for one or two elderly relatives. The pilot project designed, constructed, placed and operated 3 suites in Lethbridge and 3 in the County of Parkland and evaluated and monitored the appropriateness of such a housing option. Factors evaluated included demand for the suites; assessment of care and services; appropriateness of unit design, unit construction and foundation techniques, servicing techniques, and siting criteria; assessment of placement methods; neighbourhood impact; cost effectiveness as a form of supportive housing; methods of delivery and control; and appropriateness of the concept. While final evaluations and recommendations are expected in March 1992, this report provides an interim assessment. AL PL PR SA

Preliminary evaluation of sulphur sulphidic residue separations : final report

by J.R. Hartamovs. S.I. : Cominco, 1991. 77 p. : ill. Bibliogr. CANMET contract: 79154-01-SQ. MICROLOG 91-04716 1 fiche

Examination of the recovery of elemental sulphur from hydrometallurgical sulphur-sulphide residues. This report includes a literature survey of previous hydrometallurgical plant practices and of likely avenues for further study; what factors are important during the leaching of sulphides for the subsequent recoverability of elemental sulphur; the feasibility of physical and chemical sulphur recovery from secondary residues; and a comparison of

various sulphur recovery routes. • CA CM NR PS SC

Preliminary evaluation of the effect of seed size and seed source of kochia on germination and early growth

by E. Coxworth...et al. Saskatoon, Sask. : Saskatchewan Research Council ; Regina : Saskatchewan Agriculture, Agriculture Development Fund, 1988. ii, 10 p. Bibliogr. (SRC publication ; no. R-814-3-E-88) ISSN 0829-9455 MICROLOG 91-01872 1 fiche

Texas kochia seed germinated much more rapidly than native kochia seed in initial studies. Since larger seed of other crops often produce stronger, higher yielding plants than smaller seeds, and can be planted deeper where more moisture may be more readily available, a comparison of seed sizes of kochia was undertaken. The study compared seed sizes and seed source effects on germination rate and extent, and on emergence and early growth of native kochia seed planted at various depths. Texas and native seeds of sizes greater than 16, 18, 20 and 30 mesh were compared. AG MS PR SC

A Preliminary examination of the parasite fauna of yellowtail rockfish, *Sebastes flavidus*

by D.L. Lee, D.J. Whitaker and R.D. Stanley. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, Pacific Biological Station, 1990. iv, 21 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1777) ISSN 0706-6457 MICROLOG 91-04923 1 fiche

The Canadian and US trawl fisheries for yellowtail rockfish off the coasts of BC, Washington and Oregon are managed by area, based on the premise that there is more than one stock, although supporting information on stock identification is limited. To provide a sounder biological basis for stock boundaries, a joint study was begun of the parasites of this species in 1988. A detailed examination was conducted of a sub-sample of the fish collected, with the results used to identify parasites which showed the most promise for biological tags for stock identification. This report documents the methods, results, and recommendations from this preliminary survey of the parasite fauna of yellowtail rockfish. • BC CA CF FI LS SC

Preliminary fatality statistics, 1990

A Preliminary investigation of the helminth parasites of flying squid, *Ommastrephes bartrami*, in northeastern Pacific waters and comparison with other parasite surveys of Ommastrephidae

by S.M. Bower, L. Margolis and D.T.C. Yang. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1990. iv, 19 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1750) ISSN 0706-6457 MICROLOG 91-01509 1 fiche

The helminth parasites of many species of cephalopods, including members of the family Ommastrephidae, have been documented. One species of flying squid *Ommastrephes bartrami* has recently acquired major commercial importance in the North Pacific Ocean. While the helminth fauna of *O. bartrami* from the Atlantic, Indian and southeastern and northwestern Pacific Oceans have been surveyed, no information is available on parasites of *O. bartrami* from the eastern North Pacific Ocean. Experimental fishing conducted off the coast of North America in 1987 presented the opportunity to examine specimens from the northeastern region of the North Pacific Ocean for parasites. Results of this survey are compared with those of previously reported studies of parasites from areas and of other members of the family Ommastrephidae in the Pacific Ocean.

A Preliminary investigation of the zinc dust purification of Zincex process zinc chloride solution

by D.J. MacKinnon and J.M. Brannen. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1990. iv, 34 p. : ill. (Report ; MSL 90-079(TR))

MICROLOG 91-01031 1 fiche

Over the past 15 years, CANMET has developed expertise on impurity effects in zinc electrowinning from conventional zinc sulphate electrolyte. Technicas Reunidas developed a two-stage SX process, the Zincex process, that produces an acid-sulphate zinc electrolyte from a zinc chloride leach solution. The second SX stage, however, does not eliminate totally the impurities detrimental to zinc electrowinning. This report describes a CANMET process which adds zinc dust prior to the second solvent extraction step to remove the majority of metallic impurities.

Preliminary results of an analysis of areas of influence in Shanghai

by C. Comtois and J.-P. Rodrigue. Montreal : Université de Montréal, Centre de recherche sur les transports, 1991. 32 p. : maps. Bibliogr. (Publication ; no. 780)

MICROLOG 91-05310 1 fiche

The main deficiency of most current modelling approaches to transportation is neglect of the integration of existing geographical knowledge into transport and land use models. This paper addresses this aspect of the problem by introducing a theoretical and methodological framework for the analysis of the interrelationship between land uses. The analysis determines to what extent the functional land use in a city can be considered an ordered pattern suggesting an alternative to theoretical approaches based on areas of influence and measured by level of attractiveness of land users. A procedure is then described based on this alternative, following the contribution of Hanjoul, Beguin and Thill. This procedure is then applied to the analysis of Shanghai and an evaluation of the strategies for optimizing the interrelationship between land uses is presented.

Preliminary results of pillar-backfill confinement tests

by B. Arjang. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1991. iv, 31 p. : ill. Bibliogr. (Report ; MRL 91-063(TR))

MICROLOG 91-06271 1 fiche

Experimental studies have demonstrated that 'stiff' (cemented rockfill) and 'soft' (cemented tailings) backfill used as confinement of rock pillars can act as passive lateral support. Extensive large-scale experimental work has been conducted to evaluate the interaction of pillar-backfill. This paper provides the preliminary data from pillar-backfill confinement tests. The specimens, using 136 mm diameter rock cores and cemented tailings of varying cement content, were confined in an aluminum cylinder. The complete load-deformation curves were recovered from a simultaneous compression on composite pillar-backfill specimens in an 18 MN 'soft' testing machine.

Preliminary study of energy performance evaluation and labelling requirements for windows

by D.W. Bailey. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. xiii, 30 p. Bibliogr. French ed. (*Etude préliminaire sur les exigences...*) : 91-01339/1. CANMET contract: 48SZ.23283-7-6249. ISBN 0-662-17855-6. MICROLOG 91-01244 1 fiche

This report defines the key parameters of an extensive preliminary study on the energy performance evaluation and labelling requirements for all Canadian windows as defined by input from industry members, user groups and government and regulatory bodies. In establishing a voluntary, industry-supported evaluation and labelling program, window manufacturers would be encouraged to produce high-performance windows in Canada and consumers would be provided with an unbiased means of determining performance improvements. The development of high-performance window technology has advanced significantly but has not yet achieved a large market share. This project was initiated to counteract this problem. • CA CM EN PL SC

Preliminary study on vacuum pyrolysis of lignin by-product materials derived from steam-exploded wood, phase I : laboratory study

Carbovac Research Inc. Ottawa : Canada Centre for Mineral and Energy Technology,

Efficiency and Alternative Energy Technology Branch, 1991. xi, 21 p. : ill. Bibliogr. CANMET contract: 048SZ.23283-8-6173. ISBN 0-662-18848-9. MICROLOG 91-04536 1 fiche

Study to test the validity of using the vacuum pyrolysis concept by producing liquid fuels and charcoal from lignin and to undertake a preliminary study of the influence of the reactor operating conditions over the liquid, solid and gas yields, as well as the composition of oils produced by vacuum pyrolysis of lignin from steam-exploded wood. The pyrolysis experiments were performed in a laboratory scale, batch reactor unit, with 100 g of feedstock material. A detailed chemical analysis of the oil produced was made. • CA CM EN PS SC

Preliminary surficial geology of Cornwallis and adjacent islands, Northwest Territories

by S.A. Edlund. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1991. 30 p. : maps. Bibliogr. (Paper ; 89-12) Fold. map not filmed. ISSN 0068-7650 ISBN 0-660-13962-6. MICROLOG 91-06052 1 fiche

Petroleum and mineral exploration in the Arctic islands requires terrain information for environmental assessment and land use planning. A survey was initiated in 1975 to gather data in the region of Cornwallis Island, in the south-central Queen Elizabeth Islands and the easternmost part of the Parry Islands. The project involved interdisciplinary terrain mapping and environmental impact evaluation, as well as a study of the nature of surficial materials, permafrost and Quaternary history. Auxiliary projects included the study of engineering properties, vegetation-surficial materials relationships and plant communities. Most of the area was mapped by photo interpretation, using 1:60,000 air photos. This report outlines the regional setting of the island and describes the surficial materials. There is also a brief and speculative discussion of economic geology and Quaternary history. CA NO NR PS SC

Preliminary testing and evaluation of new computer programs for traffic analysis, task : evaluation of supercomputer potential

by L.E.G. Parker. Regina : Ministry of Transportation, Research and Development Branch, 1990. ii, 131 p. : ill. Bibliogr. MICROLOG 91-03038 2 fiche

To evaluate the potential of supercomputers in traffic simulation/modelling, two representative traffic modelling packages were converted and run on two representative supercomputers. The models tested were TRANSYT-7F, a system developed for mainframe computers but now supported and available on PC systems, and INTEGRATION, a system developed to run on an 80386-based workstation at Queen's University in Kingston, Ontario. The computers used were a CRAY X-MP vector supercomputer and a MYRIAS SPS-2 massively parallel supercomputer. The project determined the relative degree of difficulty of converting existing models to run on representative supercomputers; the immediate and potential performance improvements realizable; overall design considerations for revisions to existing models or new models to fully exploit existing architectures; and operational considerations in using existing supercomputer facilities for ongoing research or proposed production use. A Preliminary vegetation survey of the Alberta Oil Sands Environmental Research Program study area

by P.W. Stringer. Edmonton : Alberta Oil Sands Environmental Research Program,

Vegetation Technical Research Committee, 1976. xiii, 108 p. : ill., maps. Bibliogr. (AOSEPR report ; 4) MICROLOG 91-03416 2 fiche

This study obtained exploratory data on the vegetation of the Alberta Oil Sands study area to provide an information base to aid in designing a full-scale vegetation inventory program; described the main structural and compositional features of the major plant communities in the study area (especially wetland and non-forest vegetation); delineated feasible plant community mapping units and criteria for identifying these units at a scale of 1:25,000; supplied a set of photographs of the principal plant community types; and assessed normal duration of field season for vegetation surveys and aerial photography. Between August 18 and September 3, 1975, 84 stands were sampled. The structure and species composition of each was described by assigning to each understory species a cover-abundance value, measuring strata heights, and by obtaining, where appropriate, quantitative data on the tree stratum. The 84 stands were classified on the basis of overall species similarity by means of cluster analysis. AL EV LS PR SC

Premier's Council on Native Affairs final report

British Columbia. Premier's Council on Native Affairs. Victoria : The Council, 1990. 30 p. : ill. ISBN 0-7726-1325-7. MICROLOG 91-03615 1 fiche

In July 1989 Premier Vander Zalm, recognizing that aboriginal people in British Columbia face a matrix of issues that is more entrenched and more complex than faced by the majority of British Columbians, created the Premier's Council on Native Affairs. The purpose of the Council was to meet with tribal councils and aboriginal organizations across the province to hear their concerns, and to review and make recommendations on provincial policies affecting aboriginal people. This report includes both the interim recommendations, the provincial government's response to those recommendations, a summary of actions taken since the interim report was tabled, and a concluding chapter with comments on recent events and the dissolution of the Council. Prices monitoring survey, December 1990

Winnipeg : Manitoba Bureau of Statistics, 1991.
17 p. CSI 42108.012.
MICROLOG 91-06473 1 fiche

Each year, the Manitoba Bureau of Statistics conducts a survey to collect, tabulate and disseminate current information on the cost of food items in the form of average commodity prices as well as comparisons to Winnipeg. This document includes 4 tables: Table 1 presents the spatial indices for the 16 Manitoba communities in the December 1990 survey. The indices are based on a matched brand sample, and weighted with the present Consumer Price Index food weights for Winnipeg. Each of the communities is compared to base Winnipeg; Table 2 presents the average prices of a subset of the food basket for Winnipeg and the other 16 communities surveyed on a matched brand basis; Table 3 presents the spatial indices for the 16 Manitoba communities surveyed in 1989; and Table 4 presents the average prices of a subset of the food basket for these communities and Winnipeg, in December 1989.

Prime land inventory, component 2 : NOEGTS test study, 1987

Robinson, Merritt, and deVries Limited.
Thunder Bay, Ont. : Ministry of Natural Resources, Northwestern Ontario Forest Technology Development Unit, 1987. vii, 253 p. : ill. (Technical report ; no. 01)
MICROLOG 91-00059 3 fiche

A review of the land resources within the forest regions of Northern Ontario was begun as part of a prime land strategy program with an evaluation conducted on the suitability of the existing land resource information data base and particularly the Northern Ontario engineering geological terrain study (NOEGTS) mapping, used in the prediction of prime land class and subclass for the production of a region-wide prime land inventory. The evaluation used a statistically defensible field sampling program to test the 'predictive' capability of the prime land class and subclass derived from a field sampling program. Six NOEGTS 1:100,000 scale map sheets were selected and reliability testing was conducted using the guidelines detailed by Forbes (1985) and Moon and Hall (1986). The study also evaluated whether other resource base data such as the Ontario land inventory land classification and the Agriculture Canada soils maps could provide any additional input into the predictive process.

Primed for power : women in Canadian politics

by C. Maillé and V. Pollon. Ottawa : Canadian Advisory Council on the Status of Women, 1990. i, 50 p. Bibliogr. (Background paper ; BP 1990-1E) French ed. (Vers un nouveau...) : 91-00596/1. ISBN 0-662-18180-8
MICROLOG 91-00595 1 fiche

This background paper begins with an analysis of data which demonstrates the current representation of women in the official spheres of Canadian politics at the federal, provincial-territorial, and municipal levels. International data are used to compare the situation of women in Canada with that of women elsewhere in the world. This data analysis is completed by a retrospective study of women's representation in positions of influence in Canada: the judiciary; the Senate; federal boards, agencies, commissions, Crown corporations; and the upper echelons of the federal public service.

Pour faciliter la compréhension, un glossaire donne la définition des principaux termes scientifiques se rapportant à la parasitologie. FI LS PR QU SC

Principles and practices of new forestry : a guide for British Columbians

by Doug Hopwood ; commissioned by the Old Growth Strategy Working Group. Victoria : Ministry of Forests, 1991. viii, 95 p. : ill. Bibliogr. (Land management report ; no. 71) ISSN 0702-9861 ISBN 0-7726-1279-X. MICROLOG 91-05111 2 fiche

The term 'New Forestry' denotes an approach to forestry developed over the past decade in the US Pacific Northwest, west of the Cascades, which defines forest management with timber production as a by-product of its primary function: sustaining biological diversity and maintaining long-term ecosystem health. This report briefly covers the scientific and social background of New Forestry; describes some of the more significant management practices in place or planned in Washington and Oregon; broadly evaluates the extent to which these practices might be applicable to BC; and makes recommendations. Priorités de la recherche forestière au Canada : survol

à l'intention du Conseil canadien des ministres des forêts ; rédigé par le Conseil consultatif de la recherche forestière du Canada. Ottawa : Forêts Canada, 1991. 10, 9 p. *Bilingue (Forest research priorities in...)*. Réimprimé de *The Forestry Chronicle* : no 67, 1991. *CSI 22189.015*. ISBN 0-662-58294-2. MICROLOG 91-05422 1 fiche

En 1987, le Conseil consultatif de la recherche forestière du Canada (CCRFC) a proposé une enquête annuelle, à la grandeur du Canada, sur les priorités de la recherche et sur les questions en devenir dont les résultats seraient présentés au Conseil canadien des ministres des Forêts (CCMF). La proposition a été acceptée comme une façon d'améliorer le dialogue sur la recherche, de même que la coordination et l'application de cette dernière. Ce rapport, le deuxième, se fonde sur la contribution des groupes consultatifs des provinces et des territoires fournie au début de 1990 et donne un survol de la question. CA FO SC

Priority migratory bird habitats of Canada's Prairie Provinces

by B. Poston... et al. Edmonton : Environment Canada, Conservation and Protection, Canadian Wildlife Service, Western and Northern Region, Habitat Conservation Section, 1990. ix, 107 p. : ill., fold. maps. Bibliogr. *CSI 22210.204*. ISBN 0-662-17547-6. MICROLOG 91-00755 2 fiche

This report identifies the more important known migratory bird habitat areas and sites within the provinces of Alberta, Manitoba and Saskatchewan. Important habitats for the breeding, moulting and staging of migratory birds are defined. Each area or site is

ranked, on the basis of the most current and verifiable biological data, into categories of national, regional, or local importance. Areas and sites are further organized by ecological land units -- 'ecoregions' and 'habitat subregions' within a framework of broad geographic 'ecozones'. AL CA EV MS SC ST

Prises d'oiseaux migrateurs, au Canada, pendant la saison de chasse de 1989

par A.M. Legris et H. Lévesque. Ottawa : Service canadien de la faune, 1991. 43 p. (Cahiers de biologie ; no 194) *L'éd. anglaise (Migratory game birds...)* : 91-04963/1. *CSI 22210.004*. ISSN 0703-0967 ISBN 0-662-96851-4. MICROLOG 91-05900 1 fiche

Le questionnaire d'enquête sur les prises est réalisé chaque année pour évaluer le nombre d'oiseaux migrateurs abattus par les chasseurs au Canada. Ce document présente les résultats d'un questionnaire dans lequel on demande aux chasseurs de fournir des renseignements sur le nombre, l'endroit et la date de leurs voyages de chasse, ainsi que sur les oiseaux migrateurs considérés comme gibier qu'ils ont abattus. Le questionnaire a été posté au début de décembre 1989 à des personnes choisies sur la liste des acheteurs de permis de chasse de ces oiseaux pour l'année en cours et les années précédentes. De plus, on fait état du nombre de chasseurs échantillonnés qui ont répondu au QEP, on compare ces chiffres à ceux des années précédentes, on présente les résultats du questionnaire du QEP, et on illustre le nombre de chasseurs échantillonnés qui ont répondu à l'Enquête sur la composition des prises par espèce de 1989. The Problem of uncertainty : institutional alternatives and planning approaches

by N. Knight. Vancouver, B.C. : University of British Columbia, School of Community and Regional Planning, 1991. 21 p. - Bibliogr. (Discussion paper ; no. 24) ISSN 0828-2439
MICROLOG 91-02620 1 fiche (Available on fiche only)

Substantial perceptual differences of uncertainty in planning are not dealt with in technical analyses of uncertainty or risk, but are resolved through political and institutional processes. Compromise is desirable, but the success of various approaches may depend on why the perceptions vary in the first place. This paper examines theoretical perspectives on perceptions of uncertainty, and assesses the potential of various institutional alternatives and planning processes for coping with these differences.

Procedural review of the Agricultural Development Board

Collins Barrow Management Consultants Limited. Moncton, N.B. : The Company, 1990. 40, 47 p. Bilingual (Rapport sur les...)
MICROLOG 91-01432 1 fiche

The Agricultural Development Board (ADB), formerly known as the Farm Adjustment Board, was established April 1, 1986 to provide long term alternative financing to the agricultural sector, at interest rates that may be subsidized due to the low rate of return in the industry. Recently, the appropriateness of certain operating procedures of the Board, and in particular the recovery procedures where loans are in default, has come under scrutiny. An independent study was commissioned to compare the mandate and policies of the Board with those of other government and private

lending institutions; to determine whether the procedures in place for the repayment of outstanding loans are in accordance with the stated policies of the board, and whether an appropriate appeals process is in place; and to determine if the stated foreclosure policy and process is being followed by the Board. This report presents the results of that study, including the place of agriculture in the overall economy and recommendations.

Process development for plug flow acid hydrolysis and conversion of lignocellulosics to ethanol

Bio-Hol Developments. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1989. ix, 175 p. : ill, fold. ill. Bibliogr. CANMET contract: 51SZ.23216-6-6305. ISBN 0-662-17332-5
MICROLOG 91-01241 3 fiche

Investigation of a wood-to-ethanol process incorporating a Wenger single screw extruder for hemicellulose hydrolysis (prehydrolysis) and the SLR plug flow reactor for cellulose hydrolysis. The extruded material was then

passed through a washing system utilizing a plate and frame filter press. Mass balances were performed around the filter. Delignification experiments were performed to try to recover the lignin contained in the extruded wood before the hydrolysis stage. The washed extruded material was then passed through the SLR plug flow reactor and the hydrolyzed material was diluted and passed through either a decanter or centrifuge to recover the sugars produced. Mass balances were performed. The sugar streams recovered from both the prehydrolysis and hydrolysis process were fermented separately and together.

Production of ethanol, pulp fibre and animal feed from low grade hardwoods

Centre de recherche en sylviculture de l'Outaouais. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1991. x, 75 p. : ill. Bibliogr. *CANMET contract: 051SZ.23283-7-6034*. ISBN 0-662-18692-3 MICROLOG 91-04533 2 fiche

Hardwoods consist of relatively long wood fibres and very short vessels and ray (parenchyma) cells. Since these hardwood fibres are longer than the average length of softwood-groundwood fibres used for making newsprint, separation of the wood fibres from the short vessels would produce a very useful and valuable paper pulp. This report describes research results that led to a patent application for a novel dilute nitric acid pulping process. The process involves mild nitric acid pulping of hardwoods, in the presence of a phosphoric acid catalyst, at temperatures below 100°C at atmospheric pressure to produce a pulp that can be separated into long fibre fraction for sale as paper pulp, and a short fibre (fines) fraction that can be enzymatically hydrolysed to glucose and simultaneously fermented to produce ethanol.

Production of higher-value treatable SPF lumber

by P.I. Morris, F. Lam and J.F.G. McKay. Victoria : Forest Resource Development Agreement, 1990. v, 32 p. : ill., maps. (FRDA report ; 119) ISSN 0835-0752 ISBN 0-662-17935-8 MICROLOG 91-00335 1 fiche

Species which yield mainly heartwood lumber can be difficult to dry and to pressure treat with preservatives. White spruce and alpine fir are not listed in the U.S. commodity standards and thus most spruce-pine-fir (SPF) is excluded from the U.S. pressure treated wood markets. The development of a treatable SPF product is mainly dependant on improvements in incising technology. This report describes the results of experiments performed on western SPF using the commercial prototype of a novel incisor. The effects of the incisor were investigated on the strength of the treated lumber, on degrade during drying and on the treatability of SPF. The variations in treatability among various sources of western SPF and among the individual species were also evaluated. Finally, in a supplementary study, the effect on treatment quality of increasing the duration of pressure treatment and using higher pressures were determined using one source of SPF.

Nova Scotia. Dept. of Housing. Dartmouth, N.S. : The Dept., 1991. 25 p. CSI 51109.003. MICROLOG 91-06104 1 fiche

Homes provide physical and emotional shelter and are the largest single investment people make. The provincial government has established programs to improve the housing conditions of disadvantaged individuals and groups. This publication describes the main features of each program. AP PR SA

Le Programme canadien d'immigration -- Rév.

par M. Young. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. ii, 38 p. Bibliogr. (Etude générale ; BP-190F) L'éd. anglaise (*Canada's immigration program*) sur la même fiche. Révisé en septembre 1990. ISBN 0-660-93272-5 MICROLOG 91-06063 1 fiche

Depuis 1985, le gouvernement canadien s'est engagé à augmenter le niveau d'immigration de façon modérée et contrôlée pour mettre fin à la tendance à la baisse, créant ainsi le Programme canadien d'immigration. Cette étude vise à dresser un tableau de la situation permettant de mieux saisir certains des problèmes d'immigration. Elle fournit en outre des renseignements de base sur un domaine du droit, de la politique gouvernementale et de l'administration publique qui peut se révéler très complexe. En somme, elle contient des directives et des instructions très détaillées. CA EX PA

Programme d'autonomie des aîné(e)s : projets d'aujourd'hui, mieux-être de demain, 1988/89-1989/90

Ottawa : Santé et bien-être social Canada, 1990. 120 p. L'éd. anglaise (*Seniors Independence Program...*) : 91-01074/2. ISBN 0-662-96361-X MICROLOG 91-01073 2 fiche

Ce programme représente un projet de contributions financières majeures de Santé et Bien-être social Canada. En vigueur depuis le 1er avril 1988, il a pour but premier d'inciter les aînés à participer activement, entre eux et en collaboration avec d'autres, aux affaires qui touchent leur autonomie et leur qualité de vie. On trouve dans ce document une section consacrée à la description de six projets qui ont été choisis parce qu'ils illustrent bien les critères essentiels, notamment la participation active des aînés, ainsi qu'une certaine identification sur le plan communautaire. Viennent ensuite des résumés de projets regroupés par province et territoire. Outre les renseignements de base concernant les répondants de projets, les emplacements, les montants et la durée des projets, ces exposés traitent des grandes lignes, des buts principaux et des activités qui les constituent. Programmes provinciaux et territoriaux de remboursement des médicaments : résumé descriptif

par L.J. Anderson. Ottawa : Santé et bien-être social Canada, Direction générale de la protection de la santé, Direction des médicaments, 1990. iv, 26, iv, 26 p. *Bilingue* (Provincial and territorial drug...). MICROLOG 91-05590 1 fiche

Au Canada, les autorités de la santé provinciales et territoriales sont responsables de la gestion de leurs propres programmes de remboursement des médicaments. Ces programmes varient grandement dans le pays et même à l'intérieur d'une province ou d'un territoire à cause de l'application du remboursement des médicaments pour les différents groupes de bénéficiaires. Ce sommaire décrit les points saillants des divers programmes en vigueur afin de fournir une vue globale nationale qui peut être utilisée comme document de référence comparatif. Il donne des renseignements généraux sur les programmes; la clientèle et les avantages des programmes; les aspects financiers des programmes; et la distribution des médicaments.

Project on the population dynamics of the thick-billed murre *Uria lomvia* : interim report on studies at Coats Island

by A.J. Gaston. Edmonton : Canadian Wildlife Service, Headquarters, 1991. 131 p. : ill. Bibliogr. (Technical report series ; no. 134) ISSN 0831-6481 ISBN 0-662-18858-6 MICROLOG 91-05707 2 fiche

Thick-billed Murres from all the Canadian colonies, as well as those in west Greenland, winter in Newfoundland and Labrador waters, where large numbers are shot between September and March. Studies are being carried out to establish whether this hunting might be the cause of observed declines. Since 1984, a team has visited Coats Island every summer to band young thick-billed Murres before they leave the cliffs. Banded birds are then tracked to Newfoundland and bands are recovered from those shot. They are also tracked back in the colony where breeding is observed. This report is an interim statement of the project's achievements from 1987-90, focusing on the demographic study and aspects of breeding biology that have been monitored every year.

Project report : access to information guidelines

prepared for Ministry of Regional and Economic Development ; by John Fraser...et al. Vancouver, B.C. : Peat Marwick Stevenson & Kellogg, 1990. 42 p. Bibliogr. MICROLOG 91-03616 1 fiche

The Ministry of Regional and Economic Development provides financial assistance to private sector projects through a variety of programs. Information about these loans is sought by the media and by other interested parties for a variety of reasons. The Ministry aims to balance the public's right to know and the desire to be an 'open' government with the need to protect the confidential nature of companies' proprietary information. It has therefore assembled a team of independent advisors from the legal, academic, accounting and management consulting professions, to recommend what types of information pertaining to each financial assistance package should be disclosed. This report is a summary of the findings and recommendations of the team.

Projecting the regional demo-economic impacts of natural resource mega-projects : a comparison of two techniques

by N. Knight. Vancouver, B.C. : University of British Columbia, School of Community and Regional Planning, 1991. iii, 62 p. Bibliogr. (Discussion paper ; no. 27) ISSN 0828-2412
MICROLOG 91-05001 1 fiche (Available on fiche only)

A demo-economic analysis is the component of a comprehensive environmental impact assessment that addresses a project's impact on regional economic growth. This study assesses the relative accuracy of economic base analysis and income expenditure analysis in projecting the demo-economic impacts of a natural resource mega-project. The research results address the lack of empirically-based assessments of these techniques. In addition, it suggests a number of simple and effective improvements to the techniques.

A Projective method for bipartite networks and application to the matrix estimation and transportation problems

by O. Drissi-Kaitouni. Montreal : Université de Montréal, Centre de recherche sur les transports, 1991. 22 p. Bibliogr. (Publication ; no. 766)
MICROLOG 91-04083 1 fiche

This paper deals with bipartite network problems where some objective function is to be optimized under flow conservation constraints at nodes, and, eventually, bounds on the link flows. Such problems are also interpreted as matrix optimization problems. The paper first constructs a linear complexity

projector onto the feasible space defined by the flow conservation constraints, then develops a variant of the scaled conjugate gradient method, where the conjugate directions are all forced to lie in the feasible space. Projections that are required at each iteration of the projected scaled conjugate gradient algorithm are performed by the efficient projector developed earlier. Numerical results support superiority of this approach against classical conjugate gradient and LDL decomposition techniques for solving the problem.

Projet de recherche sur l'habitat du ruisseau Catamaran : description et champs d'étude général

par R.A. Cunjak, D. Caissie et N. El-Jabi. Moncton, N.-B. : Ministère des pêches et océans, Région du golfe, Direction des sciences, Division de la mise en valeur et de l'habitat du poisson, 1990. vi, 15, vi, 14 p. : cartes géogr. Bibliogr. (Rapport technique canadien des sciences halieutiques et aquatiques ; no 1751) Bilingual (The Catamaran Brook...). ISSN 0706-6570
MICROLOG 91-00761 1 fiche

En 1986, le Ministère des Pêches et Océans a introduit une politique nationale de gestion de l'habitat du poisson, dont les objectifs sont de protéger et d'améliorer l'habitat du poisson. Pour donner suite à ces objectifs, le MPO de la Région du golfe, à Moncton, a adopté une approche de recherche à long terme pour étudier l'habitat du poisson et la productivité du cours d'eau. En raison de la complexité des écosystèmes aquatiques, une approche de recherche multidisciplinaire fut adoptée pour étudier l'habitat du poisson, basée sur un concept de bassin versant 'expérimental'. Ce rapport présente le projet de recherche et les objectifs d'étude, fournit des informations sur la description du bassin, les organismes participants et leur rôle, le champs d'étude général et présente également quelques données physiques, chimiques et biologiques préliminaires pertinentes à cette étude.

Prolongation du programme de maîtrise des sciences et techniques du tourisme à l'Institut de tourisme et d'hôtellerie du Québec

avis à la Ministre de l'enseignement supérieur et de la science. Sainte-Foy, Québec : Conseil des universités, 1991. 1, 6 p. (Avis ; no 90.6) ISSN 0709-3985 ISBN 2-550-21606-7
MICROLOG 91-02981 1 fiche

Au cours du mois de juin 1986, l'Institut de tourisme et d'hôtellerie du Québec a signé une entente avec l'Université de Toulouse-Le Mirail pour offrir, en association, un programme de maîtrise professionnelle en hôtellerie, tourisme et thermalisme. Ce programme a pour but de former des gestionnaires de haut niveau, capables d'assumer les fonctions et les tâches inhérentes à la planification, à l'administration et au développement de l'industrie hôtelière et touristique. Ce document porte sur l'identification du programme, l'état de la question, et, les motifs de la recommandation.

La Promotion de la santé en milieu de travail : échantillonnage de programmes et d'initiatives en cours dans les entreprises

Ottawa : Santé et bien-être social Canada, 1991. v, 128 p. L'éd. anglaise (*Health promotion in the...*) : 91-04779/2.
MICROLOG 91-04780 2 fiche

Au début de 1990, Santé et Bien-être social Canada a décidé de communiquer avec un certain nombre d'entreprises canadiennes dans le but de recueillir de l'information concernant le type de programmes de promotion de la santé qu'elles offrent à leurs employés. On retrouve donc dans ce document le profil de plusieurs entreprises. Ces profils ont été établis à partir des renseignements recueillis auprès des entreprises. On y trouve des programmes à différents stades d'élaboration, depuis les activités de promotion de la santé en cours de conception jusqu'aux mécanismes très élaborés. Le document donne également une vue d'ensemble de l'état actuel des programmes de promotion de la santé au sein d'un éventail d'entreprises canadiennes, et sert de guide pour les sociétés désireuses de mettre sur pied un tel programme.

Propane pool-fire testing of half-scale road cask

by D. Taralis and G. Morandin. Toronto : Ontario Hydro, Research Division, 1990. iii, 41 p. : ill. Bibliogr. (Report ; no. 90-202-K)
MICROLOG 91-05280 1 fiche

This study deals with the propane fire testing of a half-scale road cask for transportation of 10-year cooled nuclear fuel. The study involves carrying out one fire test within the Atomic Energy Control Board's requirements (0.5 hour at 800C flame temperature on full

scale cask). For the half-scale model, the fire test duration was determined according to scaling laws described earlier. The study determined the temperature range occurring at the seal locations; obtained flame and model temperatures for comparison with previous kerosene fire test results; and determined if any significant advantages (such as very low pollution levels) exist in using propane instead of kerosene.

Properties of unattached polonium-218 in the propylene-nitrogen gas system

by C.R. Phillips. Ottawa : Atomic Energy Control Board, 1988. 22 p. : ill. Bibliogr. (Research report ; INFO-0364)
MICROLOG 91-03305 1 fiche

The first progeny in the radon decay chain is polonium-218, which is formed from the alpha-decay of radon-222. This study determined the fundamental electrostatic and diffusion properties of unattached polonium-218 in the presence of trace propylene gas, and investigated the mechanisms of neutralization under different conditions. Important conditions include those involving hydrocarbon gases at low concentrations, since hydrocarbons are commonly present in polluted air. Propylene was selected as the hydrocarbon gas to be studied because of its relatively low ionization potential of 9.73 eV.

A Proposal for a revised federal pest management regulatory system : preliminary report

Federal Pesticide Registration Review Team (Canada). Ottawa : The Team, 1990. 86, 92 p. Bibliogr. Bilingual (*Système réglementaire...*).
MICROLOG 91-01105 3 fiche

This preliminary report contains a proposal for a revised federal pest management regulatory system. The report was developed by an independent multi-stakeholder team assembled by the Minister of Agriculture to recommend improvements to the existing federal pesticide regulatory system. It formed the basis for a series of public consultation meetings held in the fall of 1990, after which the review team submitted its final report and recommendations to the Minister in December 1990. This report covers the background to the establishment of the review team; describes the public meetings and public participation; and discusses the proposed regulatory system, including its administration, the application of the new regulations, the evaluations and decisions made, the change in status from the previous regulations, monitoring and enforcement, export policy, and price discipline mechanisms. A minority report from the Canadian Labour Congress is included.

Proposal for scientific drilling on the Steen River Structure, northwestern Alberta

by J. Wilson...et al. Edmonton : Alberta Research Council, 1989. 20 p. : ill. Bibliogr. (Open file report ; no. 1989-04)
MICROLOG 91-02470 1 fiche

The Steen River Structure (SRS) is a world class example of a complex meteorite impact structure. Its burial by thin Cretaceous and recent sediments has preserved the structure from the modifying effects of erosion. The entire melt sheet is probably preserved. There is only one other known example of a completely preserved melt sheet, at Boltysh in the Ukraine, recently studied by Canada and the USSR. In addition to the purely scientific benefits to a study of the SRS, there is a growing awareness amongst the international exploration community that buried impact

structures may provide good structural traps for hydrocarbons. This proposal describes the SRS, its location and characteristics; its hydrocarbon potential; the objectives of the proposed study; the workplan; members of the research team; and a proposed budget.

Proposed reference methods for polychlorinated dibenzo-p-dioxins and polychlorinated dibenzofurans

by B.K. Afghan. Burlington, Ont. : Canada

Centre for Inland Waters, National Water Research Institute, 1989. 69 p. Bibliogr. (NWRI contribution : 89-128)
MICROLOG 91-05682 1 fiche

Analytical methodology for polychlorinated dioxins and furans (PCDDs and PCDFs) in pulp and paper related matrices is not standardized. This paper consolidates the work done by many researchers in Canada, US and Europe over the past 10-12 years to develop reliable multi-media methodology at ultra-trace levels. The method presented here uses matrix-specific extraction and cleanup procedures for pulp and paper effluents and receiving waters and can easily be expanded to cover other pulp and paper related matrices and environmental samples. Analyte-specific quantitative analysis utilizes high-resolution capillary column gas chromatography - high resolution mass spectrometry technique for the determination of PCDD and PCDF isomers, with estimated detection limits of 10 Pg/L for 2,3,7,8-TCDD in reagent water.

A Proposed system for identifying and documenting technology transfer opportunities within CANMET laboratories

by D.J. Doyle. Kanata, Ont. : Doyletech Corporation, 1990. 35 p. CANMET contract: 99181-01-SQ.
MICROLOG 91-00747 1 fiche

There is a well recognized need for improved communications between the Canadian industrial-investment community and government laboratories, particularly in technology transfer. With fiscal restraints, there is an increased emphasis on the recovery of at least some of the costs associated with the delivery of services to Canadian industry. Communication

between the CANMET laboratories and the industrial-investment community presents special challenges because of the diversity of technological activities, services and clients at CANMET. This report recommends that CANMET implement a system of documenting its technology transfer opportunities in a manner that is understandable to both communities. The report describes the concept of the Business Opportunity Document (BOD), its format, and how the BOD concept can be applied to 4 specific CANMET business opportunities (ferric chloride, hyceram, jet reactor and numerical modelling). A suggestion for an inventory system is also given, along with recommendations.

La Protection sélective des travailleuses canadiennes

Ottawa : Travail Canada, Bureau de la main-d'œuvre féminine, 1989. v, 89 p. Bibliogr. L'éd. anglaise (*The Selective protection...*) : 91-02013/1.
MICROLOG 91-02012 1 fiche

Les premières mesures spéciales destinées à protéger les femmes en tant que groupe ont été adoptées au Canada au cours du dix-neuvième siècle. Les raisons ayant motivé l'adoption de ces mesures et de lois subséquentes visant à protéger la main-d'œuvre féminine étaient variées et complexes: la connaissance des efforts de réforme faits en Angleterre, les efforts des organisations de travailleurs pour éliminer la concurrence des femmes, etc. Ce rapport passe en revue la législation destinée à protéger les travailleuses canadiennes. Il examine les fondements historiques, l'évolution ainsi que les tendances actuelles qui influent sur cette législation. Il analyse également les approches des gouvernements, des employeurs, des syndicats et des organisations de femmes au cours du siècle passé, et le débat concernant l'incidence des mesures protectrices sur la situation des femmes au sein de la population active.

Protection strategy for the habitats of sea mammals

by G.C. Ray, J.A. Dobbin and R.V. Salm. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1990. 10 p. : maps. (Canadian translation of fisheries and aquatic sciences ; no. 5508) Originally published in Russian. ISSN 0704-3716
MICROLOG 91-00995 1 fiche

Protection of endangered species is usually associated with the isolation of the area inhabited by a given species. While the term

'critical habitat' is usually applied to the last stronghold of a rare or endangered species, the term is not extensive enough to include the migratory sea mammals or those animals which have not yet reached the critical level of abundance. This paper describes a system for identifying the areas where the individuals of a given population forage, breed and raise their young, and which areas are vital to each of these functions. The paper concentrates on the Pacific walrus, identifying components of the system through their activities and needs.

Protein and energy requirements for feedlot cattle : final report

by J. McKinnon and R.D.H. Cohen. Regina : Saskatchewan Agriculture Development Fund, 1990. v, 28 p. : ill. ISSN 0829-9455
MICROLOG 91-01881 1 fiche

A study of medium and large frame feedlot cattle in 1989 concluded that large frame cattle required more dietary crude protein than medium framed cattle. This further study was undertaken to define the energy and crude protein requirements of large frame feeder steers to optimize feedlot performance, carcass composition, meat quality and profit potential; and to evaluate the role that bypass protein plays in supplying the total protein requirements of rapidly growing large-frame steer calves. A series of feeding trials were conducted using 500 large frame calves sorted into two groups, and assigned either directly to the feedlot following weaning or allowed to grow at a reduced rate of gain over the winter and then placed in the feedlot. Data collection included biweekly weight gain and pen feed consumption, frame size, average daily gain, days to market and feed efficiency. At the completion of the trial, carcasses were evaluated for warm weight, fat cover, ribeye area, marbling score, dressing percentage and cutability.

The Public Accounts are published in three volumes: volume 1 contains financial statements of the gouvernement du Québec; volume 2 presents details of revenue, appropriations and expenditure by category and subcategory; and volume 3 contains financial statements of the special funds and revolving funds. Information is included for operating and investment activities, as well as a breakdown of the retirement plans account. Financing operations transactions show how the government has financed all its transactions by showing its requirements and sources of financing. Complementary schedules provide details of items in the statement of assets and liabilities.

Public review of the Esso, Chevron, et al., Isserk I-15 Drilling Program

Inuvik, NWT : Environmental Impact Review Board, 1990. 60 p.
MICROLOG 91-01697 1 fiche

The Inuvialuit Final Agreement of 1984 settled the land claim of the Inuvialuit in the Western Arctic Region of Canada. This Agreement is the source of the Board's jurisdiction to review the Esso Chevron et al Isserk I-15 drilling program, due to concerns about the thoroughness of contingency planning, the effectiveness of oil spill countermeasures, and the conflict of opinion between the Dept. of Indian Affairs and Northern Development and the Canada Oil and Gas Lands Administration regarding the effectiveness and applicability of the long-standing policy on same season relief well capability. This report describes the procedures of the public review; the Board's analysis and decision, including the issues of worst case scenario, relief well capability, contingency planning, wildlife compensation and the routine operations of demobilization of the drilling station and ship tracks in Tuk Harbour. The decision includes both recommendations and conditions.

Qualifying an impulse digitizer for measurements in HV impulse tests

by J. Kuffel. Toronto : Ontario Hydro, Research Division, 1990. 10 p. : ill. Bibliogr. (Report ; no. 90-149-K)
MICROLOG 91-00795 1 fiche

Over the past decade, considerable work has been performed on the application of digitizers to measurement in high voltage (HV) impulse tests and many laboratories are now using digitizers to record HV tests. The present

standards on HV measurements make no explicit provision for the use of digital recorders, giving urgency to the need to provide the necessary characteristics, calibrations and tests required to qualify a digitizer for recording HV tests. This paper shows how the main tests described in the proposed standard can be applied towards qualifying an impulse digitizer for HV impulse measurements. Experimental results from the application of these techniques to different digitizers are presented. Previous low frequency measurements have indicated that high frequencies can be a problem and this paper reports some measurements at high frequencies. The consequences of these measurements for electromagnetic compatibility are discussed.

Quality of western Canadian wheat, 1990

by K.H. Tipples. Winnipeg : Canadian Grain Commission, Grain Research Laboratory, 1990. 32 p. : ill. (Crop bulletin ; no. 184) Prepared for the meeting of the Committee on Western Grain Standards. CSI 22192.003. ISSN 0829-8718
MICROLOG 91-00706 1 fiche

This bulletin presents detailed information on the quality of the 1990 crop of five classes of Canadian wheat (Canada Western Red Spring, Canada Western Amber Durum, Canada Western Red Winter, Canada Western Utility, Canada Western Soft White Spring) offered on the world market. Information on each wheat includes protein content, milling and baking quality data, and GRL pilot mill data. A methodology and an overview of the year's conditions and production is also included.

Quantifying pest-caused forest depletion using geographic information systems and database technologies

by J.M. Power and S.P. D'Eon. Chalk River, Ont. : Forestry Canada, Petawawa National Forestry Institute, 1991. iv, 17 p. : maps. Bibliogr. (Information report ; PI-X-105) ISSN 0706-1854 ISBN 0-662-18919-1
MICROLOG 91-06217 1 fiche

In order to understand the dynamics of forests at large geographic scales, forestry agencies are quantifying influences on the forest capital. The forest insect and disease survey produces periodic data on forest depletion by insects and diseases. The system developed to support depletion estimates uses a geographic information system for processing of infestation

and forest inventory maps, and a relational database management system for processing of map attributes, depletion factors, and statistics. This report describes the data sources, processing techniques, and products of the pest depletion estimation system; presents examples using results from spruce budworm depletion in Manitoba; and summarizes the implications of using the system for national estimates.

Quantitation of XPS intensity ratios for supported catalysts : final report

by A. Sayari and S. Kaliaguine. Quebec : Université Laval, Département de génie chimique, 1990. x, 114 p. : ill. Bibliogr. CANMET contract: 23440-8-9176-01-SS. MICROLOG 91-06110 2 fiche

This report deals with the use of XPS intensity data to quantitative determination of mean particle sizes (and dispersion) of active materials in supported catalysts. The model developed allowed for surface segregation of supported materials and the determination of bimodal distributions. A general approach to solve the mathematical equations is also proposed. This method uses, in addition to the XPS intensity ratios, the BET and the external surface areas of catalysts under both the as-synthesized and the ground forms. Method developments for measurements of external surface areas for zeolite-based catalysts were carried out and experimental procedures for the pore plugging technique were determined.

Quantitative evaluation of the effectiveness of erosion control materials

by J.J. Armstrong and G.F. Wall. Toronto : Ministry of Transportation, Research and Development Branch, 1990. vi, 18 p. : ill. Bibliogr. MICROLOG 91-02928 1 fiche

This study was initiated to develop qualitative methods of assessing the effectiveness of temporary erosion control products used in highway construction. A field methodology was developed employing rainfall simulation techniques to measure soil and runoff losses on highway construction slopes prepared to design specifications. The research sought to develop indexes of both the factors controlling erosion and the erosion control capability of each erosion control product on the market to facilitate highway construction specifications for rights-of-way.

Quaternary stratigraphy of the Edmonton map area, NTS 83H

by L.D. Andriashek. Edmonton : Alberta Research Council, Terrain Sciences Dept., Natural Resources Division, 1988. iii, 29 p. : fold. maps. (Open file report ; no. 1988-04) MICROLOG 91-02478 2 fiche

Summary in map form of the results of a regional stratigraphic study of the Quaternary sequence in the Edmonton map area to define the 3-dimensional distribution of the glacial and non-glacial lithologic units to assist in the evaluation of natural resources in the Edmonton region. The study encompassed an area of 5,800 sq miles (9,200 sq km). Field investigations consisted of drilling 84 exploratory dry-auger testholes during the summers of 1978-81. Some outcrop sections were examined, mainly in exposures along the North Saskatchewan River and within man-made excavations such as aggregate quarries. Other data such as previous geologic reports in the area, water-well drill logs, Alberta Environment exploration drill logs, and oil company structure testhole logs were used to supplement the data

collected in the study.

Quebec : a French colonial town in America, 1660 to 1690

by R. Chénier. Ottawa : Environment Canada, Parks Service, National Historic Sites, 1991. 279 p. : ill., maps. Bibliogr. (Studies in archaeology, architecture and history) French ed. (Québec : ville coloniale française...) : 91-04920/4. ISSN 0821-1027 ISBN 0-660-13630-9. MICROLOG 91-04918 3 fiche

The period between 1660 and 1690 was of paramount importance in Quebec's history; it was marked by profound administrative changes, an influx of immigrants, a boom in housing construction, and an attempt at labour self-sufficiency. This paper develops a definition of the town as it existed in New France and examines the policies and people that governed it. It offers a glimpse of its inhabitants, their houses, and the day to day environment in which they lived and worked. It also examines the labour force.

Québec : ville coloniale française en Amérique, 1660 à 1690

par R. Chénier. Ottawa : Environnement Canada, Service des parcs, Lieux historiques nationaux, 1991. 293 p. : ill., cartes géogr. Bibliogr. (Études en archéologie, architecture et histoire) L'édition anglaise (Quebec : a French colonial town in America...) : 91-04918/3. ISSN 0821-1035 ISBN 0-660-92996-1. MICROLOG 91-04920 4 fiche

Entre 1660 et 1690, Québec traverse une période capitale de son histoire, période marquée par des changements administratifs profonds, un influx d'immigrants, un essor de la construction domiciliaire et une recherche d'auto-suffisance en main-d'œuvre. Retracer l'histoire de cette période permet de définir ce qu'est une ville en Nouvelle-France et de connaître les politiques et les gens qui la régissent; c'est aussi l'occasion de se familiariser avec ses habitants, leurs maisons, le milieu ambiant où ils vivent et dans lequel ils travaillent et celle de scruter le monde ouvrier. C'est donc sur quoi porte ce document.

Question period : strategies, procedures, and preparation or Alberta's legislature grows up

by L. Geran. Edmonton : Legislative Assembly, 1990. 33 p. Bibliogr.
MICROLOG 91-01919 1 fiche

For most Albertans, oral question period is the most visible part of the legislative day. This paper outlines the rules, both formal and informal, that govern question period, and

describes the preparation of the questions and answers. It also looks at what each of the three political parties are asking, and compares the Alberta and Ontario legislatures in this respect, and analyses the reaction of the audience. Finally, it assesses the question period as 'the most significant proceeding' in a legislature.

Radionavigation/location requirements for surface users in Canada : present and future

submitted by J. Rostenne, and David Deziel ; for Transportation Development Centre, Policy and Coordination Group, Transport Canada. Ottawa : Thompson-Hickling Aviation Inc., 1989. xiv, 152 p. : ill. MICROLOG 91-03663 2 fiche

This report presents a description of surface users' requirements for radionavigation and an estimate of present uses of radionavigation/location equipment by surface users as well as a forecast of use by 2000. Information was gathered through documentation review and expert interviews, and interviews with current and potential ground surface users. Alternate radionavigation systems evolution scenarios were proposed. Surface users' needs were developed and typified, including public service, goods movement, private, military, and other surface users. User needs were expressed as functions required, coverage, accuracy, reliability, availability, and update rate. Present-use estimates were made for number and types of devices per sector; forecasts are given as percentage of fleet or other relevant criteria, type of device and trends from 1988-2000.

The Rafferty-Alameda Board of Inquiry : final report

Rafferty-Alameda Board of Inquiry (Sask.). Regina : The Board, 1988. 190 p. Bibliogr. MICROLOG 91-02556 3 fiche

The Souris River Basin in southeastern Saskatchewan has been considered a potential area for water control facilities for decades. The area is plagued with drought, yet has a history of destructive flooding that has made its impact felt as far south as Minot, North Dakota. Numerous studies have been conducted over the years, but it was not until the mid-1980's that a number of coincident events resulted in the birth of the Rafferty-Alameda project. The Board was appointed to conduct informal public meetings to allow the public a reasonable opportunity to present their views on the proposed construction of the Dams. This document contains the Board's report of its findings, and its recommendations, together with a transcript of the public meetings.

Railway safety -- Rev.

by J.-D. Bélanger. Ottawa : Library of Parliament, Research Branch, 1990. 16 p. Bibliogr. (Current issue review ; 87-9E) French ed. (*La Sécurité ferroviaire*) on the same fiche. ISBN 0-660-13700-3. MICROLOG 91-02134 1 fiche

This current issues paper principally examines train derailments and collisions. Topics include: statistical trends, accident causes, the Foisy report (Hinton, Alta. collision), implementation of the Foisy report recommendations, and parliamentary action. The paper concludes with a chronology and bibliography.
CA CI SC TR

by J.-D. Bélanger and C. Stanziani. Ottawa : Library of Parliament, Research Branch, 1990. 17 p. Bibliogr. (Current issue review ; 87-9E) French ed. (*La Sécurité ferroviaire*) on the same fiche. Revised September 7 1990. ISBN 0-660-13882-4. MICROLOG 91-04817 1 fiche

Train accidents fall into three categories: level-crossing accidents, derailment, and collisions. Discussion has concentrated on train derailments and collisions, and has raised such railway safety issues as obsolete technology, staff cutbacks, outdated regulation, and failure to observe safety rules. Moreover, while derailments and collisions cause fewer deaths and injuries per year than level-crossing accidents, it must be noted that the 1979 Mississauga derailment required the evacuation of 250,000 people. Accordingly, this paper examines these two types of accident.

Railway signal enforcement system, phase I development : vol. 1, main report

by John E. Warner, Robert W. Tiernay ; for Transportation Development Centre, Policy and coordination Group, Transport Canada. Brampton, Ont. : Signalcom Canada Corporation, 1990. xii, 20 p. : ill. MICROLOG 91-02519 1 fiche

The Hinton, Alberta collision of February 1986 prompted investigation of means to enforce compliance of train movement authorities, focusing on the use of advanced train control systems (ATCS) technology. This report describes a system which merges an ATCS and current wayside signal technologies using data radio. This system requires a wayside interface to the existing signal towers to monitor signal aspects, a communications system to enable approaching locomotives to access this information, and onboard equipment to allow the locomotive to determine its position, evaluate its status in conforming to the signals and apply the train brakes if necessary. The wayside component of the system was fully developed and tested, and the onboard hardware was developed. However, the onboard software was not completed and the onboard hardware was not fully tested. The present status of the hardware and software is fully documented to permit ongoing development.

Raising the profile of cultural heritage in Western Region, Canadian Parks Service : report

Canadian Parks Service. Cultural Heritage Task Force. S.l. : The Task Force, 1990. vii, 87 p. : ill.
MICROLOG 91-03110 2 fiche

Through interviews and a brief review of the literature, the Task Force has identified a number of trends and challenges which must be considered when designing the future position of the CPS in cultural resource management. The most significant of these are: increased concern for the environment; increased demand for cultural, non-consumptive tourism; increased demand for cooperative planning, marketing and development of cultural heritage; increasing interest in a regional or 'eco-musée' approach for planning, marketing and development of cultural heritage in the broad sense; and increased demand by Native groups for involvement in commemoration and interpretation of their heritage. This report outlines how the Task Force believes the region can position itself to meet these challenges.

Range plan development : a practical guide to planning for management and improvement of Saskatchewan rangeland

by Z.M. Abouguendia. Regina : Saskatchewan Agriculture Development Fund, 1990. iv, 52 p. : ill. Bibliogr. *On cover: New Pasture and Grazing Technologies Project.*
MICROLOG 91-02278 1 fiche

Rangeland may be defined as uncultivated land capable of providing grazing to wildlife and/or domestic animals. Range management is the practice of manipulating the biological and physical components of the range for the purpose of obtaining maximum production of livestock products while maintaining the rangeland in a condition that assures this level of production is sustained. This booklet describes a planning procedure for rangelands that are used primarily for grazing by livestock and wildlife. It covers range sites, stocking rates, range condition, rangeland monitoring, grazing distribution, and coping with drought.

Rapport annuel national sur les drogues, 1989-90 et indicateurs de tendances d'ici 1992

Ottawa : GRC, Direction de la police des drogues, 1991. vii, 78, vii, 75 p. : ill., cartes géogr. *Bilingue* (National drug intelligence estimate...).
CSI 22279.002. ISSN 0820-6228
ISBN 0-662-57750-7
MICROLOG 91-06751 2 fiche

Ce rapport a pour objet de présenter une analyse détaillée de l'origine, de la quantité, des voies d'acheminement, des modes de transports et des méthodes de contrebande des drogues du marché illicite canadien, de même que des opérations financières associées à cette activité. Il vise principalement à coordonner le rassemblement, la collation, l'analyse et la diffusion des renseignements nationaux et étrangers sur les drogues pouvant intéresser les législateurs, ainsi que les organismes et les personnes chargés de la lutte anti-drogue. Le rapport débute par le sommaire des activités de 1989-90 et présente les tendances d'ici 1992. Il analyse ensuite chacun des grands groupes de drogues: l'héroïne, la cocaïne, les drogues chimiques et le cannabis. Finalement, le rapport fournit la liste des principales saisies de drogues au Canada ou en route vers le Canada en 1989.

Rapport de 1990 sur le transport à distance des polluants atmosphériques et sur les dépôts acides, partie 1 : résumé

Comité fédéral-provincial de coordination de la recherche et de la surveillance (Canada). Ottawa : le Comité, 1990. viii, 51 p. : ill., cartes géogr. *L'éd. anglaise (The 1990 Canadian...summary)* : 91-04766/1. Titre sur la couv.: *Rapport canadien d'évaluation de 1990 sur le transport à distance des polluants atmosphériques et sur les dépôts acides, partie 1 : résumé.*

MICROLOG 91-04767 1 fiche

Le rapport canadien sur l'évaluation du transport à distance des polluants atmosphériques et des dépôts acides se divise en huit volumes dont voici la partie 1, le résumé. Parmi les points étudiés, on retrouve: les mesures prises pour maîtriser les émissions reliées au TGDPA au Canada, les niveaux anciens et actuels des émissions d'anhydride sulfureux, d'oxydes d'azote et de composés organiques volatiles; la réaction de l'environnement suite aux polluants véhiculés par l'air; les changements provenant de l'application intégrale des programmes de réduction des émissions d'anhydride sulfureux aux États-Unis et au Canada; et, les orientations futures de la recherche sur le TGDPA et les activités de la lutte contre la pollution.

CA EV SC

Rapport de 1990 sur le transport à distance des polluants atmosphériques et sur les dépôts acides, partie 2 : émissions et mesures d'antipollution

Comité fédéral-provincial de coordination de la recherche et de la surveillance (Canada). Ottawa : le Comité, 1990. v, 81 p. : ill. Bibliogr. *L'éd. anglaise (The 1990 Canadian...controls)* : 91-04762/1. Titre sur la couv.: *Rapport canadien d'évaluation de 1990 sur le transport à distance des polluants atmosphériques et sur les dépôts acides, partie 2 : émissions et mesures d'antipollution.*

MICROLOG 91-04763 1 fiche

Au Canada, les préoccupations relatives au transport de polluants atmosphériques sur de grandes distances se sont concentrées sur les dommages causés par les pluies acides et par l'ozone au niveau du sol. Abordant le sujet des émissions et mesures d'antipollution, la partie 2 de cette série se penche particulièrement sur les émissions canadiennes de 1970 à 1985; les mesures canadiennes en matière d'environnement et l'aspect judiciaire; le programme canadien de lutte contre le SO₂; le programme canadien de lutte contre NO et les COV; les émissions et les mesures d'antipollution pour la décennie 1990; et, les orientations futures.

CA EV SC

Rapport de 1990 sur le transport à distance des polluants atmosphériques et sur les dépôts acides, partie 3 : sciences atmosphériques

Comité fédéral-provincial de coordination de la recherche et de la surveillance (Canada). Ottawa : le Comité, 1991. xvii, 395 p. : ill., cartes géogr. Bibliogr. *L'éd. anglaise (The 1990 Canadian...sciences)* : 91-04756/4. Titre

sur la couv.: *Rapport canadien d'évaluation de 1990 sur le transport à distance des polluants atmosphériques et sur les dépôts acides, partie 3 : sciences atmosphériques.* MICROLOG 91-04755 5 fiche

Dans ce rapport, on examine l'état actuel des connaissances acquises sur la capacité des modèles disponibles à prévoir les rapports source-récepteur. Présentant la partie 3 sur le transport à distance des polluants atmosphériques et sur les dépôts acides, ce document se penche particulièrement sur les points suivants: l'aperçu des rapports source-récepteur des acides et de l'ozone par l'examen des combinaisons de profils, des tendances et des données connexes; et, les relations entre la source et le récepteur établies à l'aide des modèles numériques.

CA EV SC

Rapport de 1990 sur le transport à distance des polluants atmosphériques et sur les dépôts acides, partie 4 : effets sur les milieux aquatiques

Comité fédéral-provincial de coordination de la recherche et de la surveillance (Canada). Ottawa : le Comité, 1990. iv, 183 p. : ill., cartes géogr. Bibliogr. *L'éd. anglaise (The 1990 Canadian...aquatic effects)* : 91-04760/2. Titre sur la couv.: *Rapport canadien d'évaluation de 1990 sur le transport à distance des polluants atmosphériques et sur les dépôts acides, partie 4 : effets sur les milieux aquatiques.*

MICROLOG 91-04761 2 fiche

Ce rapport, représentant la partie 4 de la série sur le transport à distance des polluants atmosphériques, met l'accent sur l'évaluation de l'état présent des milieux aquatiques, sur les charges critiques et sur les prévisions tirées des scénarios. Il a été divisé en trois sections distinctes, soit les effets biologiques associés à la toxicité générée suite à l'acidification de l'écosystème et les effets biologiques associés à la contamination d'organismes aquatiques par certains métaux.

CA EV SC

Rapport de 1990 sur le transport à distance des polluants atmosphériques et sur les dépôts acides, partie 5 : effets sur les milieux terrestres

Comité fédéral-provincial de coordination de la recherche et de la surveillance; rédigé par R.G. Pearson et K.E. Percy. Ottawa : le Comité, 1990. v, 117 p. : ill., cartes géogr. Bibliogr. *L'éd. anglaise (The 1990 Canadian...terrestrial effects)* : 91-04758/2. Titre sur la couv.: *Rapport canadien d'évaluation de 1990 sur le transport à distance des polluants atmosphériques et sur les dépôts acides, partie 5 : effets sur les milieux terrestres.*

MICROLOG 91-04759 2 fiche

Les auteurs de ce rapport ont voulu faire la rétrospective des travaux scientifiques des quatre dernières années afin d'établir un fondement pour la prise de décisions relatives à la recherche, à la surveillance et aux stratégies de réduction des dépôts acides et du TADPA et de faciliter l'évaluation des programmes canadiens et internationaux d'intervention. Dans la partie 5, six questions ont été posées aux fins de l'évaluation des effets sur les milieux terrestres du transport à distance des polluants atmosphériques, et ce document examine chacune d'elles.

CA EV SC

Rapport de 1990 sur le transport à distance des polluants atmosphériques et sur les dépôts acides, partie 6 : effets sur la santé humaine, effets directs et indirects

Comité fédéral-provincial de coordination de la

recherche et de la surveillance (Canada).
Ottawa : le Comité ; Santé et bien-être social
Canada, Direction de l'hygiène du milieu,
1990. iii, 34 p. Bibliogr. L'éd. anglaise
(Assessment of the state...health effects) :
91-04765/1. Titre sur la couv.: Rapport canadien
d'évaluation de 1990 sur le transport à
distance des polluants atmosphériques et sur
les dépôts acides, partie 6 : effets sur la
santé humaine.
MICROLOG 91-04764 1 fiche

Il existe une vaste gamme de réactions du
corps humain associées à l'exposition de la
pollution atmosphérique, allant d'effets immédiats,
comme des cas d'aggravation de l'asthme et
d'admission à l'hôpital, à des réponses à long
terme comme les maladies pulmonaires
chroniques telle que la bronchite. Présentant
la partie 6 d'une série sur le transport à
distance des polluants atmosphériques et sur
les dépôts acides, ce document examine les
effets directs du TADPA sur la santé et les
effets indirects des dépôts acides sur la santé.
CA EV SC

Rapport de 1990 sur le transport à distance des polluants atmosphériques et sur les dépôts acides, partie 7 : études socio- économiques

Ottawa : Comité fédéral-provincial de
coordination de la recherche et de la
surveillance, 1990. viii, 72 p. Bibliogr. L'éd.
anglaise (The 1990 Canadian long-range...) :
91-04851/1. Titre de la couv.: Rapport
canadien d'évaluation de 1990 sur le
transport à distance des polluants
atmosphériques et sur les dépôts acides,
partie 7 : études socio-économiques.
MICROLOG 91-04850 1 fiche

L'objectif de ces études était de réduire les
dépôts de sulfates humides à moins de 20
kilogrammes par hectare par année dans tout
l'est du Canada. Ce rapport constitue la
première tentative de compilation des effets
industriels associés au programme de lutte
contre le SO₂ dans sept provinces
canadiennes. Il sert à identifier les mesures
de lutte qui permettront aux principaux
émetteurs de réduire leurs émissions en 1994
et certains des effets des contrôles sur les
exploitations industrielles. Il se penche sur les
fonderies et les usines de frittage, les services
publics et les orientations futures de la
recherche.
CA EV SC

Rapport de 1990 sur le transport à distance des polluants atmosphériques et sur les dépôts acides, partie 8 : assurance de la qualité

rédigé sous la direction de J. Lawrence [et] S.
Villard. Ottawa : Comité fédéral-provincial de
coordination de la recherche et de la
surveillance, 1990. iii, 79 p. : ill. Bibliogr.
L'éd. anglaise (The 1990 Canadian long-
range...) : 91-04848/1. Titre de la couv.:
Rapport canadien d'évaluation de 1990 sur le
transport à distance des polluants
atmosphériques et sur les dépôts acides,
partie 8 : assurance de la qualité.
MICROLOG 91-04849 1 fiche

Le Comité de coordination de la recherche et
de la surveillance (CCRS) a créé des groupes
spéciaux chargés d'étudier les effets des
polluants acides dans l'atmosphère, en milieu
aquatique et en milieu terrestre. Parallèlement,
les membres du CCRS se sont rendu compte
de la nécessité d'un programme d'assurance
de la qualité qui viendrait renforcer les
recherches et ont donc créé un sous-groupe
distinct chargé de promouvoir l'assurance de la
qualité afin de garantir le caractère scientifique
de toutes les études réalisées dans le cadre
du programme. Les différentes sections de ce
document portent sur ce sujet et décrivent
l'histoire, les réalisations et les lacunes du

programme d'assurance de la qualité.

Rapport de la Commission sur l'avenir politique et constitutionnel du Québec

Commission sur l'avenir politique et
constitutionnel du Québec. Québec : la
Commission, 1991. iii, 180 p. L'éd. anglaise
(Report of the Commission...) : 91-04777/2.
Titre de la couv.: L'Avenir politique et
constitutionnel du Québec. ISBN
2-550-21828-0
MICROLOG 91-04778 3 fiche

La Commission sur l'avenir politique et
constitutionnel du Québec a été créée le 4
septembre 1990 sous l'autorité de l'Assemblée
nationale du Québec aux termes d'une loi
adoptée par vote unanime des formations
politiques. Elle a le mandat d'étudier et
d'analyser le statut politique et constitutionnel du
Québec et de formuler à cet égard des
recommandations, dont elle fait part à
l'Assemblée nationale. Ce document présente
le rapport sur l'avenir politique et constitutionnel
du Québec.

Rapport de la séance de synthèse sur le Plan vert

Consultations sur le Plan vert (1989 : Ottawa,
Ont.). Ottawa : Gouvernement du Canada,
1990. 177 p.
MICROLOG 91-02036 2 fiche

Ce document renferme les rapports des
ateliers de la séance nationale de synthèse
ayant pour but de donner des conseils sur
l'ordre de priorité des mesures qui seront
incluses dans le Plan vert et de proposer des
mesures précises pour chaque thème traité en
vue de mettre en oeuvre les orientations
proposées. Les conclusions tirées de ces
étapes, les réponses aux questionnaires, les
cartes postales, les lettres et les mémoires ont
été analysés puis présentés sous forme de
synthèse dans un document de travail intitulé
'Compte rendu des consultations sur le Plan
vert', publié en août dernier. Outre qu'il
donne un résumé des questions débattues et
des recommandations formulées par les
Canadiens au cours des consultations, ce
compte rendu renferme des rubriques où sont
énumérées des propositions à étudier en
profondeur.

Rapport de projet : calcul du mouvement vertical à partir des données de surface

par R. Servranckx. Ottawa : Service de
l'environnement atmosphérique, 1990. 18 p. :
cartes géogr.
MICROLOG 91-06059 1 fiche

Ce rapport présente les résultats d'un projet

qui a été réalisé au cours de l'été 1990. Il
fut entrepris afin de faire une évaluation pré-
opérationnelle d'un logiciel du Centre de
Recherche Informatique de Montréal. Ce
dernier permet de calculer la vitesse verticale
dans la basse atmosphère à partir des
observations de surface et ce, en temps quasi-
réel. Le projet avait pour objectif d'évaluer
l'utilité du logiciel comme outil diagnostique pour
la météorologie d'exploitation. Il compare les
vitesses verticales diagnostiquées par le logiciel
du CRIM aux analyses de nuages ainsi qu'aux
vitesses produites par le Modèle Régional aux
Éléments Finis du Centre météorologique
Canadien.

Rapport définitif de la consultation publique sur la restauration des logements au Canada

Ottawa : Société canadienne d'hypothèques et de
logement, 1989. 11, 10 p. Bilingue (Final
report on the public...).
MICROLOG 91-02829 1 fiche

Ce rapport décrit le consensus qui s'est
dégagé de la consultation publique sur la
restauration des logements au Canada. Cette
consultation visait à solliciter des avis sur : le
rôle que le gouvernement devrait jouer dans
les marchés privés de la restauration; et, les
modifications qu'il faudrait apporter au PAREL
pour en assurer l'efficacité en tant que
programme de logement social. Il porte
particulièrement sur le marché privé de la
restauration et l'aide à la restauration des
logements.

Rapport sur la première langue officielle et les compétences linguistiques des employés visés par la partie I de la Fonction Publique, 1990

Fredericton : Conseil de gestion, 1990. 31, 30 p. Bilingue (Report on first official...). CSI 45100.002. MICROLOG 91-07119 1 fiche

Le rapport sur la première langue officielle et les compétences linguistiques de 1990 reflète, au 30 décembre 1990, les compétences linguistiques des employés de la Partie I des services publics et précise leur langue maternelle. Les renseignements contenus dans le profil se rapportent à la fois aux employés à temps plein et aux employés permanents à temps partiel. Les tableaux que présente ce document illustrent la situation linguistique par ministère, par région, par Bureaux central, ainsi que par catégorie professionnelle.

Rapport sur la tarification en assurance automobile, 1990

Québec (Province). Inspecteur général des institutions financières. Québec : l'inspecteur, 1991. 123 p. : ill. CSI 66101.003. ISSN 0837-7006 ISBN 2-550-21771-3 MICROLOG 91-07053 2 fiche

Ce rapport analyse les tarifs et les données statistiques sur l'expérience des assureurs automobile au Québec. On y traite du contexte légal dans lequel évoluent les assureurs, ainsi qu'une description de l'offre d'assurance et quelques données. On analyse ensuite la classification et les autres facteurs ayant un impact sur l'évaluation de la prime, ainsi que le fichier central des sinistres automobiles. Le deuxième volet du rapport traite d'abord de la rentabilité de l'assurance automobile, pour ensuite présenter le fondement de la tarification des voitures de tourisme et des perspectives quant à l'évolution des coûts en regard des primes exigées.

Reaction of refractory nozzle materials with zircon sands and borefil at elevated temperatures

by D.H.H. Quon, K.E. Bell and G. Lemieux. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, Minerals Research Program, 1984. 11 p. : ill. (Report ; MRP/MSL 84-4(CR))
MICROLOG 91-04927 1 fiche

The increasing demands imposed on refractories by higher refining temperatures, longer holding times and more corrosive alloys and slags make it necessary to seek alternates for use in ladle systems as those currently used are either unreliable or inadequate. In casting heat-resistant, titanium-bearing No. 409 stainless steel at Atlas Steels Co., Tracy, Quebec, severe blockage of the nozzle of the ladles was encountered. This report describes the investigations undertaken to determine the performance of the currently used and potential alternative refractories in contact with the zircon sands used to protect the nozzles during secondary steel making processes conducted in the VOD ladles. Four major types of refractories were tested, based on mullite, alumina, spinel and periclase compositions. Fine grained zircon sand and a commercial product called Borefil were provided to examine their compatibility with the refractory materials. This report provides the results of the investigations.

Les Recettes fédérales : les nouvelles tendances et la poursuite de la réforme fiscale

par M.G. Wrobel. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 18 p. Bibliogr. (Bulletin d'actualité ; 90-03F) L'éd. anglaise (Federal revenues : changing...) sur la même fiche. ISBN 0-660-93000-5
MICROLOG 91-02120 1 fiche

Ce document étudie les tendances des recettes fédérales depuis le dépôt du rapport de la Commission Carter, en 1967. Il étudie la volonté du gouvernement de toucher des recettes plus élevées au début des années 70 et des mesures de réforme prises au cours de cette décennie, lesquelles ont considérablement réduit les recettes gouvernementales par la suite. Il porte également sur les mesures que prend actuellement le gouvernement pour réduire son déficit, lesquelles ont donné lieu à des hausses d'impôt, et des efforts faits en vue d'en arriver à une réforme fiscale. Il examine finalement plusieurs questions analytiques liées à la fiscalité.

Recherche et développement dans le secteur des minéraux

par M.J. Wojciechowski. Ottawa : Énergie, mines et ressources Canada, Centre canadien de la technologie des minéraux et de l'énergie, 1989. viii, 93 p. : ill. Bibliogr. (Rapport de CANMET ; no 89-2F) CANMET contract: CM89-2F. ISBN 0-660-93082-X
MICROLOG 91-01014 2 fiche

L'objet de ce rapport est de faire connaître les tendances dans le financement de recherche et développement sur les minéraux ainsi que l'importance de la R-D pour le secteur des minéraux. Cette tâche a consisté à fournir de l'information sur les tendances quant au niveau, aux sources et à l'orientation de l'aide à la recherche et développement dans le secteur des minéraux au Canada; mettre cette information en perspective en fournissant de l'information sur le rôle de la R-D dans l'industrie des minéraux et sur le rôle de cette industrie dans l'économie canadienne, fournir de l'information sur les tendances en matière d'enseignement en génie minier et en

métallurgie au Canada; comparer les tendances de la R-D en génie minier et en métallurgie au Canada avec les tendances dans d'autres disciplines; comparer le secteur des minéraux et la R-D qui s'y fait avec d'autres secteurs des ressources au Canada; comparer l'information susmentionnée avec des données semblables sur la R-D dans les secteurs minéraux de sept pays de l'OCDE; et, examiner les données sur les niveaux et les tendances de la R-D sur les minéraux, à la lumière des besoins actuels et futurs du secteur des minéraux, et par rapport à la façon dont d'autres secteurs et d'autres pays se sont adaptés à un climat économique et une structure industrielle changeants.

Recherche sur l'enseignement postsecondaire : rapport de la réunion

Ottawa : Secrétariat d'Etat du Canada, 1988. 19, 18 p. Bilingue (Research on Post-Secondary...). MICROLOG 91-05703 1 fiche

Le document présente le rapport de la réunion 'Recherche sur l'enseignement postsecondaire' qui s'est tenue les 10 et 11 mai, 1988. Y sont traités les sujets suivants: les préoccupations et les besoins convergents; la coopération; et les conclusions et recommandations. De plus, on y retrouve la liste des participants à la réunion, et les questions prioritaires intéressant la recherche et les politiques décelées par les délégués à la réunion sur la recherche concernant l'enseignement postsecondaire.

Recherche sur la politique commerciale dans les pays en développement : priorités futures, enquête et évaluation

par A. Weston et R. Young. Ottawa : Centre de recherches pour le développement international, 1989. 63 p. Bibliogr. (Rapport manuscrit : 2671) L'éd. anglaise (Research on trade...). : 91-00542/1. MICROLOG 91-00543 1 fiche (Available on fiche only)

Ce document contient deux rapports. Le premier traite des résultats d'une enquête sur la recherche sur les échanges commerciaux que des organisations de pays développés ont financée ou financent. Bien que l'échantillon ne soit pas complet, il donne certains des grands sujets étudiés. Le second est une revue assez substantielle de la littérature sur la politique commerciale et indique certains sujets qui méritent d'être étudiés plus à fond tels: les recherches sur la négociation et la politiques commerciales; les tendances observées et les nouvelles questions de politiques commerciales; et, les sujets justifiant des recherches plus poussées.

Recherches archéologiques dans la réserve de parc national de l'île d'Ellesmere, 1989

par P.D. Sutherland. Ottawa : Environnement Canada, Service canadien des parcs, 1991. 16 p. : ill., cartes géogr. (Bulletin de recherches : no 288) L'éd. anglaise (Archaeological investigations in Ellesmere...) sur la même fiche. ISSN 0228-1236. MICROLOG 91-03267 1 fiche

En 1988-1989, une étude de base des ressources archéologiques de la réserve de parc national de l'île-d'Ellesmere a été menée à la demande du Service canadien des parcs. Il s'agissait de procéder à l'inventaire et à l'analyse des sites Inuit connus, tant préhistoriques qu'historiques, afin de se renseigner sur l'histoire culturelle fondamentale de la réserve, et de définir la nature et l'ampleur des ressources archéologiques qu'elle renferme. Les renseignements recueillis servent à définir des stratégies de gestion destinées à assurer la protection des ressources et à émettre des recommandations quant à l'interprétation de l'histoire culturelle de la réserve.

Reclaiming the attic : final report

by R. Willoughby-Price...et al. Ottawa : Canada Mortgage and Housing Corporation, 1989. 104 p. : ill. Bibliogr. MICROLOG 91-02830 2 fiche

This report summarizes the results of research on the potential of the attic as a viable area for expansion in homes. It shows that it is economically efficient to utilize the attic of houses for habitation, and investigates the technologies and the costs of the structures that would be suitable for providing the habitable attic. The study reviews the types of attic space traditionally built, defines technological advancements related to the provision of attics, assesses the limitations of current technology in achieving speed and efficiency, and develops solutions and approaches to overcome these limitations.

Reclamation of disturbed alpine lands : a literature review

Hardy BBT Limited. Edmonton : Alberta Land Conservation and Reclamation Council, Reclamation Research Technical Advisory Committee, Mountain and Foothills Reclamation Research Program, 1990. xviii, 211 p.

Bibliogr. (Report : RRTAC 90-7) MICROLOG 91-04579 3 fiche

Alpine ecosystems are being subjected to ever-increasing development activities and use, mainly associated with skiing facilities and hiking trails. This study was undertaken to collect and review information from North American sources on measures needed to reclaim alpine disturbances. This report provides a brief description of both provincial and federal regulations that affect developments in the alpine; an overview of the alpine ecoregion in Alberta; a description of the types of disturbances to the alpine in Alberta and the associated impacts on alpine ecosystems; reviews the literature relating to various aspects of reclamation in North America; and summarizes information relevant to Alberta, including site and surface preparation, selection of appropriate plant species, establishment methods, and maintenance and monitoring requirements.

Recodifying criminal procedure, vol. I : police powers, title I : search and related matters

Ottawa : Law Reform Commission of Canada, 1991. xv, 332, xv, 346 p. Bibliogr. (Report : 33) Bilingue (Pour une nouvelle...). ISBN 0-662-57701-9. MICROLOG 91-03263 8 fiche

This report presents the first instalment of the Commission's proposed Code of Criminal Procedure. This recodification of the Criminal Code is to be characterized by simplicity, consistency and coherence and to be guided by the principles of fairness, efficiency, clarity, restraint, accountability, participation, and protection. The first volume on police powers begins with general matters -- interpretation provisions and rules of general application. Following this is a series of specific sections which address the range of applicable police powers under: search and seizure, obtaining forensic evidence, testing persons for impairment in the operation of vehicles, electronic surveillance, disposition of seized things, and privilege in relation to seized things.

Recommendations on aquatic biological tests and procedures for environmental protection, C&P, DOE

by G.A. Sergy. Ottawa : Environment Canada,

Conservation and Protection, 1987. vii, 185 p. Bibliogr.

MICROLOG 91-02071 3 fiche

Many organizations, agencies, and individual practitioners are now advocating the wider use of biological indices of environmental quality and the use of toxicity tests in combination with chemical and microbiological analyses to predict and control environmental deterioration. This report deals with the subject primarily from a national perspective. It discusses present and potential applications of biological tests, selects a 'best fit' set of aquatic toxicity tests, and addresses the provision of those tests in environmental protection and in-house capability. Emphasis is placed on greater standardization to improve the quality and usefulness of the product. The report considers both freshwater and marine environments; biological tests or procedures applied in the lab and field; complex effluents and leachates and single chemical sources; and the prediction and measurement of toxic effects, either before or after release to the environment.

A Reconnaissance life science inventory of the Emily Creek area of natural and scientific interest, Victoria County, Ontario

by D.F. Brunton. Aurora, Ont. : Ministry of Natural Resources, Central Region, Parks and Recreational Areas Section, 1990. viii, 65 p. : ill., maps. Bibliogr. (Open file ecological report ; 9001) *Fold. map not filmed.* ISBN 0-7729-7518-3

MICROLOG 91-04465 1 fiche

The Emily Creek area of natural and scientific interest (ANSI) is a large wetland complex situated in the shallow channel of a former postglacial spillway which has been negatively affected by the raising and stabilization of water levels along the Trent-Severn Waterway, into which it flows. This study was undertaken to provide a preliminary life science inventory of the area and to assess its significant life science resources and their contribution to representational or unique features satisfying the life science protection objective. A literature review and preliminary review of the stereo aerial photographs was conducted to obtain an overview of the site. Fieldwork was conducted from September 12-14, with black and white photographs taken of major vegetation types and life science features and voucher specimens for significant or unknown plant species made. The vegetation was mapped in the field. Observations of bird species were noted, as were incidental records of other mammal and herpetological fauna.

Recovery of metal values from Hudson Bay Mining and Smelting oxide residue

Hudson Bay Mining and Smelting Company. S.I. : Sherritt Gordon Ltd., 1990. x, 243 p. : ill. *CANMET contract: OSQ85-00312.*

MICROLOG 91-00368 3 fiche

The Hudson Bay Mining and Smelting Co. Ltd. initiated a project in 1985 to develop an economically viable and environmentally acceptable process for recovering metal values from zinc plant oxide residues stockpiled at Flin Flon. Phase 1 consisted of mineralogical analysis of the oxide residue, the development of a detailed preliminary flowsheet, and laboratory scale testwork to confirm the feasibility of the selected flowsheet. Phase 1c consisted of batch and continuous tests to establish the viability of an expanded treatment process and the preparation of cost estimates for a commercial plant and began in February 1989. Initial batch tests were carried out using feed materials from earlier phases of the project. New samples of oxide residue, zinc concentrate, zinc hydroxide sludge and purified neutral leach solution were obtained and batch testwork continued. This report provides an overall compilation and interpretation of the process data generated during the Phase 1c batch and continuous test programs.

La Récupération des protéines et des matières grasses perdues dans l'industrie laitière

par Inpex Inc., Poseidon Inc., et la Coopérative agro-alimentaire Agrinove. Ottawa : Environnement Canada, Service de la protection de l'environnement, 1991. xii, 33, xii, 30 p. : ill. (Rapport : SPE 3/FP/2) Bilingue (Recovery of proteins and fats...). ISBN 0-662-58150-4
MICROLOG 91-03266 1 fiche

Le projet décrit dans ce rapport permet de récupérer des protéines et des matières grasses contenues dans les rejets de laiterie. Il s'inscrit dans le cadre d'un programme de traitement des eaux usées mis en oeuvre par la Coopérative agro-alimentaire Agrinove et par Environnement Québec. Les problèmes et les objectifs visés dans ce document sont les suivants: le traitement des eaux usées à la Coopérative Agrinove; le procédé de récupération des protéines; le traitement biologique des eaux usées à la laiterie d'Agrinove; les débouchés pour les protéines récupérées; les aspects économiques; les applications du procédé; et la distribution des débits d'eau par catégorie de produit fabriqué.

Le Recyclage des limes

par J.D. Light. Ottawa : Environnement Canada, Service canadien des parcs, 1991. 20 p. : ill. (Bulletin de recherches : no 285) L'éd. anglaise (Recycled files) sur la même fiche. ISSN 0228-1236
MICROLOG 91-02724 1 fiche

Plusieurs ouvrages font mention du recyclage des limes par les forgerons, et divers collectionneurs ont écrit sur le sujet. Cependant, ces travaux ne décrivent pas l'importance ni les raisons de cette pratique. Ce document présente l'histoire du recyclage des limes, et énumère toutes les limes recyclées de la collection-type qui proviennent du Québec, du Manitoba, de la Colombie-Britannique et du Yukon, et qui représentent les périodes de la fin du XVIIIe siècle au milieu du XXe. Il indique également la provenance de l'outil, donne sa description et précise le type de lime (s'il y a lieu) dans la fabrication.

Reduction of radon progeny concentration by means of an air cleaner

by J. Bigu and E. Edwardson. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories,

1990. iv, 37 p. : ill. Bibliogr. (Report ; MRL 90-143(TR))
MICROLOG 91-02417 1 fiche

There are a variety of airborne radionuclides found in working and living environments which at sufficiently elevated concentration levels can pose a potential hazard to human health. This report describes the use of a device which operates on a 'hybrid' technique consisting of air filtration, electrostatic deposition, and turbulent air mixing to reduce the concentration levels of Rn222 progeny levels in air. Experiments were carried out in Rn222/Rn222 progeny atmospheres when the air cleaner was operating and when it was turned off.

Reflections on steel corrosion in concrete

by D.G. Manning. Ottawa : Ministry of Transportation, Research and Development Branch, 1991. iii, 16 p. : ill. Bibliogr.
MICROLOG 91-05251 1 fiche

This paper examines the progress which has been made in the past 20 years in the knowledge of steel corrosion in concrete and the disparity between the current level of understanding and the state-of-the-practice. Examples taken from common practice (the measurement of the chloride ion content of concrete and the measurement of half cell potentials) illustrate implications of a lack of understanding of basic principles. The paper concludes with an identification of the research needed to provide a more complete understanding of the mechanisms and the factors influencing the corrosion of steel embedded in concrete.

Une Réforme axée sur le citoyen

Québec : Gouvernement du Québec, Ministère de la santé et des services sociaux, 1990. 94 p. *L'éd. anglaise (A Reform centred...)* : 91-05524/1
MICROLOG 91-05523 2 fiche

Le réseau de la santé et des services sociaux se trouve à une croisée des chemins. Des choix s'imposent pour harmoniser et rendre compatibles les dynamiques de développement, de fonctionnement et de financement qui le caractérisent. Ce document se penche sur cette question en examinant particulièrement la centralisation, la bureaucratisation et la rigidité du réseau qui l'empêchent d'ajuster la réponse aux besoins, aux ressources et au dynamisme des milieux. Il souligne également le manque de contrôle sur les fonds publics, et décrit la duplication de services et le manque de complémentarité des établissements du réseau.

Reforming the decision making process for forest land planning in British Columbia

by T. Guntton and I. Vertinsky. Victoria : British Columbia Round Table on the Environment and the Economy, 1990. 30 p. : ill. MICROLOG 91-04308 1 fiche

One of the principal issues in forestry in BC is the management of land to support competing uses. This report synthesizes the findings of a series of background studies analyzing the decision making process for Crown land

planning in BC. It includes a brief discussion of the characteristics of the land use issue and of an effective decision making process; evaluates the process currently used in relation to these criteria; and then evaluates several alternative land use decision making processes. The report does not deal with forest policy issues such as tenure, community development, logging practices, stumpage, silviculture and native land claims.

by G. Beaumier. Ottawa : Library of Parliament, Research Branch, 1990. 14 p. Bibliogr. (Current issue review ; 88-13E) *French ed. (Le Développement régional au Canada) on the same fiche.* Revised September 1990. ISBN 0-660-13895-6
MICROLOG 91-04803 1 fiche

Almost from the beginning of Confederation, the federal government has implemented programs that affected some regions more profoundly than others. Such programs were never part of the federal regional development policy, however, until the 1960s, when federal politicians became aware of differences in the levels of regional prosperity and accepted the responsibility of eliminating them. This paper reviews federal regional development policy since World War II, a period in which both the federal and provincial governments have expended considerable resources in trying to narrow regional disparities in Canada.

**A Regional evaluation of coal quality
in the northern Foothills-Mountains
region of Alberta**

by D.E. Macdonald...et al. Edmonton : Alberta Research Council, Alberta Geological Survey, 1989. iii, 97 p. : ill., maps. Bibliogr. (Open file report ; no. 1989-01) *Fold. maps not filmed.*
MICROLOG 91-02824 2 fiche

This report is the second of a three-part series that describes regional coal quality variations within the northern Foothills-Mountains region of Alberta. The two major components of the study are a statistical analysis and mapping of coal quality data available, and a geologic models section in which regional and local in-seam coal quality variations are examined from a geological perspective. The first component describes, characterizes, and sets limits for the coal quality variables, while the second provides a geological insight into why and how these quality parameters vary.

**Regional geology and petroleum
potential of the Bakken Formation,
southwestern Manitoba**

by C.D. Martiniuk. Winnipeg : Manitoba Energy and Mines, Petroleum, 1988. ii, 34 p. : ill., maps. Bibliogr. (Petroleum open file report ; POF 8-88) *Fold. maps not filmed.*
MICROLOG 91-07156 1 fiche

The Bakken formation is a thin, relatively uniform clastic unit that lies between the red dolomitic siltstones and shales of the Upper Devonian Lyleton (Three Forks) formation and the carbonates of the Mississippian Lodgepole formation (Souris Valley Beds). Recent development in southwestern Manitoba has led

to the discovery and subsequent development of several oil occurrences within the middle member of the Bakken formation. This study is a preliminary review of its regional geology and petroleum potential. Stratigraphic relationships, lithologic character and lateral variations of the formation are discussed, along with a brief discussion of well log characteristics and identification of correlation problems of the formation. Economic aspects of the formation are also considered.

La Réglementation des institutions financières : projets de réforme -- Rev.

par B. Zafiriou. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 22 p. Bibliogr. (Bulletin d'actualité ; 86-24F) L'éd. anglaise (Regulation of financial institutions...) sur la même fiche. Révisé le 31 octobre 1990. ISBN 0-660-93175-3 MICROLOG 91-04823 1 fiche

L'industrie canadienne des services financiers est plus réglementée que la plupart des autres secteurs de l'économie. Cela s'explique en partie du fait que cette industrie est le pivot de l'économie et aussi à cause de la nature particulière des institutions financières, qui les rend exceptionnellement sensibles aux variations des forces économiques et aux accès occasionnels de panique collective. Ce document se penche sur les projets de réforme de la réglementation des institutions financières et examine principalement le rôle des institutions financières et le fondement de la réglementation; la structure de la réglementation; les propositions de réforme; la diversification et les transactions intéressées; les limites à la participation; l'assurance-dépôts; les nouvelles orientations; et, les mesures parlementaires. En octobre 1989, le Conseil consultatif du Régime de pensions du Canada a examiné les dispositions actuelles sur le caractère récent et la rétroactivité en vue de déterminer si des changements étaient nécessaires. Ce document présente le rapport du Conseil sur les règles relatives au caractère récent et à la rétroactivité pour les prestations d'invalidité. CA CO SA

Regression-based variance estimators for the error components model

by D. Bolduc and R. Laferrrière. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 19 p. Bibliogr. (Publication ; no. 733) MICROLOG 91-00963 1 fiche

The error components model offers many ways to break down the error term in a regression, but difficulties relate to the estimation of the variances which sometimes limit its applicability. The existing variance estimators do not preclude the occurrence of negative variance estimates and do not handle the problem of missing data properly. This paper proposes a class of variance estimators which arises from applying the least squares principle. The suggested approach offers a new alternative when facing negative variance estimates and deals with unbalanced settings in a very natural way where no observation need be discarded. The paper reviews the error components model, then introduces two variance estimators and discusses their statistical properties. It then describes the advantages of the new estimators and proposes some extensions, concluding with the results of a Monte Carlo experiment which enlarges the one by Baltagi (1981). PR PS QU SC

Regroupement et remaniement des programmes municipaux de préparation à l'emploi des bénéficiaires de l'aide sociale : document-débat

Regulatory and economic impact for mandatory requirements for shoulder harnesses in small commercial aeroplanes and commercial helicopters

by R.L. Monroe, W.M. McLeish, D. Biggs ; Transportation Development Centre, Policy and Coordination Group, Transport Canada. Ottawa : Sypher/Mueller International Inc., 1990. xvi, 105 p. : ill. Bibliogr.
MICROLOG 91-03666 2 fiche

Assessment of the regulatory and economic impact of mandatory requirements for shoulder harnesses in flight crew seats of all small commercial aircraft regardless of their date of manufacture, and investigates the general availability of low-cost harness kits. A review of US and Australian regulations for small aircraft was undertaken and accident data was assessed to provide the basis for the estimation of injury and fatality rates with and without shoulder harnesses. The accident assessment compared rate of injury with and without shoulder harnesses. A sample of accidents where no shoulder harness was worn was selected and survivability was investigated if it had been worn, based on injury type, deceleration G forces, impact angle and intrusion of airframe into the pilot seat area. An extensive survey of aircraft manufacturers, distributors, suppliers, operators, and overhaul shops was undertaken to gain cost data to retrofit aircraft and a cost/benefit analysis was used to determine if retrofitting in commercial helicopters and small commercial planes can be justified.

Relations among various dissolved substances in the Big Falls headpond, Mersey River, Nova Scotia

by G.J. Farmer and D. Ashfield. Halifax : Dept. of Fisheries and Oceans, Biological Sciences Branch, Freshwater and Anadromous Division, 1990. v, 11 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1755) ISSN 0706-6457
MICROLOG 91-00185 1 fiche

The Mersey River fish culture station has two Swedish-type ponds and an annual production of 300,000 1-year-old Atlantic salmon smolts. A series of hydro-electric dams were constructed on the river, the headpond of which supplies water to the fish culture station from two levels. A mortality of 8.6% occurred among the juvenile Atlantic salmon from August 12-25, 1988 when the parr were provided with water withdrawn from the bottom of the headpond. To discover the reason for this, water samples were collected at various depths of the headpond on 6 occasions from May 23-October 22, 1989. Of special interest were the development and subsequent breakdown of thermal stratification; the relations among concentrations of dissolved oxygen, free carbon dioxide and total iron; and determining the concentrations of other potentially toxic substances such as manganese, aluminum, total ammonia, hydrogen sulphide and hydrogen ions.

Relations entre la performance lors de la conduite d'un véhicule routier et les concepts d'attention, stress et charge mentale de travail

par P. Vaugeois et J. Bergeron. Montréal : Université de Montréal, Centre de recherche sur les transports, 1991. 52 p. Bibliogr. (Publication ; no. 751)
MICROLOG 91-02137 1 fiche

Cette étude porte sur les effets de divers agents stresseurs et de la charge mentale de travail sur la performance dans une tâche de conduite d'un véhicule routier et ce, principalement en ce qui concerne la vision étant donné l'importance de celle-ci lors de la conduite. La variable intermédiaire explicative de ces effets est ici le phénomène de la focalisation de l'attention. De plus, le document porte sur les points suivants: la charge mentale de travail; les relations entre les effets du stress et la performance; les relations entre l'activation et la performance; les relations entre certains agents stresseurs et la performance; et, les déterminants de la performance dans la conduite d'un véhicule routier.

Les Relations fédérales-provinciales -- Rév.

par J. Stilborn. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 21 p. Bibliogr. (Bulletin d'actualité ; 86-2F) *L'éd. anglaise (Federal-provincial...) sur la même fiche.* ISBN 0-660-93030-7
MICROLOG 91-01924 1 fiche

Les relations fédérales-provinciales influent sur la plupart des grandes activités du gouvernement du Canada et elles sont en évolution quasi constante. Ce bulletin est un résumé des principaux événements survenus sur la scène fédérale-provinciale depuis l'élection du gouvernement Mulroney le 4 septembre 1984. Il passe en revue la période de 1986 à 1988 et le deuxième mandat du gouvernement Mulroney.

Les Relations intergouvernementales et le vieillissement de la population au Canada : les défis à relever

Ottawa : Conseil consultatif national sur le troisième âge, 1991. 21, 19 p. Bibliogr. *Bilingue (Intergovernmental relations and the aging...)*. ISBN 0-662-58155-5 MICROLOG 91-05663 1 fiche

La portée des programmes fédéraux et provinciaux qui peuvent affecter les aînés s'étend à tous les secteurs d'intervention du gouvernement. Toutefois, ce document s'intéresse surtout à la sécurité du revenu, à la santé, aux services sociaux et au logement. Il vise à décrire la situation actuelle en ce qui concerne les principaux programmes fédéraux, provinciaux et territoriaux ayant des répercussions majeures sur les conditions de vie des aînés; montrer l'interaction existant entre ces différents programmes, et la façon dont cette interaction se répercute sur les services rendus aux aînés; et faire ressortir les défis à relever pour en arriver à maintenir une bonne qualité de vie pour les aînés au Canada. Il présente d'abord une vue d'ensemble des principaux programmes dans chacun de ces secteurs, puis examine les conséquences de ces programmes sur les aînés.

The Relationship between delayed primary wing feather moult and local harvest rates of adult female mallards in Manitoba, 1982-84

by G.S. Hochbaum and F.D. Caswell. Ottawa : Canadian Wildlife Service, 1991. 3 p. Bibliogr. (Progress notes ; no. 195) ISSN 0069-0023 ISBN 0-662-18954-X MICROLOG 91-06373 1 fiche

Over the past 20 years, members of Mallards have declined to low levels on the Canadian prairies owing to persistent drought, low recruitment, and possible high harvest rates. This study examined the relationship between harvest rate and wing feather moult in adult female Mallards in Manitoba to help gauge the effectiveness of management programs designed to reduce local hunting pressure on late-nesting ducks. Reward bands were placed on adult female Mallards on the Delta Marsh in southern Manitoba from 1982-84. Evidence of primary wing feather moult was recorded for each individual, and patterns of direct bank recoveries were examined.

The Reluctant learner : a research report on nonparticipation and dropout in literacy programs in British Columbia

by Audrey M. Thomas ; project management by the Centre for Curriculum and Professional Development. Victoria : Ministry of Advanced Education, Training and Technology ; Ottawa : Dept. of the Secretary of State, National Literacy Secretariat, 1990. x, 131 p. Bibliogr. At head of title: *Adult basic education*. ISBN 0-7718-8938-0 MICROLOG 91-03873 2 fiche

In B.C., 2 out of 5 people 15 years of age and over have no secondary diploma or certificate according to the 1986 Census. This report specifies the reasons for non-participation in adult basic education (ABE) literacy programs and reasons for dropout from such programs in B.C. It is based on a literature review, opinions gathered from ABE professionals and other field workers, interviews with participants from several literacy classes, and two telephone surveys which interviewed 56 persons.

Remote residential photovoltaic systems in British Columbia : a study

Appropriate Energy Systems. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1991. 55 p. : ill. *CANMET contract: M91-7-138-1991E*. ISBN 0-662-18572-2 MICROLOG 91-03581 1 fiche

Photovoltaic (PV) systems for remote residential users are growing in popularity, but there is no good source of data on the extent or effectiveness of the technology for maintenance, performance, costs, problems and benefits. This report provides the results of a survey of existing residential PV users to collect such data, including a monitoring phase. The questionnaire was answered by 80 users, of which 10 were selected for a detailed system inspection, photographing, and monitoring equipment installation. Selection was based mainly on representative system size, design characteristics, and regional location. Monitoring was conducted for ampere-hours only for 6 months, at least half of which was between October and March.

Répercussions d'un changement climatique sur l'industrie du ski alpin au Québec

Lamothe & Périard ; avec la collaboration de Joseph Litynski. Ottawa : Environnement Canada, Service de l'environnement atmosphérique, 1988. 12, 12 p. : ill. (Sommaire du changement climatique ; SCC 88-03) *Bilingue (Implications of...skiing...)*. ISSN 0835-3980 ISBN 0-662-55770-0
MICROLOG 91-01711 1 fiche

L'objectif général de cette étude est d'évaluer la sensibilité du ski alpin face à un éventuel changement climatique causé par une augmentation du CO₂ atmosphérique et autres gaz à effet de serre. La première partie du travail consiste à identifier les critères météorologiques pertinents à la définition d'une journée skiable. En utilisant les conditions climatiques actuelles et celles prévues selon les scénarios de changement climatique, ces critères sont ré-utilisés pour estimer les impacts d'un climat plus chaud sur l'industrie du ski alpin et pour en évaluer grossièrement les retombées socio-économiques.

Replacement costs for oil and gas in western Canada : methodologies and application

by M. McLachlan. Calgary, Alta. : Canadian Energy Research Institute, 1990. xx, 108 p. : ill. Bibliogr. (Research report ; no. 90-1) ISBN 0-920522-63-7
MICROLOG 91-01739 2 fiche (Available on fiche only)

This report examines replacement costs and their associated methodologies for Alberta and Saskatchewan oil and gas. Replacement cost is being used to refer to the two different perspectives of the relationship between expenditures on exploration and development activity in the petroleum industry and the reserve additions they generate. The short-term perspective determines the per unit costs of obtaining reserves additions and is thus relevant for issues as cash flow decisions. The long-term perspective provides an estimate of the per unit costs incurred during the exploration and development stages of the energy cycle and is relevant for long-term investment decisions. This study provides a separate analysis for each of these perspectives, an explanation of the differences between them, and a discussion of the limitations of the analyses.

Report of a forestry mission to Scandinavia

by B.D. Giffillan...et al. Victoria : Forest Resource Development Agreement, 1990. vii, 60 p. : ill. Bibliogr. (FRDA report ; 156) ISSN 0835-0752 ISBN 0-7726-1288-9 MICROLOG 91-03602 1 fiche

The 1989 Forestry Mission was composed of representatives from Forestry Canada, the B.C. Ministry of Forests and the Northern Interior Lumber Sector of the Council of Forest Industries of B.C. The mission examined Scandinavian developments in forest management programs, land use and environmental issues for relevance to B.C. issues, and long-term strategic plans and visions of forests of the future. This report reviews the history of Scandinavian forestry, describes major forestry institutions, details the regulatory framework within which Scandinavian forestry operates, and describes their silviculture regime. • BC CA EX FO PR SC

Report of a safety study on VFR flight into adverse weather

Ottawa : Transportation Safety Board of Canada, 1990. iv, 35 p. ISBN 0-662-18319-3 MICROLOG 91-01354 1 fiche

Accidents in which the aircraft was operated under visual flight rules (VFR) into adverse weather conditions occur regularly, claiming a disproportionately high number of fatalities each year. This study examines the contributing factors to such, particularly the requirements for obtaining and retaining an instrument flight rules rating and the capability of and the air traffic services to assist VFR pilots in distress due to deteriorating weather. The study was confined to accidents from 1976-85 which involved Canadian-registered aircraft in Canadian territory. Accident data were analyzed in clusters to identify patterns, and in the context of particular safety issues identified in the findings of individual investigations, other safety studies, and secondary source material. Report of the Advisory Committee to the Minister of Municipal Affairs on the Provincial-Municipal Financial Relationship

Ontario. Advisory Committee to the Minister of Municipal Affairs on the Provincial-Municipal Financial Relationship. Toronto : Ministry of Municipal Affairs, 1991. xi, 153 p. : ill. Bibliogr. CSI 55175.205. ISBN 0-7729-8153-1
MICROLOG 91-04649 2 fiche

This document provides background information, including a demographic profile of Ontario, a description of provincial-municipal financial interdependence and a profile of the municipal sector and its finances. It provides basic reasons why the municipal level of government is efficient and effective, and develops a set of principles to guide the division of responsibilities between provincial and municipal governments in terms of policy/service management, delivery, and financing. It also presents an application of the Committee's principles toward a realignment of responsibilities, and examines the existing transfer system and proposes changes to complement the new division of responsibilities by simplifying and rationalizing transfers. In addition, it discusses the property tax, looks at potential new revenue sources, and examines appropriate municipal means of capital formation including development charges, reserves and borrowing. Finally it explores the process necessary to implement the Committee's recommendations.

Report of the Expert Advisory Committee on Amino Acids

Canada. Expert Advisory Committee on Amino Acids. Ottawa : Health and Welfare Canada, 1990. viii, 52, viii, 58 p. Bibliogr. *Bilingual (Rapport du Comité...)*. ISBN 0-662-57742-6
MICROLOG 91-01521 2 fiche

Because of extensive promotion of individual amino acids as therapeutic measures, and extensive data which indicated toxicity of single amino acids in experimental animals, 7 amino acids (arginine, ornithine, lysine, methionine, phenylalanine, tryptophan, tyrosine) and carnitine, all associated with potential therapeutic acids, were given new-drug status. Submissions were invited to provide information on the non-toxic effects of these substances, but none were received. This Committee was formed to review the metabolic effects of the consumption of supplements of amino acids, singly or in combination; the safety concerns associated with the use of amino acids, singly or in combination; and the level up to which the various single amino acids listed may be consumed without causing pharmacological effects or toxicological concerns, particularly if consumed over a prolonged period. This report covers the replies to information letter no. 710; summaries of committee reports on amino acids; uses and combinations of dipeptides and combinations of amino acids; and a summary of the recommendations.

The Report of the Ministerial Inquiry on Religious Education in Ontario Public Elementary Schools

Ministerial Inquiry on Religious Education in Ontario Public Elementary Schools. Toronto : The Inquiry, 1990. 158 p. Bibliogr.
MICROLOG 91-06210 2 fiche

Since 1988 when the Supreme Court struck down the law requiring the recitation of the Lord's Prayer in Ontario schools, religious education has been a difficult issue. This report details information from a Ministerial inquiry into religious education in Ontario schools at the present time. It includes information on religious education in the past, and the present status of religious education in Ontario. The data was gathered from surveys of Ontario schools, and outlines the difficulties public schools perceive of in the present provincial guidelines for religious education despite the exemption permitting the school to opt-out of any religious education program. Many public schools serving ethnic/multicultural communities seek these exemptions, but it is felt a new approach to the question of religious education could improve the situation in Ontario. Recommendations regarding religious education, and its future direction conclude the report.

Report of the Waste Reduction and Prevention Committee on Beverage Containers

Manitoba. Waste Reduction and Prevention Branch. Committee on Beverage Containers. Winnipeg : The Branch, 1991. ii, 11 p. (WRAP series) MICROLOG 91-06844 1 fiche

The Waste Reduction and Prevention Committee on Beverage Containers was established in January 1991 to advise on the best method of establishing a comprehensive beverage container management system in Manitoba to achieve a high rate of recovery. This report describes the industry's perspective on what would constitute an appropriate waste reduction target, and how this target could be achieved. The Committee included representatives of the beer and soft drink manufacturers and the distributors of beverage alcohol and grocery products. This report describes the current situation; discusses how the proposed targets could be achieved; and presents two options, the first of which builds on the present systems and the other of which uses an integrated deposit system. Related issues such as litter, reporting and accountability, markets, what happens to the containers of other beverages, imports, jobbers, and the roles for other stakeholders are also discussed.

Report of the Waste Reduction and Prevention Committee on Old Newspaper (ONP)

Manitoba. Waste Reduction and Prevention Branch. Committee on Old Newspaper. Winnipeg : The Branch, 1991. ii, 17 p. (WRAP series) MICROLOG 91-06841 1 fiche

The Waste Reduction and Prevention Committee on Old Newspaper was established in January 1991 to provide advice on the collection and recycling of old newspaper and newspaper supplements; to provide a process for distributors of products or material with the potential to become waste; and to report on how they will fulfil their responsibilities to minimize waste and exercise stewardship for their products. This initial document reports on the industry perspective as to what would constitute an appropriate waste reduction target and how this target can be achieved. It discusses barriers to recycling, markets in Manitoba and elsewhere, and sustainable solutions, including their economic feasibility and the regional collection and recycling infrastructure.

Report of the Waste Reduction and Prevention Committee on Used Oil

Manitoba. Waste Reduction and Prevention Branch. Committee on Used Oil. Winnipeg : The Branch, 1991. iii, 7 p. (WRAP series) MICROLOG 91-06843 1 fiche

The Waste Reduction and Prevention Committee on Used Oil was established in January 1991 to advise on the best method of establishing a comprehensive used oil collection and management system in Manitoba to achieve a high rate of recovery of used oil in the commercial, industrial, farm/rural and do-it-yourself sectors. This report describes the industry's perspective on what would constitute an appropriate waste reduction target, and how this target could be achieved. The Committee included representatives from the Canadian Petroleum Products Institute, Canadian Tire, Federated Co-op, Mohawk Oil, and Quaker

State. This report describes the volumes of oil sold, the potential for recovery, and the generators and nature of used oil; discusses solutions to the problem; presents recommendations for collection, disposal, and regulations; and discusses the benefits to the government, the seller, and the used oil generator of a reduction solution.

Report on blast design for narrow vein stopes, Lupin Mine

by Y.C. Lizotte. Yellowknife : Canada-NWT Mineral Development Agreement, 1990. iii, 29 p. : ill. (Report : MRL 91-049(MDA))
MICROLOG 91-06286 1 fiche

Report of a project to introduce and refine a drill pattern for the West Zone of the Lupin Mine in the NWT which would provide adequate breakage, yet reduce drilling and explosives use, thereby reducing wall damage and controlling dilution without introducing extensive artificial ground support. A literature review of current mining practices was conducted, then current practices at Lupin were assessed and criteria for assessing blast performance from a production objective and blast monitoring perspective were established. Blast patterns were designed based on current understanding and test blasts were undertaken to test the design. The success of various patterns is reported.

A Report on Canada's progress towards a national set of environmental indicators

Ottawa : Environment Canada, State of the Environment Reporting ; Indicators Task Force, 1991. vii, 98 p. : ill., maps. Bibliogr. (State of the environment report series ; SOE report no. 91-1) French ed. (Le Point sur l'établissement...) : 91-06672/2. ISSN 0843-6193 ISBN 0-662-18394-0
MICROLOG 91-06671 2 fiche

Environmental indicators, like economic indicators, are important tools for translating quantities of data into succinct information that can be readily understood and used by decision makers and the general public. The Organization for Economic Cooperation and Development (OECD) has taken the first step in leading an international initiative to develop a series of indicators and Canada is beginning to work on developing a similar series. This report presents a brief overview of efforts now underway to develop consistent, reliable indicators to measure the quality of our environment, the stresses placed on it, and the

steps taken to prevent or reduce those stresses.

Report on chemical and cement grouting to reduce water leakage : Domtar no. 3 gypsum mine, Caledonia, Ontario

Georgetown, Ont. : Groundation Engineering Contractors Ltd., 1990. 31 p. : ill. CANMET contract: 99121-01-SQ.
MICROLOG 91-00373 1 fiche

In the spring of 1990, the Domtar no. 3 gypsum mine in Caledonia, Ontario was experiencing significant water inflows in one part of the mine. To reduce the flow rate permanently and stop the dissolution of the gypsum by the water, it was necessary to cut off all leakage into the mine. This report describes the grouting program used to reduce the inflow by filling the voids and by cutting off the flow of water from reaching the mine. The program utilized both cement grout, hydrophobic polyurethanes and hydrophilic polyurethanes. The results using these materials are compared.

Report on hearing : Village of St. Claude sewage lagoon and discharge route

Winnipeg : Manitoba Environment, Clean Environment Commission, 1990. 32 p. : maps.
MICROLOG 91-00399 1 fiche

The sewage lagoon to service the Village of St. Claude, with a population of about 60, was placed in service in 1970 to receive both sanitary wastes from the community and industrial wastes from a creamery. From a 2-cell aerated lagoon system followed by a storage cell discharge was to a municipal drain which flowed to a drainage ditch and then to a creek. Over the years, there were complaints of odours and seepage, to which various solutions were applied short of rebuilding the storage lagoon. None of these appeared satisfactory. In April 1990, a public hearing was held concerning the continued operation of the sewage lagoon. This report gives the results of the Canada-Manitoba soil survey of the area, the Government of Manitoba presentation, the Village of St. Claude presentation, citizen statements, and the discussion ensuing. Recommendations are included, as well as a list of exhibits and presentations.

Report on mortgages : judicial sales and deficiency claims

Vancouver, B.C. : Ministry of Attorney General, Law Reform Commission of British Columbia, 1991. ii, 35 p. Bibliogr. (Report : LRC 118) ISSN 0843-8908 ISBN 0-7718-9026-5
MICROLOG 91-04911 1 fiche

Where a debt is secured by a mortgage, the process by which the lender recovers the debt is called foreclosure. The law governing foreclosure reflects a careful balancing of the rights of the lender to insist upon repayment of a loan, and the interests of the borrower. In this context, an issue has recently arisen for consideration by the courts: when a borrower defaults, should a lender be permitted to purchase the land that stands as security for the debt and, if so, in what circumstances? Whether there is a need for legislation to settle this point is the subject of this report. It recommends an amendment to the Property Law Act.

Report on Native participation in mining, phase I

Intergovernmental Working Group on the Mineral Industry. Sub-committee on Native Participation in Mining. S.I. : The Sub-committee, 1990. 174 p. : maps.
CSI 55117.201.
MICROLOG 91-03706 2 fiche

In August 1989, the Working Group formed a sub-committee to study the nature of native participation in the mining industry in Canada. The sub-committee's objectives included documenting best practices, with a realistic view of the incidence of the costs and benefits of each and identifying new ways of matching native lifestyles with mineral industry employment opportunities; identifying the concrete steps which governments, mining companies, native groups and individuals could take to substantially boost native participation in mining; and examining what, if any, incentives could be identified and what legal and structural barriers to development could be removed. Participation was defined broadly to include employment, provision of services by natives or native-owned companies, financial involvement, and input into mine development and regulatory review processes. This report provides a summary of each area of work and also includes the compilation of a selected annotated bibliography.

A Report on road dust suppression in Manitoba

I.D. Systems Ltd. Regina : Environment Canada, Conservation and Protection, Environmental Protection Service, Western and Northern Region, 1989. 18 p.
MICROLOG 91-00634 1 fiche

Dust suppression on minor roads is routinely carried out by municipalities, towns, villages and local government districts during the summer months using various types of oils, calcium chloride, or calcium lignosulphonate. Waste oils used are more likely to be contaminated with PCBs, therefore municipalities which use this oil must comply with the federal regulations for toxicity. The report presents the results of questionnaires or interviews with managers of regional municipalities, towns, cities and villages, as well as officials of the Dept. of Highways and Transportation and the provincial Parks Branch to determine their road dust program. In addition, all commercial suppliers in agency questionnaire responses were interviewed to determine the nature of the products sold for road dust abatement, to confirm some of the reported quantities used by agencies, or to ascertain amounts used in cases where this was not reported by the agency.

Report on status and trends in in vitro toxicology and methodology modifications for reducing animal use

by J.P.W. Gilman. Ottawa : Health and Welfare Canada, 1990. vi, 107, vi, 118 p. Bibliogr. *Bilingual (Rapport sur l'état et les...)*. ISBN 0-662-57744-2
MICROLOG 91-05035 3 fiche

The primary purposes of toxicological testing are the protection of human health and the safeguarding of the environment from excessive manmade contamination. Responsibility for setting safety standards and monitoring their implementation lies mainly with the federal departments of health, agriculture, and the environment. This report discusses in some detail the state-of-the-art of in vitro toxicology and other trends in alternative toxicological testing that may lead to a reduction in the use of animals for these purposes. It covers both the national and international fields, particularly in pharmaceuticals and biologicals. The toxicological testing of consumer chemicals, agricultural chemicals, and foods is also considered in less detail. The report focuses on Canada and the testing R&D undertaken in this country.

Report on the 1989 Fraser River sediment monitoring program

by L.G. Swain and D.G. Walton. Victoria : Fraser Port ; The Province, 1990. vi, 47 p. : ill. Bibliogr. ISBN 0-7726-1275-7
MICROLOG 91-04212 1 fiche

In April 1986, a 5-year agreement was concluded between the Fraser River Harbour Commission and the BC Ministry of the Environment to carry out monitoring in the Fraser River estuary from Kanaka Creek downstream. Monitoring during 1989 was conducted to determine the levels of metals and organic contaminants in the sediments, since such measuring had not been done earlier; to determine the degree to which the values meet provisional water quality objectives for the river; and to determine if values measured immediately following the spring freshet in 1989 were different from those measured just prior to freshet in 1987. Sediments were monitored at 6 sites in the estuary; 2 sites each in the main stem, north arm, and main arm, with 5 discrete samples collected from each site. The samples were analyzed for metals and metalloids, chlorinated phenols and PCBs, phthalate esters, polycyclic aromatic hydrocarbons, and organochlorine pesticides.

A Report on the evaluation of twin arc narrow gap process for field welding of rails : final report

by P. Somsy. Oakville, Ont. : Welding Institute of Canada, 1990. vii, 62 p. : ill. Bibliogr. CANMET contract: 89256-01-SQ.
MICROLOG 91-04677 1 fiche

Rail steels are now generally flash butt welded into transportation lengths and then welded on site by the THERMIT process. However, the failure rate of the welds is high and a safety hazard exists during winter. An alternative welding process is needed, particularly for joining recently introduced heat sensitive rail steels. This project adapted the WIC twin arc pulsed GMA-NGW process to the welding of full rail sections end to end. This was achieved by designing a special welding head to give access to the bottom of the rail joint; using a programmable X-Y cross slide assembly; using a specially designed water cooled copper chill block assembly which progressively supported the molten weld metal as the weld pool moved up the rail section; and modifying the existing dual power welding source developed and patented by WIC.

A Report on the fisheries resources of the lower Nelson River and the impacts of hydroelectric development, 1989 data

by G.M. Swanson. Winnipeg : Manitoba Natural Resources, Fisheries Branch, 1990. ix, 248 p. : ill., maps. (Manuscript report ; no. 91-03) *CSI 41119.012*.
MICROLOG 91-03926 3 fiche

The contribution of headwater lakes to the Limestone River and its tributaries for critical brook trout overwintering habitat is not well known. A fisheries investigation was initiated on McMillan Lake to increase the knowledge of brook trout biology in the area and the responses of headwater trout populations to hydroelectric development. The study also investigated the suitability of McMillan Lake for stock enhancement activities. From August 4-9, 1989, physical and biological investigations were conducted on the lake, including the capture of fish, water sampling, depth sounding for a bathymetric map, the location and extent of emergent aquatic vegetation, inflow/outflow characteristics, beaver activity, and human use. Fish were also captured on February 14, 1990. Part II of the study intensively surveyed the Kettle River and Conawapa Forebay for groundwater upwellings as a first step in assessing the utility of their tributaries for

incubating brook trout eggs.

Report on the Halifax Jamaica women's exchange project

Ottawa : Canada Mortgage and Housing Corporation, 1990. 16 p. : ill.
MICROLOG 91-06249 1 fiche

The idea for an exchange between Black women community activists from Halifax and Jamaica, originated at a workshop held in March 1988 on community organizing in Halifax and the Caribbean. Participants suggested that an exchange between activists from the two communities would be a useful means of developing a starting point for solidarity work, making connection between the local struggles of communities in Canada and the struggles of Caribbean peoples. This document describes the objectives of the program, how participants are selected, the participants themselves, and the program. It contains evaluations and recommendations, and budget information.

Report on the hydrogeological significance of the Oak Ridges moraine : a background paper

Intera Kenting. Toronto : Greater Toronto Area Greenlands Strategy, 1990. iv, 92 p. : ill., maps. Bibliogr. ISBN 0-7729-7392-X
MICROLOG 91-00504 2 fiche

In October 1989, a project was begun to develop options for a Greater Toronto Greenlands Strategy to protect the natural landscape within the Regional Municipalities of Halton, Peel, York, Durham and Metropolitan Toronto, also known as the Greater Toronto Area (GTA). This study reviews existing information on the physiography, soils, geology and natural functions of the moraine area; assesses the significance of the Oak Ridges Moraine as a natural feature in relation to its hydrologic function; identifies those watercourses within the GTA, flowing north and south, that are considered to originate within the moraine area; assesses the significance of the moraine area as a headwater-source area and recharge-discharge area; identifies the implications of uncontrolled land use changes within the moraine area; identifies specific areas of significant recharge-discharge that should be targeted for special development controls; and assesses the implications of aggregate extraction on groundwater and the ability of the area to perform its natural functions as a source area.

Report on the measurement of the air leakage of the test wall panels : drying of walls, Atlantic Canada

Oboe Engineering Ltd. Ottawa : Canada Mortgage and Housing Corporation, 1991. 95 p. : ill.
MICROLOG 91-06006 2 fiche

An investigation was undertaken of the air leakage characteristics of the wall panels installed in the Atlantic Canada drying of wall project test huts, located in Fredericton, Halifax and St. John's. In each house, eight different wall panel constructions were put in place on the south and north sides. Test equipment consisted of a fan system and a metering section. The metering section was a 25 mm tube with a pitot tube installed in the centre of the flow. The pressure was measured with an Airflow Developments Ltd. MK6KD precision electronic monometer. A 25 mm diameter hole was drilled from the inside of the test hut, through the drywall and vapour barrier of each test panel to insert the measurement system and a pressure difference was induced between the cavity of each wall panel and the exterior using the fan and airflow diverter. The pressure difference was stabilized at stages from 0-200 Pa pressure difference of wall

depressurization, and the resultant airflow recorded.

Report on the performance of the Arthabaska Recycling Centre

by C. Michaud. Ottawa : Environment Canada, Conservation and Protection, Environmental Protection, Technology Development Branch, 1991. x, 37 p. : ill. Bibliogr. (Report ; EPS 3/CE/1) French ed. (*Etude sur le rendement du Centre...*) : 91-06643/1. ISBN 0-662-18896-9
MICROLOG 91-05844 1 fiche

This study assesses the actual operational improvements and economic impact of implementing a model waste recycling centre in a medium-sized municipality. The recycling facility is located in Arthabaska, Quebec and is operated by the local garbage-collection company, Gestion Gaudreau Inc. At first, residents were required to separate the recyclables. Since the end of 1988, when collection was turned over to the private sector, all recyclables are placed in one container and trucks collect them without separation. In conjunction with the new collection system, changes were made at the recycling centre, which are the subject of the report. The report gives basic data on the region served, the number of pickup points, the residents' role, and how the amount of waste generated is estimated; an experiment conducted in the Bellevue area of Arthabaska; the existing system and the operation of the centre; the amount and value of materials recycled; an economic analysis; and an environmental analysis.

Report on the provision of electronic media for provincial colleges, institutes, open learning agency components and universities

by R. Carter. Victoria : Centre for Curriculum and Professional Development, 1990. vii, 41 p. ISBN 0-7718-8914-3
MICROLOG 91-01689 1 fiche

This report was commissioned by the Centre for Curriculum and Professional Development. It has been observed that a current, active, carefully chosen inventory of video in support of instruction was not being maintained at the post-secondary level; that information about new curriculum support resources was not widely enough available through the system; that existing clearances and licenses for use were expiring without notice to users; that curriculum developers were not being supported adequately with evaluated media and that funds available were inadequate to undertake these tasks. The intention of this report is to provide background, to outline the current situation in the provision of provincial licensing for instructional video and other media and to recommend organizational structure and required funding.

A Report on the use of methanol in large engines in Canada : Project MILE report

Sypher-Mueller International. Ottawa : Energy, Mines and Resources Canada, 1990. 152 p. : ill. *CANMET contract: OS484-00421*.
MICROLOG 91-02412 2 fiche

The methanol in large engines (MILE) project was initiated in 1984 as a long-term trial of methanol fuelled compression-ignition engines in trucks and buses, operating in regular fleet service across Canada. Each of the four participating fleets had two identical methanol vehicles, matched against two similar diesel vehicles. This report covers project activities up to October 1989, at which point the methanol vehicles had covered almost 1 million km in regular revenue-earning fleet operations and were scheduled to continue until December 1990. This report provides information on the background to the project and its objectives; technical data on the fleet vehicles, their conversion to methanol fuel, fleet refuelling and data collection; operational performance data on the fleets in Manitoba and B.C.; details on

emissions and emission testing and on fuel formulation; an analysis of life cycle costs and benefits; and the barriers to the commercialization of methanol.

Report to CANMET on a review and evaluation of microseismic monitoring techniques, Sydney Coalfield, Nova Scotia

Mississauga, Ont. : Golder Associates, 1990. 213 p. : ill., fold. ill. Bibliogr. *CANMET contract: 99013-01-SQ*.
MICROLOG 91-01592 3 fiche

During the operating life of the no. 26 colliery of the Sydney coalfield, violent dynamic phenomena described as rock and gas outbursts occurred whenever sandstone erosion channels were located within 2.7 m of the coal seam. Although this colliery has been closed, the problem is considered serious and research has continued. This report forms a part of this continuing research program, addressing microseismic monitoring techniques for the prediction of rock and gas outbursts within the Sydney coalfield. The report discusses the interaction between coal and gas which produces outbursts, reviews the work undertaken on the outburst occurrences at no. 26 colliery and draws parallels between these outbursts and those in other countries. An overview of microseismic/acoustic monitoring is given, summarizing the systems identified with coal mining, hard rock mining and evaporite deposit mining. The report then describes a microseismic system designed for use within the Sydney coalfield which is divided into an overall mine environmental monitoring system and local arrays.

Research into the mechanism of brine movement through clay seams around bulkheads in Saskatchewan potash mines : interim progress report

by M.D. Haug and L.C. Wong ; for Central Canada Potash ; a co-operative research program with the Geotechnical Group, Dept. of Civil Engineering, University of Saskatchewan. S.I. : Central Canada Potash, 1990. 57 p. : ill.
MICROLOG 91-01023 1 fiche

A brine inflow can, if large enough and left uncontrolled, flood a mine. While grout for cracks or microfractures above the mining horizon and concrete bulkheads to seal off flooded mine areas are successful, the brine could also migrate around the closing through the potash and clay seams, common to all potash mines in the Saskatoon area. This research program studied the mechanisms of brine movement through clay seams to determine the factors which influence this movement. Large diameter, long-term triaxial permeability-volume change tests were conducted on 200 mm (8 inch) diameter cored clay seam and potash rock samples taken from the Central Canada Potash Mine near Colonsay, Sask. Ten samples were confined under confining pressures varying from 695 kPa (100 psi) to 7000 kPa (1000 psi). This report presents the results of these tests, as well as tests on microfractures at the bulkheads which were confined at 3500 kPa (500 psi) or 7000 kPa (500 psi).

Research on bog preparation and peat sod drying techniques in Newfoundland, 1986-88

Northland Associates Ltd. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1989. ix, 157 p. : ill. Bibliogr. CANMET contract: 51SZ.23216-6-6098. ISBN 0-662-17333-3
MICROLOG 91-01219 2 fiche

The peat deposits in Newfoundland have the potential to supply a portion of the island's energy needs, especially in the areas of the province where there is no other viable biomass supply. However, this potential remains under-utilized due to drainage problems as well as poor natural drying conditions. A 3 year project was begun in 1986 to evaluate modified drainage systems (5, 10 and 20 m ditched fields) through a series of field trials; the effects of the various drainage methods on the drying cycle of peat sods; and the effect of rainfall over time on the water table levels and the moisture content of the in situ peat of the various width fields. A blanket bog on the southern Avalon Peninsula and a slope bog complex in the central region of the Avalon were chosen as test sites.

Research on long-term testing of grouts used underground for control of brine in potash mines : a progress report

by M.D. Haug, A.A. Al-Manaseer, and L. Wong ; for Central Canada Potash ; a co-operative research program with the University of Saskatchewan. S.I. : Central Canada Potash,

1990. 143 p. : ill. CANMET contract: 89211-01-SQ.
MICROLOG 91-01024 2 fiche

Summary of research conducted in 1989 on grouts used to control brine in potash mines. The program is designed to evaluate the long-term performance and suitability of cement and chemical grouts in high pressure brine environments. The first year (1988) concentrated on the development of the testing program and the design and construction of the equipment. Test specimens were prepared and submerged in brine under different confining pressures. During 1989, samples were removed from the containers and tested 3 times (at 40, 90 and 365 days). At each of these times the cement based grouts were measured to determine if any change in volume had taken place and sonic readings were taken to evaluate possible cracking and estimate strength. Selected samples were also examined under a scanning electron microscope to observe apparent changes to structure. The chemical grout samples were visually inspected, measured for changes in dimension and weighed.

Research on materials for offshore structures and Arctic vessels, steels : weldment toughness properties for Arctic and offshore weldments, phase I

by S.R. Bala. Oakville, Ont. : Welding Institute of Canada, 1989. vii, 115 p. : ill. Bibliogr. On cover: Research report. CANMET contract: 69143-01-SQ.
MICROLOG 91-04714 2 fiche

A primary consideration in the writing of standards for Arctic structures must be the avoidance of brittle fracture. The development of elastic-plastic fracture mechanics has enabled quantitative specification of toughness requirements based on design stresses and conceivable flaw sizes, but validation using structural-scale tests is needed to give credence to the calculations. This investigation was conducted to perform wide plate tests on SMAW metal deposited with E48018-1 electrodes produced by a Canadian manufacturer and to validate the prediction of structural performance from the small scale CTOD test results on the same weld metal. Butt welds were prepared in a modified CSA G 40.21 Gr. 350 WT steel using CLA LA 18-Plus electrodes. Welding was performed in the vertical up position with single-V grooves for 25 mm thick plates and double-V grooves for 50 mm thick plates. The welds in 25 mm thick plates were used for CTOD tests and the welds in 50 mm thick plates were used for CTOD, tensile and wide plate tests. This report presents the experimental procedures and the results obtained.

Research on Post-Secondary Education : report of the meeting

Ottawa : Dept. of the Secretary of State, 1988. 18, 19 p. Bilingual (Recherche sur l'enseignement...).
MICROLOG 91-05703 1 fiche

This report on an intergovernmental meeting on Research on Postsecondary education which was coordinated through AUCC (Association of Universities and Colleges of Canada). At this meeting emphasis was placed on information sharing, as well as the exchange of views and ideas. Three areas which emerged as important in the field of postsecondary education were: (1) accessibility to programs through reduced economic and physical barriers, (2) outcome and output of postsecondary education, and (3) managing the postsecondary education system and institutions.

Research on trade policy in developing countries : a survey and assessment of future priorities

by A. Weston and R. Young. Ottawa : International Development Research Centre, 1989. 52 p. Bibliogr. (Manuscript report ; 267e) French ed. (Recherche sur la...) : 91-00543/1.
MICROLOG 91-00542 1 fiche (Available on fiche only)

This document contains two reports. The first reports the results of a survey of trade research being financed or implemented by agencies based in developed countries. While the sample is not complete, it does identify some of the principal topics on which trade research is being conducted. The second chapter provides a more substantive review of the trade policy literature and identifies some gaps which merit further research.

Research resources in national research institutions in eastern and southern Africa

by Z.M. Nyiira. Ottawa : International Development Research Centre, 1991. x, 45 p. : ill. (Manuscript report ; 290e)
MICROLOG 91-04064 1 fiche (Available on fiche only)

In recent years, support by donors and international development institutions for research and development activities in sub-Saharan Africa has increased and resource investment in research has grown. This project collated information on research resources in the national research institutions of Kenya, Malawi, Mozambique, Tanzania, and Zimbabwe. Profiles of the national institutions surveyed are given, along with information on their human and financial resources, institutional linkages, clients for and users of research output, and factors facilitating or limiting research. Appendices detail the number and quality of scientific staff by research sector, their sources of funding, and budget allocations on administration and research.

Réseau TADPA-Québec : banque de données physico-chimiques, 1983-90

par D. Fortin. Québec : Environnement Canada, Conservation et protection, Région du Québec, Centre Saint-Laurent, 1990. vi, 81 p. Bibliogr.
MICROLOG 91-02064 1 fiche

En 1982, la Direction de la qualité des eaux de la Direction générale des eaux intérieures procédait à la mise sur pied d'un réseau national de surveillance de l'acidification des eaux de surface de l'Est du pays. En 1990, le réseau TADPA-Québec comprenait 64 lacs couvrant huit régions homogènes. Un premier rapport sur la banque de données fut produit en 1988 pour les cinq premières années du réseau (Haemmerli, 1988). Le but de ce rapport est de présenter la base de données validées résultant des sept premières années d'échantillonnage, et de permettre ainsi d'y référer pour des travaux futurs.

Results of 1986 water quality objectives compliance monitoring International Saint John River Basin

by D.M. Lockerbie. Moncton, N.B. : Environment Canada, Inland Waters Directorate, Atlantic Region, Water Quality Branch, 1987. v, 73 p. : ill. Bibliogr.
MICROLOG 91-03740 1 fiche

This report compares the 1986 water quality data for the international Saint John River with the water quality objectives for selected parameters. Data from grab sampling at 11 sites in the basin on 5 separate occasions are compared to the 'safe' and 'acute' objectives. Parameters tested included water temperature, dissolved oxygen, pH, total phosphorus, total dissolved phosphorus, extractable aluminum, dissolved aluminum, and extractable copper, lead, zinc and mercury.

Results of a survey conducted in November, 1990

S.I. : Tsitika Follow-Up Committee, 1991. 3 v. : ill. Contents: Vol. 1 : Summary of results -- vol. 2 : Detailed results -- vol. 3 : Comment books and submissions.
MICROLOG 91-05108 2 fiche

In the last week of November 1990, a series of 5 information sessions were presented to the general public on the planning and progress in the Tsitika Watershed. At the sessions, a public response survey was conducted to capture opinions on a number of issues related to the Tsitika and to obtain suggestions for improvements to the plan and planning process. Vol. I presents a summary of the report, vol. II presents the results of the survey with more detail of the comments and suggestions made by survey respondents, and vol. III contains the comments made in the comment books at the information sessions and the prepared submissions of the visitors handed in at the sessions.

Results of FIBEC test program at Canadian Forces Base Halifax Dockyard

by F.D. Friedrich and V.V. Razbin. Ottawa : Canada Centre for Mineral and Energy Technology, Energy Research Laboratories, 1991. iii, 32 p. : ill. (Report ; ERL 91-37(IR))
MICROLOG 91-07085 1 fiche

As part of the national management plan for NOx control, emissions regulations have been drafted for industrial boilers. National Defence Canada, as a major boiler owner, has undertaken to demonstrate low-NOx burners in two plants, one fuelled by natural gas with no. 2 fuel oil backup and the other fuelled by Bunker C oil. This report describes the results of combustion tests in the second plant containing a package watertube boiler at CFB Halifax Dockyard which has been retrofitted with a heavy-oil burner employing flue gas recirculation (FGR) and a limited amount of air staging. Tests were conducted with no. 6 Bunker C oil, with and without FGR, over the load range of the boiler. Both efficiency and emissions were measured.

Results of limnological investigations carried out in 1986 on 5 coastal and interior lakes in British Columbia

by B.H. Nidle...et al. West Vancouver, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, West Vancouver Laboratory, 1990. iv, 213 p. : ill. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 806) ISSN 0706-6465
MICROLOG 91-03644 3 fiche

In selected BC sockeye nursery lakes which are nutrient-limited and which exhibit density-dependent growth of juvenile sockeye, lake

fertilization has been a particularly successful sockeye enhancement technique. This report presents limnological data collected from 5 lakes (Adams, Chilko, Nimpkish, Quesnel, and Sproat), two of which were fertilized in 1986, with the remaining 3 lakes being candidates for sockeye enhancement. Twenty locations in the 5 lakes were sampled (from 6-11 times per lake) for a variety of physical, chemical, and biological variables. Raw and summarized data for each station and date, along with temperature and in vivo fluorescence data are also presented.

Results of two tests conducted to evaluate the wear resistance of concrete due to ice abrasion

Fleet Technology Limited. Kanata, Ont. : The Corporation, 1990. ii, 73 p. : ill. Bibliogr. CANMET contract: 99207-01-SQ.
MICROLOG 91-04687 1 fiche

The wear resistance of concrete to abrasion by ice is of concern for concrete structures placed in ice-infested waters. At present, there is little data to evaluate this issue and appropriate procedures and test methods for evaluating concretes are not yet standardized or calibrated with field experience. A method was developed to evaluate the wear resistance of concrete due to ice abrasion in the laboratory and a number of test programs have been carried out to build up a database using this method. This report documents the results of two more tests. The tests were conducted in a cold room using a test machine that had been previously developed for concrete abrasion testing. Abrasion-only tests were conducted during this test program by

continuously rotating the concrete specimens while an ice block was pressed against them. The contact force was held constant (at 14kN) and the rotational speed of the cylinders was maintained at 43.6 revolutions per minute. A total of 10 ice blocks were used during each test for 164 and 146 hours.

Review and analysis of economic achievability assessments of environmental protection expenditures

by KPMG Peat Marwick Stevenson & Kellogg ; in association with Apogee Research International, Ltd. Toronto : Environment Ontario, Policy and Planning Branch, 1990. vii, 151 p. Bibliogr. ISBN 0-7729-7804-2

MICROLOG 91-02525 3 fiche

The Ontario Ministry of the Environment has decided to put in place major initiatives aimed at virtually eliminating toxic contamination of the water, air, and land by setting contaminant levels for effluents and allowable emissions levels in air, using technology-based criteria. In the US, where they were developed, some of the control methods are implemented as 'economically achievable' (EA). A detailed understanding is therefore needed of the various definitions of this term. This study identified and critically reviewed the origins and definitions of the term and the operational criteria used to implement the concept; provided worked examples of operational and empirical criteria that can be used to judge what level or degree of environmental protection is 'economically achievable'; and evaluated the criteria defined. The use of the term in the

US and in OECD countries is also considered and private sector financial analysis methodologies are discussed.

Review of Lecontvirus, a nuclear polyhedrosis virus, with special emphasis on the aquatic environment -- Draft.

by G.A. Surgeoner and M.J. Farkas. Toronto : Ministry of the Environment, Water Resources Branch, Aquatic Criteria Development Committee, 1989. 26 p. Bibliogr. MICROLOG 91-05295 1 fiche

Lecontvirus is a biological insecticide registered in Canada for the control of the red-headed pine sawfly. The Ontario Ministry of Natural Resources has recently completed a draft class environmental assessment (EA) for timber management on Crown lands. Under this class EA, the Ministry proposes to use Lecontvirus for control of the red-headed pine sawfly. The potential for this biological insecticide to enter surface water during and after application to timber lots is of potential concern. This document provides current information about this compound with particular emphasis on protecting surface waters. The document covers the production process, impurities, spraying and application practices, environmental fate, host specificity, virulence, aquatic toxicity, health effects to humans and non-target terrestrial animals, and methods of enumerating Lecontvirus in aquatic samples.

Review of Ministry end result specifications

by J.L. Burati and S.N. Amirkhanian. Toronto : Ministry of Transportation, Engineering Materials Office, 1990. ii, 79 p. : ill. Bibliogr. (Report ; MI-140) ISBN 0-7729-7988-X MICROLOG 91-03652 1 fiche

This report summarizes a review of certain end result specifications and some of their supporting documents. The review was conducted on the statistical aspects of the specifications, and did not attempt to judge or to validate the technical requirements. Factors such as statistical flaws, levels of risk to the owner and seller, and the operating characteristics of the acceptance procedures were considered. Where appropriate, operating characteristics curves were developed by computer simulation which assumed that the underlying distribution of the material in question was normal, although no data were available to verify this assumption. Reviews were conducted on soils and aggregates, concrete materials and bituminous materials.

A Review of natural lodgepole pine regeneration in the Chilcotin

by R.D. Eremko. Victoria : Forest Resource Development Agreement, 1990. v, 35 p. Bibliogr. (FRDA report ; 126) ISSN 0835-0752 ISBN 0-7726-1163-7 MICROLOG 91-01079 1 fiche

Lodgepole pine accounts for roughly 50 per cent of the total annual harvest from forests in the Cariboo forest region. In the past, openings in this region were left to naturally

regenerate with lodgepole pine, leading to inadequate, patchy, and excessive stocking. This review provides a summary of the stocking status and density of naturally regenerated, juvenile lodgepole pine in this area. In addition, the re-establishment success, or failure, of lodgepole pine is assessed in relation to site characteristics and treatment history. A summary of literature on the natural regeneration of lodgepole pine is also included and areas of further research are recommended.

Celgar Pulp Company proposes to expand its bleached kraft mill on the Columbia River, at Castlegar, B.C. The project includes the construction of a new, continuous fibre line and a modern bleaching plant with expanded capacity to accommodate the fibre line. The project is being subjected to B.C.'s major project review process, with the company filing environmental and socio-economic impact reports in December 1989. The reports were reviewed and made available to the public. This report describes the proposed project and the review process; presents a history of the review; gives a summary of public and agency comments; and includes conclusions and recommendations. Appendices include the information requirements for a stage II report, terms of reference for an independent review panel, results of a preliminary archaeological assessment, comments from both provincial and federal government agencies, and terms of reference for a socio-economic impact study.

Review of prospectus for Newstech Recycling Inc.'s de-inking plant

British Columbia. Steering Committee of the Major Project Review Process. Victoria : Ministry of Environment ; Ministry of Regional and Economic Development, 1990. 120 p. ISBN 0-7726-1196-3 MICROLOG 91-02248 2 fiche

Newstech Recycling Inc. is proposing to establish western Canada's first newsprint de-inking facility in Coquitlam, B.C. The proposed plant is designed to use 140,000 air dry metric tonnes of old newspapers and magazines, from B.C. and other western provinces, to produce 122,500 metric tonnes of recycled fibre suitable as a replacement for virgin fibre, in the manufacture of newsprint. Newstech submitted a prospectus on April 26, 1990 which provided an overview of the project and addressed the potential environmental and socio-economic impacts of the project. The project was reviewed by government and the public, including various environmental groups. This report describes the project and its environmental and socio-economic impacts, the project review process, summarizes the public and government agency comments, and presents the decision of the major project steering committee review.

A Review of studies on western Canadian grain transportation policies

by W.A. Kerr...et al. Ottawa : Agriculture Canada, Policy Branch, 1991. 71 p. Bibliogr. (Working paper ; 6/91) MICROLOG 91-03512 1 fiche

This document was prepared to estimate the economic impact on Canadian agriculture and related industries of various options for change in the Western Grain Transportation Act. The report reviews previous studies undertaken from 1975-80 taking particular care to ensure that the studies reviewed covered the widest possible geographic area, not just the Prairie provinces. A large number of farm groups and other interested parties were contacted to

ensure that no major research efforts in the private sector had been overlooked and that their major concerns had not been excluded. The report includes a history of government regulation of grain freight rates in Canada, and the analytical issues pertaining to the study of the grain handling and transportation system, including elasticities, the dynamics of herd size adjustment, regional feeder cattle market linkages, and consumer and taxpayer effects.

A Review of survey life estimates as they apply to the area-under-the-curve method for estimating the spawning escapement of Pacific salmon

by C.J. Perrin and J.R. Irvine. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, Pacific Biological Station, 1990. vii, 49 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1733) ISSN 0706-6457 MICROLOG 91-01189 1 fiche

Escapement estimates provide a basis for setting exploitation rates and for assessing the effect of exploitation or habitat manipulation on stocks, as well as for comparing and contrasting management policies using stock-recruitment relationships. Several methods are available to estimate escapement, but for any one spawning run they can field widely different results. This report reviews estimates of 'survey life' (SL) (the number of days that mature salmon are alive in a survey area) for Pacific salmon. SL is an important parameter in the area-under-the-curve (AUC) method often used to estimate the spawning escapement of Pacific salmon. The report assembles data from many sources to determine if variation in SL measurements collected for the 5 species of Pacific salmon found in B.C. can be explained by biological and environmental variables. The study determined if extrapolation of SL estimates among streams and years is valid when the AUC method is used to estimate escapement.

A Review of the modified wood pulping and bleaching processes proposed for Alberta-Pacific Forest Industries Inc. pulp mill

Alberta-Pacific Scientific Review Panel. Edmonton : The Panel, 1990. 65 p. : ill. Bibliogr. MICROLOG 91-02240 1 fiche

Alberta-Pacific Forest Industries Inc. (Alberta-Pacific) proposes to build and operate a bleached kraft pulp mill near the Town of Athabasca. Effluent from the mill would be given secondary treatment and be discharged into the Athabasca River. An environmental impact assessment review undertaken by a joint provincial-federal board recommended that the project not proceed, mainly because of concerns about the discharge of chlorinated organic compounds into the Athabasca River. Alberta-Pacific released details of revisions to the pulping and bleaching processes at the proposed mill and a scientific review panel was then created by the Alberta government to assess the technical feasibility of the proposed revised design. The panel conducted a two-

month assessment of the revised proposal, including assessing technical material, requesting information from experts, visiting a pulp mill which uses a similar process, and holding a public workshop. This report presents the results of the review.

A Review of the Nass River test fishery biological program for 1990

by D.R. Southgate. Prince Rupert, B.C. : Dept. of Fisheries and Oceans, 1991. iv, 72 p. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 835) CSI 21105.044. ISSN 0706-6465 MICROLOG 91-04066 1 fiche

The Nass River test fishery has been operating annually since 1963, with little change from the original program. The test fishery occurs on the lower Nass River near Monkley Creek, approximately 16 km from the commercial fishing boundary near Kincolith. This report presents information for 1989 on the daily catch of all salmon species and steelhead trout, giving age, sex and length for sockeye and age, length, sex and flesh colour for chinook salmon. Set times and duration, position in the tide cycle and daily index calculations for sockeye and chinook are also presented. In addition, sockeye escapements are presented along with historical relationships between the annual test fishery index for sockeye and the actual escapement count from the spawning grounds.

Review of the timber supply analysis process for B.C. timber supply areas : final report, vol. I

Victoria : Ministry of Forests, 1991. 43 p. Bibliogr.
MICROLOG 91-05700 1 fiche

Allowable annual cut (AAC) for timber resources is determined after considering a wide range of social, economic and biological factors. A major source of information about the timber production possibilities of a timber supply area (TSA) is the timber supply analysis, which has recently been the subject of concern. An internal review was initiated in 1990 of the procedures and information used in setting AACs. Staff was interviewed on their perceptions and opinions about AACs in their areas, then the information gathered was grouped into the general areas of forest inventory quality and application; timber supply analysis procedures; field practices vs. timber supply analysis assumptions; and timber supply analysis policy and administration. This report describes the primary findings of the review and makes recommendations on the major issues arising out of the investigation.

A Review of the women in development process

by F.L. Kirson. Vancouver, B.C. : University of British Columbia, Centre for Human Settlements, 1990. 9 p. Bibliogr. (CHS research bulletin) ISSN 0843-7882
MICROLOG 91-02615 1 fiche (Available on fiche only)

In the last decade and a half much discussion and debate has taken place in the international development community with regards to women and the development process--most of it by women themselves. Recently, the momentum has increased to the point where it is not only fashionable but required that development proponents must account for the effect of their projects and programs on women, and ideally, on the level at which women will participate. Agendas to address improving the lives of women through the development process currently stretch into the year 2000. This paper examines the way in which the global 'Women In Development' process has taken shape since the early 1970s. It reviews the process in terms of participation, sheds light on the current situation, and identifies areas requiring the attention of planners and researchers.

Ottawa : Environment Canada, 1988. 68 p. : ill. MICROLOG 91-05938 2 fiche

The purpose of this plan is to provide direction for the provision of Rideau Canal services, facilities, and programs. This will enable visitors and potential visitors to enjoy and understand the heritage resources and recreational opportunities of the Rideau Corridor. CA CU ON

The Right to a healthy environment : an overview of the proposed Environmental Protection Act

by T. McMillan. Ottawa : Environment Canada, 1990. 25 p. MICROLOG 91-02736 1 fiche

This document presents an overview of draft legislation for an Environmental Protection Act that will give the federal government broad new powers to manage toxic chemicals and minimize further contamination of the environment. The proposed act consolidates provisions currently spread over several federal acts. This draft is being released for discussion with other governments, environmental groups, industry, labour and the general public. CA EV HE SC

Rights of passage : a review of selected research about schooling in the transition years

by A. Hargreaves...et al. Toronto : Ministry of Education, 1990. vii, 250 p. Bibliogr. French ed. (Droits de passage...) : 91-01363/4. ISBN 0-7729-7700-3. MICROLOG 91-01349 3 fiche

This report looks at the characteristics and needs of early adolescence, and analyses research on the experience of transition to secondary school. It concentrates on the curriculum for the transition years, and examines the process of assessment and evaluation. Finally, it discusses French Language issues and their implication for the transition years. ED ON PR

Risk assessment/management study of rail corridors in the city of Toronto

for the City of Toronto, Planning and Development Dept. ; by Concord Scientific Corporation. Toronto : The Corporation, 1990. xvi, 158 p. : ill., maps. Bibliogr. CSI 89181.223. MICROLOG 91-00776 2 fiche

The study was conducted to assist Toronto's Planning and Development Dept. in its examination of suitable land use regulatory measures for rail corridors within the city

where public safety-risk must be of prime consideration. The intent was to extend the large area risk assessment and management study undertaken in 1986-87 for the Toronto Area Transportation of Dangerous Goods Task Force. Specific attention is given to the hazards posed to the public by dangerous goods rail traffic through the city, particularly along the main freight corridor (the CP Galt and North Toronto railway subdivisions). Cette publication apporte de brèves réponses à des questions types reçues par le Service des demandes de renseignements du CCHST au sujet des dangers que les champs électromagnétiques produits par les TEV peuvent présenter pour la santé des opérateurs. ● CA HE LA

River systems planning study for selected rivers in New Brunswick

prepared for New Brunswick Dept. of Tourism, Recreation and Heritage ; by Washburn and Gillis Associated Ltd. ; in association with Fiander-Good Associates Ltd. ; and A. Feunekes, R. Stocck [and] H. Hinds. Fredericton : Washburn and Gillis Associates Ltd., 1990. 2 v. Bibliogr. Contents: Vol. 1 : Main report - vol. 2 : Summary, conclusions and recommendations. MICROLOG 91-06045 5 fiche

This study developed and implemented a systematic method for selecting rivers in NB which merit special consideration for nomination to the Canadian Heritage Rivers System, and also merit possible further consideration as significant provincial heritage resources. The study also assessed the management feasibility of each river by determining and evaluating various issues which affect the potential for rivers to be managed. A checklist of factors to be considered in assessing the heritage, recreational, and integrity values of the 24 rivers was developed, using other province's procedures as guidelines. Information on all significant natural heritage, human heritage, and recreational values relevant to the study rivers was then compiled and evaluated. The management feasibility study involved a literature review, interviews with government personnel involved in water and land management, and a review of applicable federal and provincial regulatory regulation. Rock bolting practical guide

by P. Choquet. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, 1991. xii, 267 p. : ill. Bibliogr. (CANMET special publication ; SP88-15E) ISBN 0-660-13994-4 MICROLOG 91-05150 3 fiche

Rock bolting is the most commonly used method to support mine galleries and is also widely used in mining stopes. This guide is the result of a series of meetings, field studies, and review of the literature covering presently used bolting practices and the state of knowledge on this subject. The guide describes the mechanisms generally used to explain the effects of rock bolting, details the 4 principal types of support bolts in present use and the selection of rock bolting characteristics (bolt length and spacing) as a function of ground conditions. Appendices give a detailed discussion of test results, calculation methods, and other specific points. CA CM NR PS SC

Rock mechanics assessments of slope deformation and slope instability in the Cassiar open pit

by Cassiar Mining Corporation, and Piteau Associates Engineering Ltd. S.I. : The Corporations, 1990. vi, 178 p. : ill., maps, fold. map. Bibliogr. CANMET contract: 99227-01-SQ.

MICROLOG 91-00369 3 fiche

Cassiar Mine is located in steep mountainous terrain in northern B.C., about 1200 km north of Vancouver. During development of the final phase of the open pit, instability developed in the approximately 1100 foot hanging wall (east wall) slope. This report describes the failure mechanism that was identified, the results of back analyses of the failure and the measures undertaken by the mine to enable continued mining and recovery of the available ore.

Le Rôle et la fonction des ports dans le système Saint-Laurent

par B. Slack...et al. Montréal : Université de Montréal, Centre de recherche sur les transports, 1991. 27 p. Bibliogr. (Publication ; no. 782) MICROLOG 91-05308 1 fiche

Les pages de ce document cherchent à répondre à quelques interrogations. Comment les ports de petite et moyenne taille se définissent-ils? Quelles sont les caractéristiques fonctionnelles de ces ports? La démarche comporte quatre volets. Premièrement, une évaluation des relations entre le trafic et les infrastructures. Deuxièmement, une analyse des ports en fonction de leur rôle économique aux plans local, national et international. Troisièmement, une étude du trafic de marchandises. Enfin, une étude permettant d'établir une typologie des ports de petite et moyenne taille. L'objectif de cette recherche vise à mesurer l'importance du transport maritime régional dans la réponse aux besoins de circulation des marchandises. PR QU SC TR

The Role of data in drought planning and management

by E. Kienholz...et al. Ottawa : Environment Canada, Conservation and Protection, Inland Waters Directorate, Western and Northern Region, 1990. ii, 18 p. : ill., maps. Bibliogr. MICROLOG 91-02062 1 fiche

The decade of the 1980s was characterized by frequent and widespread drought across the Canadian prairies. Despite major efforts to secure stable water supplies, instream and consumptive users both experienced serious shortages. Managing the limited water resources of the Canadian prairies requires accurate and timely data and information on water quantity, quality and use. This paper reviews the data collection programs of the Inland Waters Directorate and describes how data contributes to drought forecasting, impact assessment, research and development, mitigation, institutional response and public information. S'accommoder des pertes sensorielles : l'ouïe

par S. Lai. Ottawa : Conseil consultatif national sur le troisième âge, 1990. 28 p. Bibliogr. (Ecrits en gérontologie ; 8) *L'éd. anglaise (Living with...hearing) sur la même fiche.* ISBN 0-662-96010-6
MICROLOG 91-00083 1 fiche

Plusieurs personnes ignorent les incroyables progrès réalisés dans le domaine des prothèses auditives et du fait que presque toutes les personnes atteintes peuvent maintenant améliorer leur état grâce à une prothèse. Il existe aujourd'hui une grande variété de prothèses auditives et de programmes qui pourraient aider les personnes âgées atteintes de surdité à communiquer. Toutefois, les services de rééducation auditive et autres programmes sont rares au pays, et bien peu d'organismes offrent aux malentendants nouvellement porteurs d'une prothèse une aide quelconque.

S'accommoder des pertes sensorielles : le goût et l'odorat

par M. Krondl. Ottawa : Conseil consultatif national sur le troisième âge, 1990. 16 p. Bibliogr. (Ecrits en gérontologie ; 8) *L'éd. anglaise (Living with...smell...) sur la même fiche.* ISBN 0-662-96010-6
MICROLOG 91-00082 1 fiche

Les troubles chroniques du goût et de l'odorat, ces sens de la perception chimique, ont toujours été négligés parce qu'ils sont rarement fatals et, contrairement à une diminution de la vue ou de l'ouïe, ne sont pas considérés comme un handicap grave. Le goût et l'odorat obéissent à des mécanismes compliqués qui ne sont pas encore compris parfaitement. On sait toutefois qu'ils s'altèrent avec l'âge. Avant de décrire les mécanismes fondamentaux de l'odorat et du goût, le document fait l'examen du rôle de ces sens dans la vie de tous les jours. Il aborde ensuite l'émoussement de ces sens amené par le vieillissement. Enfin, il examine les conséquences de l'altération du goût et de l'odorat et fournit quelques conseils pratiques pour atténuer ces conséquences.

Sample size versus sample number : sampling optimization for trawl caught rockfish

by R.D. Stanley. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1990. iii, 19 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2080) ISSN 0706-6473
MICROLOG 91-01683 1 fiche

Stock assessments for the trawl-caught rockfish fisheries off the west coast have been hampered by a lack of catch-at-age information, caused partly by the large number of rockfish stocks which acts to dilute the waterfront sampling effort. Even when sufficient samples are obtained for a given stock, the resources needed to age the specimens are limiting. These limitations place a premium on optimizing the sampling design. The tradeoff between sample size and number was examined by using collections of aged samples of Pacific ocean perch. Within and among sample variance in proportion-at-age was estimated following the procedure of Cochran (1977) and Chester and Waters (1985). The D-statistic of Kimura (1984) was used to represent the collective multinomial variance of the estimates of proportion-at-age. These estimates were then used to examine the effects of increasing sample size or number on precision.

Sanitation of styroblocks to control algae and seedling root rot fungi

by M. Peterson. Victoria : Forest Resource Development Agreement, 1990. v, 19 p. : ill. Bibliogr. (FRDA report ; 140) ISSN 0835-0752 ISBN 0-7726-1215-3
MICROLOG 91-02323 1 fiche

Most forest nursery seedlings in B.C. are grown in containers molded from expanded

polystyrene beads (styroblocs). With repeated use, the styroblocs are contaminated by pathogenic fungi and algae. Effective methods are needed for sanitizing containers between crops, both because of the expense of new containers and because seedlings are remaining in the styroblocs for longer times. This study addresses the problem of root rot fungi and algae build-up from season to season. The experiments used were designed to assess the effectiveness of a number of current methods used for sanitizing container-nursery styroblocs. Three trials were carried out, with the first two used to identify the most effective sanitizing methods, then the best of those examined in a third trial. The phytotoxicity of the treatments was also assessed.

Saskatchewan horse industry : an economic perspective : final report

by J. Webster and R. Bens. Regina : Saskatchewan Agriculture Development Fund, 1990. xiv, 120 p. : ill. Bibliogr. ISSN 0829-9455
MICROLOG 91-01789 2 fiche

At present, horse racing in Saskatchewan, as an industry, is on the verge of collapse. The objective of this study is to develop an economic perspective of the Saskatchewan horse industry. It is based on statistics on horses and horse owners, determining investment and annual expenses for various categories of horse use and, finally, utilizing this information, in combination with cash inflow and outflow on horse related activities, to develop a total economic perspective.

MICROLOG 91-06510 1 fiche

Recently some dramatic reforms to the legislative process have been proposed by some academics and political parties. They suggest the loosening of party discipline, more free votes in the House and direct involvement of the electorate in creating policy and laws. Other proposals include representation by ordinary citizens through the adoption of a constituent assembly. This document examines the nature of party discipline, its history in Canadian politics and the ways in which the legislative process would be altered if such a reform were introduced in the Legislature.

Satellite-derived daily sea surface temperature maps for areas A to D from 1984 to 1986 : A, Gulf of Maine and mid Atlantic Bight to D, Gulf Stream extension/recirculation

by B.J. Toplis...et al. Dartmouth, N.S. : Bedford Institute of Oceanography, 1990. vi, 138 p. : maps. Bibliogr. (Canadian data report of hydrography and ocean sciences ; no. 85) ISSN 0711-6721
MICROLOG 91-00782 2 fiche

Satellite imagery from the NOAA series has been used to produce daily sea surface temperature maps for specific areas off the east coast of Canada. Each temperature map is accompanied by a visible wavelength map which can be used for basic cloud discrimination. Details of the processing steps for turning satellite infrared image into a SST map are given together with scientific and applications limitations. Details on how to access and use the atlas are also given. Each regional atlas is intended to serve as both a quicklook of available data and as a prototype or pilot atlas to assess regional demands and specifications. Catalogues for the images are presented here which cover such items as the quality of the navigation of each image or map, and the degree of cloud cover as well as the location of a specific map within the archiving system.

Satellite-tracked drifting buoy measurements off Labrador and Newfoundland, 1981-83

by D.B. Fissel and J.R. Birch. Dartmouth, N.S. : Bedford Institute of Oceanography ; Dept. of Fisheries and Oceans, Scotia-Fundy Region, Physical and Chemical Sciences, 1990. ix, 106 p. : ill., maps. Bibliogr. (Canadian contractor report of hydrography and ocean sciences ; no. 38) ISSN 0711-6748
MICROLOG 91-03509 2 fiche

Fourteen satellite-tracked drifting buoys were deployed off Labrador during the autumn of 1981 and the summers of 1982 and 1983. The buoys, tracked through the ARGOS satellite system, were equipped with atmospheric pressure and sea-surface temperature sensors. The data was used in near real-time mode in support of drilling operations by Petro-Canada Inc. This report documents and displays the collected data and presents a preliminary analysis of the positional and velocity data. The analysis and evaluation is complete to December 31, 1983. The combined results of the studies were used to produce summary plots of average surface currents, and velocity characteristics tabulated by bathymetric regime.

Scale effects testing on rock samples from Lac du Bonnet, Manitoba : report no. 2

by R. Jackson. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. iv, 33 p. : ill. Bibliogr. (Report ; MRL 90-075(TR))
MICROLOG 91-05460 1 fiche

As part of the Canadian Nuclear Fuel Waste Management Program, Atomic Energy of Canada Ltd. is characterizing various rock formations within the Canadian Shield to determine their suitability for the long-term disposal of high-level nuclear wastes. The effects of specimen size on the mechanical properties of rocks have produced varying research results. Results from a first test series from the 240-mm level of the Underground Research Laboratory at Pinawa, Manitoba produced no definite results. This report summarizes the individual test results obtained for specimens at 100-mm, 194-mm and 294-mm diameters, indicates trends in mechanical response with specimen size and provides a comparison between observed behaviour and predictions made using the Hoek and Brown (1980), Gyenge and Herget (1977) and Weibull (1939) models.

Scoping meetings for the Federal Environmental Assessment Panel review of the nuclear fuel waste management and disposal concept

Ottawa : Environment Canada, 1990. vii, 57 p. Bibliogr. Technical appendix (i, 125 p.) laid in.
MICROLOG 91-02735 3 fiche

As part of the process for the Environmental Assessment Panel review for the nuclear fuel waste management and disposal concept, scoping meetings are being conducted to establish the basis of the environmental impact statement (EIS) that must be developed by the proponent. This document is a more detailed examination of the oral presentation made by Environment Canada in October 1990. This submission, after providing a background for Environment Canada's interests and responsibilities in this review, presents a series of issues of concern to the department. The issues are grouped into those of general policy and technical interest, as well as those that relate specifically to waste production and storage, transportation, surface facilities, subsurface facilities, geosphere, biosphere, social issues and public participation, economics and financing, modelling, and quality assurance and quality control considerations.

Screening human populations for abnormal radiosensitivity

by N.E. Gentner... et al. Ottawa : Atomic Energy Control Board, 1990. iii, 71 p. : ill. Bibliogr. (Research report ; INFO-0361) CSI 22125.202.
MICROLOG 91-03315 1 fiche

While the majority of human malignant neoplasms can be causally related to environmental agents, there is increasing recognition of the role played by predisposing host factors, such as genetic variations, in response to carcinogen exposure. A relatively rapid and inexpensive *in vitro* 'growback' assay was developed that uses the irradiated vs. the unirradiated re-growth responses of lymphoblastoid cell lines developed from individual donors as an estimator of donor radioresponse. This report presents an estimate of the proportion of strains derived from various study populations that may be regarded as exhibiting abnormal radioresponse.

The study emphasized hypersensitivity, because of the known radiation-hypersensitivity and cancer-proneness associated with the genetic disorder ataxia-telangiectasia.

Scumming of gypsum-bearing Queenston shale

by K.E. Bell. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1987. i, 13 p. Bibliogr. (Report ; MSL 87-2(CR)) MICROLOG 91-04946 1 fiche

Canada Brick Co. Ltd., Streetsville, Ontario has had a problem with a discolouring white scum which appears on burned clay brick manufactured from a Queenston shale deposit in Burlington, Ontario. The source of the scum is assumed to be gypsum, which occurs in nodules in the lower strata of the deposit. This report presents the results obtained in analyzing the impurities (gypsum nodules) and the resultant scum, then conducting a series of wet chemical tests used to evaluate the inhibiting effects of selected promising materials, except alkalis which are themselves scumming agents. The effects of up to 6 of the more promising materials would then be evaluated for scumming in extruded briquettes.

Sea ice observations during LIMEX, March-April 1989

by W.D. Winsor...et al. Dartmouth, N.S. : Bedford Institute of Oceanography, 1990. iv, 44 p. : ill. Bibliogr. (Canadian data report of hydrography and ocean sciences ; no. 81) ISSN 0711-6721 MICROLOG 91-00367 1 fiche

An engineered structure deployed in ice infested waters is vulnerable to static and dynamic forces caused by sea ice. To understand ice-structure interaction, information on ice mass, ice movement, meteorological forcing, ice features and mechanics are required as a basis for laboratory or numerical studies. This report presents ice properties data collected on the northern Grand Banks and Newfoundland shelf during the Labrador Ice Margin Experiment in March and April 1988 (LIMEX '89). The report documents data of sea ice properties collected in M/V *Terra Nordica*, including ice thickness, ice drift, ice temperature and salinity, ice strength, and floe size distribution. Statistics and geographic distribution of these parameters are displayed.

Sea ice velocity fields off Labrador and eastern Newfoundland derived from satellite imagery, 1984-87

by I.K. Peterson. Dartmouth, N.S. : Bedford Institute of Oceanography, 1990. vi, 85 p. : ill., maps. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 129) ISSN 0711-6774 MICROLOG 91-03289 1 fiche

In 1985, a 5-year program was initiated to monitor ice drift off Labrador and eastern Newfoundland using satellite-tracked ice beacons, in order to study the variability of ice drift, and to obtain data for the development and testing of predictive models of ice motion and distribution. While ice beacons provide continuous time series of ice velocity for individual ice floes, spatial and temporal resolution is limited by the low number of beacons deployed. A second method of obtaining ice drift data is by tracking ice features in sequential satellite images using NOAA/AVHRR imagery. Digital NOAA/AVHRR data for the Canadian east coast region have been archived since January 1984, for about one pass per day, at 1800 Z. This report presents ice velocity fields derived from satellite images one day apart for the winters of 1984-

87. Ice velocities from the imagery are compared with those obtained from the ice beacons during the last 3 winters (1985-87). Finally, a short analysis of the effect of geostrophic wind on ice velocities obtained using each method is presented.

Seabird and seaduck movement through the Northumberland Strait, 1990

by C.M. MacKinnon, R.W. Daury and R.J. Hicks. Sackville, N.B. : Canadian Wildlife Service, Atlantic Region, 1991. xi, 87 p. : ill. Bibliogr. (Technical report series ; no. 130) CSI 22210.205. ISSN 0831-6481 ISBN 0-662-18752-0 MICROLOG 91-04376 2 fiche

Cape Jourmain is the most prominent coastal headland in the Northumberland Strait and the most probable beginning point for a fixed-link causeway between NB and PEI. It is also the site of an important wildlife area. To provide pre-disturbance baseline data on the area, an intensive field investigation was conducted in 1989 to document the flora and avifaunal use of the area. As little was known regarding seabird and seaduck movement through the Northumberland Strait, monitoring of this activity was also initiated on a small scale. This report presents the results of 1990 observations, from March 13-May 15 and September 7-December 6, of seaducks and seabirds moving past the headland of Cape Jourmain and through the Northumberland Strait. Additional supporting information from regional authorities was gathered for scoters, Common Eider, Common Loon, Red-necked Grebe and Northern Gannet.

Seapen rearing to maturity of Squamish River chinook salmon

by A.Y. Fedorenko and C.L. Cross. Vancouver, B.C. : Dept. of Fisheries and Oceans, Salmonid Enhancement Program, 1991. vii, 35 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2096) ISSN 0706-6473 MICROLOG 91-03880 1 fiche

The severe depletion of many wild chinook salmon stocks in BC has led to research into the development of broodstock by seapen rearing to maturity. This report describes the seapen rearing project for the 1984 and 1985 brood Squamish chinook. Comparative biological data for the Squamish system chinook were approximated using the Tenderfoot Creek hatchery records for the Squamish, Ashlu and Cheakamus broodstocks captured annually for egg takes. Results of the spawning of the seapen reared salmon, their progeny and a physical sampling are given, along with age composition, length and weight, sex composition, fecundity, and egg retention.

Search and rescue experiment to derive leeway and drift rates for common search and rescue objects, Notre Dame Bay, Newfoundland, summer 1989

by Reg Fitzgerald, John Russell, Don Bryant ; for the Transportation Development Centre, Policy and Coordination Group, Transport Canada. St. John's : NORDCO, 1990. xii, 159 p. : ill., maps. Bibliogr. MICROLOG 91-02513 2 fiche

Report of the results of a search and rescue (SAR) leeway experiment conducted in Notre Dame Bay, Newfoundland, from July 19-September 18, 1989, using the CCGS Hood as a research platform for the experiment. The project developed a detailed methodology for conducting leeway experiments and undertook a field experiment to derive leeway guidance for at least one common SAR object under a variety of environmental conditions. Leeway is defined as the movement of a craft through the water caused by the wind acting on the exposed surface of the craft and is derived by subtracting the current vector from the drift vector. A 4-person Beaufort life raft was tested in various configurations of drogued or undrogued and simulating 2-4 persons aboard. The experiment was done in winds of 0-25 knots and in significant wave heights of 0.1-2.5 metres. The leeway was derived by computing the difference between the SAR object velocity and the current velocity of the upper 1 metre of the water column at the object.

Searching for an alternative to the GST

by N. Brooks. Ottawa : Institute for Research on Public Policy, Studies in Social Policy, 1990. vi, 37 p. (Discussion paper ; 90.C.1)
MICROLOG 91-03043 1 fiche

The debate about the proposed goods and services tax has been hampered by a lack of well articulated and quantified alternatives. This paper attempts to remedy this deficiency by comparing the government's proposed 7 per cent GST with an alternative reform that would involve repealing the manufacturers' sales tax and collecting most of the lost revenue by simply increasing income tax rates. The paper shows that the alternative approach satisfies the primary goals of the government's sales tax reform while avoiding the deficiencies of the GST.

Seasonal trends in the drought code component of the Canadian Forest Fire Weather Index System

by R.S. McAlpine. Chalk River, Ont. : Government of Canada, Canadian Forestry Service, Petawawa National Forestry Institute, 1990. iv, 36 p. : ill. Bibliogr. (Information report ; PI-X-97E/F) *Bilingual (Evolution saisonnière de...)*. ISSN 0706-1854 ISBN 0-662-57669-1
MICROLOG 91-00355 1 fiche

The drought code component of the Canadian Forest Fire Weather Index System is an indicator of long term drought and the associated impact on forest fire management. Thirty-five years of weather data from 35 selected weather stations across Canada were used to develop mean daily drought code average values for each weather station throughout the fire season. The graphs produced provide daily mean drought code values and historical maximum values throughout the fire season, for comparison with observed daily drought code values.

Security considerations and verification of a Central American arms control regime

by H.P. Klepak. Ottawa : External Affairs and International Trade Canada, Arms Control and Disarmament Division, 1990. x, 74 p. : ill., maps. Bibliogr. (Arms control verification occasional papers ; no. 5) *French ed. (Considérations de sécurité et vérification...)* : 91-02372/1. ISSN 0840-772X ISBN 0-662-17971-4
MICROLOG 91-02371 1 fiche

This paper discusses the background to, likely contexts of, and likely difficulties with the verification of a possible Central American arms control regime. It begins with a brief geographic, political and military overview of the regional crisis, setting the stage for the discussion to follow. Further chapters offer an

analysis of the relative threat perceptions of the individual Central American states, the potential for a revision of those threat perceptions based upon a number of factors, including the terrain, the offensive and defensive weapons mix and political factors. It then proposes one possible arms control regime for the region, followed by a more in-depth discussion of what would actually have to be verified under such a regime, how the verifying might in fact be carried out, and who might best do it.

Sediment bioassay research and development

by G. Krantzberg. Toronto : Environment Ontario, Research and Technology Branch, 1990. ix, 74 p. : ill. Bibliogr. ISBN 0-7729-7147-1
MICROLOG 91-02849 1 fiche

Under the 1987 revision of the 1978 Great Lakes Water Quality Agreement between Canada and the U.S., the parties, in cooperation with state and provincial governments, were assigned the task of cooperatively developing and implementing strategies for mapping, assessing and managing contaminated sediment. This study contributed to the development of a methodology for assessing the chronic and acute toxicity of sediments to biota. This included an examination of the effects of bioassay assembly and sediment manipulation techniques to the response of the test organisms, and the sensitivity of growth as a chronic endpoint. An overview of sediment bioassay methods and the design and results of 4 experiments are also included.

Sediment bioassays and sediment core chemistry, Collingwood Harbour, 1988-89 : report

by G. Krantzberg. Toronto : Collingwood Harbour Remedial Action Plan, 1990. 35 p. : ill. Bibliogr. ISBN 0-7729-7576-0
MICROLOG 91-02658 1 fiche

In 1986, sediment bioassays using mayfly nymphs and juvenile fathead minnows demonstrated that sediment from Collingwood Harbour was not lethal during acute exposure intervals. In a limited number of samples, lead residues in bioassay organisms were elevated relative to control organisms, resident infauna, and introduced mussels. The potential for chronic sublethal toxicity was apparent. In November 1988, sediment collection was repeated and bioassay design revised to address several hypotheses. The 1988 study examined the combined importance of bioassay duration, organism sensitivity, and surficial as opposed to bulk sediment chemistry for growth, mortality and bioaccumulation. The study also investigated contaminant profiles in sediment, particularly in proximity to the confined disposal facility of the Shipyard's property.

Sediment data : British Columbia, 1988

Ottawa : Environment Canada, Inland Waters

Directorate, Water Resources Branch, Water Survey of Canada, 1990. xix, 29 p. *Bilingual* (Données...sédiment : Colombie-Britannique...). CSI 22296.028 ISBN 0-662-57438-9
MICROLOG 91-00656 1 fiche

Annual report, arranged alphabetically by station, on streamflow; instantaneous suspended sediment concentration; daily mean suspended sediment concentration; daily suspended sediment loads; dissolved solids concentration; load summary; particle size distribution of suspended sediment in percent sand, silt and clay; bed load and bed material; water temperature when samples were collected; type of sampler; and the single sampling vertical location. A historical sediment data summary includes such information as sampled concentration maximum and minimum; suspended sediment load maximum daily; total for the period; period of record and type of operation for each year of data. A summary for the months of record gives the period of record mean, the mean for period of record and the standard error of mean as a percent. A methodology is also included.

Selection criteria and laboratory evaluation of oilspill sorbents -- update IV.

by S.L. Ross Environmental Research Ltd. ; for the Emergencies Engineering Division. Environment Canada. Ottawa : Environment Canada, Environmental Protection Service, 1991. x, 73 p. : ill. Bibliogr. (Report ; EPS 3/SP/3) French ed. (*Critères de sélection et évaluation...*) : 91-06641/1. ISBN 0-662-18906-X
MICROLOG 91-05857 1 fiche

In 1974, Environment Canada initiated an ongoing program to evaluate commercially available oil sorbents. Many new sorbents have been introduced to the market since the first study. Twelve new sorbents and four sorbents from the previous study (for

comparison) were evaluated in this study, which is the fourth update of the original study. The test liquids used include diesel, crude, and Bunker C oils; and cyclohexane and toluene solvents. Some of the test liquids were aged for one to seven days. The sorbents were evaluated for initial and maximum capacities, water pickup, and reuse potential.

Le Sénat : nominations en vertu de l'article 26 de la Loi constitutionnelle de 1867

par M. Dunsmuir. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 15 p. Bibliogr. (Etude générale ; BP-244F) L'éd. anglaise (*The Senate : appointments under...*) sur la même fiche. ISBN 0-660-93268-7. MICROLOG 91-04881 1 fiche

Quand la Loi constitutionnelle de 1867 a été rédigée, on a longuement discuté de la nécessité d'inclure une disposition permettant au gouvernement en place de nommer des sénateurs supplémentaires pour se tirer de l'impasse en cas de divergences de vues irréconciliables entre la Chambre des communes et le Sénat. Le gouvernement britannique tenait absolument à ce qu'une disposition de ce genre figure dans la loi, si bien que l'article 26 a fini par être rédigé et approuvé. En plus de porter sur ces sujets, ce document examine l'évolution historique de l'article 26 et les circonstances permettant d'invoquer l'article 26.

Senate reform and its impact on Alberta

by T. Neufeld. Edmonton : Legislative Assembly, 1990. 13 p. Bibliogr. MICROLOG 91-01918 1 fiche

This paper discusses the effect of a Triple E Senate on the power base of the Alberta government. Specifically, it puts forward the position that the result of the Triple E Senate will be an undercutting of the power base that the provincial government currently possesses. It discusses this thesis by examining the dynamics of the relationship between provincial and federal governments in Canada. It also gives a quick overview of past strategies pursued by the provincial government. Finally, it speculates on the effects of a Triple E Senate on the provincial government and specifically the province's Premier.

MICROLOG 91-06913 1 fiche

Ce document statistique vise à illustrer la répartition et l'évolution globales de la disponibilité des ressources humaines et matérielles relatives à l'univers des services de santé et des services sociaux sur le territoire québécois. Son objectif est de présenter une vision de ces ressources. Il s'agit d'un recueil statistique assorti d'une analyse strictement descriptive. Pour ce faire, le document illustre l'évolution de la disponibilité des ressources humaines et matérielles au plan provincial, selon la catégorie d'emploi, la classe et le statut des établissements, ainsi que leur répartition par région socio-sanitaire pour la dernière année de la période à l'étude.

Les Serments d'allégeance et la Chambre des communes au Canada

par J.R. Robertson. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 18 p. Bibliogr. (Etude générale ; BP-241F) L'éd. anglaise (*Oaths of allegiance and the Canadian...*) sur la même fiche. ISBN 0-660-93265-2
MICROLOG 91-04884 1 fiche

On s'est interrogé, récemment, au sujet du serment d'allégeance que doivent prêter les députés. Cette question comporte deux aspects fondamentaux. Premièrement, est-il nécessaire de prêter serment, et quelles seraient les conséquences d'un refus? Deuxièmement, quelles conséquences la violation d'un serment entraînerait-elle, et comment pourrait-on établir la validité d'une pareille allégation? Ce document traite des principales questions touchant la prestation du serment d'allégeance. On y examine les précédents survenus au

Canada et en Grande-Bretagne, ainsi que certains des arguments qui pourraient être présentés.

A Serological, hematological, parasitological and biochemical survey of domesticated elk herds : technical/final report

Regina : Saskatchewan Agriculture Development Fund, 1990. 6 p. ISSN 0829-9455
MICROLOG 91-01762 1 fiche

With the expansion of game farming in Saskatchewan, it is important to determine normal values for this population for future comparative studies as well as for herd health purposes. This report established normal hematological and biochemical values for domesticated elk; obtained serum samples for serological data collection on potential infectious disease exposure; and stored and froze serum samples for retrospective serological studies on infectious diseases which may be epidemiologically significant in the future. A total of 89 animals were tested for complete blood counts, large animal chemistry profile, T4, iron and T.I.B.A., electrophoresis, copper, vitamin A, vitamin E, selenium, progesterone in females, fecal ova and parasites, and serology (B.V.D., I.B.R., R.S.V., leptospirosis, and brucellosis).

Les Serres

par T.J. Blom, F.J. Ingratta et J. Hughes. Toronto : Ministère de l'agriculture et de l'alimentation, 1991. 63 p. : ill. Bibliogr. L'éd. anglaise (*Greenhouses*) : 91-05982/1. ISBN 0-7729-5156-X
MICROLOG 91-05983 1 fiche

Les serres ont été conçues pour permettre la production de plantes pendant les périodes où c'est impossible à l'extérieur. La construction d'une serre exige que l'on comprenne toute une variété de facteurs. Ainsi, pour la production très spécialisée de plantes, toutes les conditions doivent être maintenues uniformes en tout point de la serre. Ce document examine la question en insistant surtout sur la structure de la serre, le climat de la serre, la régie du climat de la serre, les coûts et revenus, et les fournisseurs pour serres.

Le Service au public : pour discussion

Fonction publique 2000 (Canada). Ottawa : Fonction publique 2000, 1990. 13, 11 p. Bilingue (*Service to the public...*). MICROLOG 91-00531 1 fiche

En 1989, le gouvernement du Canada a lancé Fonction publique 2000, une initiative de renouvellement de la fonction publique du Canada visant à aligner la fonction publique, c'est-à-dire sa structure interne et les pratiques en vigueur en son sein, sur les exigences de la présente décennie et de la suivante. Dix groupes de travail ont été formés, chacun

d'eux chargé d'étudier certains aspects de l'objectif principal, et l'un d'eux en particulier ayant le mandat de se pencher sur la question du service au public. Les attributions de ce groupe étaient les suivantes: étudier la prestation de services existante, noter les aspects susceptibles de faire l'objet d'une amélioration et formuler des recommandations à cet égard.

Sex equity in our schools : a guideline for action

Fredericton : Dept. of Education, 1989. 12 p. MICROLOG 91-06372 1 fiche

In 1987 a document on sexual equity in education entitled 'Educational Opportunities for Girls and Boys - A Commitment to Sex-Equity' was produced by the Ministry which lead to the current document outlining guidelines for sexual equity in New Brunswick schools. Sexual equity is defined here as issues which touch on male/female equality. The lack of adequate role-models for female students, as well as sexist language and the sexism in the school environment are discussed. This document describes methods of eliminating and detecting sexual bias at the district or school administrative levels in the school curriculum, how to assess instructional materials, in student services, how to help students at risk

(dropouts), how to prevent sexism in school organization and administration, and how to prevent it in co-curricular/extra-curricular activities.

Short term electric load forecast, 1990/91-1995/96

B.C. Hydro. Forecasting Development. Victoria : The Dept., 1990. v, 22 p. *CSI 38100.008.* ISSN 1183-1510
MICROLOG 91-02378 1 fiche

Beginning in 1990, two electricity load forecasts were developed, for short (the next 6 years)

and long (next 20 years) term forecasting. This document presents the 1990 short term forecast of gross electric requirements to 1995/96. This forecast will be updated at least annually and monitored continually, with a review of major forecasting assumptions on a quarterly basis. Three load growth scenarios were prepared, all of which assumed that economic growth for the next two years will be moderate. For the following three years, the base forecast assumed expected load additions will be realized, while the low forecast assumed very slow economic growth and the high forecast assumed faster economic growth. The impact of these forecasts on residential, commercial, industrial and other sales is given, as well as on the Power Smart programs. A sensitivity analysis for each sector is also included.

A Shortest path algorithm for networks with time dependent link travel times

by O. Drissi-Kaitouni. Montreal : Université de Montréal, Centre de recherche sur les

transports, 1990. 8 p. Bibliogr. (Publication no. 715)

MICROLOG 91-04084 1 fiche

This paper describes an efficient shortest path algorithm for networks that have time dependent link travel times, such as dynamic networks. The proposed algorithm is an extension of the Dijkstra's shortest path algorithm that takes into account the arrival time of flows at nodes in order to handle the time dependent link travel times. The proposed algorithm keeps the logarithmic complexity of Dijkstra's (when using heaps) plus a linear part related to the study horizon (number of periods of time).

Shrubs and Tree Fodders for Farm Animals : proceedings of a workshop

editor, C. Devendra. Ottawa : International Development Research Centre, 1990. xii, 349 p. : ill. Bibliogr. (Proceedings series ; 276e) ISBN 0-88936-556-3
MICROLOG 91-01858 4 fiche (Available on fiche only)

Results of an international meeting on the use of shrubs and tree fodders by farm animals in Africa, Central America, Pakistan, India, Nepal, Bangladesh, Sri Lanka, Thailand, Malaysia, Indonesia, the Philippines, and China. Through 26 papers, the workshop addressed feed-

resource availability, use by ruminants and nonruminants, processing methodology, economics, development issues, and country case studies detailing prevailing situations and policy matters. A special session was held to discuss the successful development and results achieved in the 3-strata forage system in Indonesia. The workshop concluded with working group discussions on the priorities for further R and D, and on the potential for the wider use of shrubs and tree fodders in the developing world.

Silane coupling agents to reduce moisture susceptibility of asphalt concrete

by D.F.E. Stolle. Toronto : Ministry of Transportation, Research and Development Branch, 1990. iii, 80 p. : ill. Bibliogr.
MICROLOG 91-02539 1 fiche

Moisture damage to asphalt concrete is regarded as a serious problem which is often responsible for the premature deterioration of asphalt pavements. A common procedure for improving an asphalt concrete's durability against moisture damage is the addition of an antistripping agent to the mix. This report describes research on the effectiveness of silane coupling agents for improving the asphalt cement-aggregate bond and reducing the moisture susceptibility of asphalt concrete. The project included a brief synthesis from the current practice and literature on stripping and the use of silane coupling agents for reducing stripping; selected suitable silanes compatible with asphalt cement; evaluated the compatibility between asphalt cement and various Ontario aggregates in the presence of antistripping agents using the Japanese Petroleum Institute test and the immersion Marshall test; and compared the effectiveness of silanes to that of existing antistripping agents for improved performance.

The Silviculture labour force in eastern Ontario : a socio-economic profile

by L. Ruogo. Ottawa : Forestry Canada, 1991. 73 p. : ill. Bibliogr. (Information report ; DPC-X-33E) French ed. (La Main-d'oeuvre sylvicole...) : 91-040371. CSI 22189.200.

ISSN 0705-324X ISBN 0-662-18530-7
MICROLOG 91-04038 1 fiche

Little information is available on the labour force in the forest management services industry, with the exception of two 1987 studies from B.C. This report augments this information with data gathered in eastern Ontario in a joint 1989 study by Forestry Canada and the Ontario Ministry of Natural Resources. Silviculture workers were surveyed in forest renewal, site preparation, stand tending, and nursery activities areas. The survey covered personal, social, economic and occupational areas, and was conducted through interviews with the workers.

Single surface treatment or dust control on gravel roads?

by R.C. Aquino... et al. Toronto : Ministry of Transportation, Materials Information, Engineering Materials Office, 1991. 28 p. (Materials information report ; MI-148) ISBN 0-7729-8787-4
MICROLOG 91-06788 1 fiche

The cost of maintaining gravel roads has increased significantly in recent years, although surveys carried out in Ontario and elsewhere in Canada have indicated that overall costs could be reduced by placing a single surface treatment as the riding surface. The break-even point was estimated to be about two years of service. To verify this, a trial was begun in 1987 to place a number of single surface treatment test sections on township roads and compare the performance and maintenance costs with adjacent gravel road sections. Six townships volunteered for the project and eight sections of single surface treatment were constructed and monitored. This report describes the construction of the test sections and the findings up to the fall of 1990, as well as some observations on the environmental impact of maintaining a network of gravel roads.

Size and scale characteristics of upper Yukon River juvenile chinook salmon *Oncorhynchus tshawytscha*

by C.B. Murray...et al. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, Pacific Biological Station, 1990. iii, 19 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1767) ISSN 0706-6457
MICROLOG 91-03662 1 fiche

Chinook salmon migrate seaward either during their first spring and summer (ocean-type) or after one or two years in freshwater (stream-type). The tendency to remain a year or longer in freshwater is determined by the harshness of the rearing environment. Salmonids reared in severe environments with short growing seasons may not develop an annulus on their scale at the end of the first growing season. This paper compares circulus counts and size among 15 upper Yukon River tributary populations of juvenile chinook salmon collected in late August 1987 and between May 26 and August 20 in 1988 and examines the timing of freshwater annulus formation.

Small ship cruising in British Columbia : market demand and product assessment

prepared by the DPA Group Inc. [and] Data Decisions Group Inc. Ottawa : Industry, Science and Technology Canada ; Victoria : Ministry of Tourism ; Ministry of Regional and Economic Development, 1990. 115 p. ISBN 0-7718-8956-9. MICROLOG 91-01679 2 fiche

The cruise segment of the tourism industry has enjoyed increasing popularity in recent years as an attractive vacation experience. The purpose of this study is to provide a definitive and defensible estimate of market demand for the small ship cruise product; to identify the potential opportunities and constraints for developing a small ship cruise product from the perspective of the industry itself; and to identify the potential economic benefits from the development of a small ship cruise product within B.C.

The Smoking behaviour of Canadians, 1986

Ottawa : Health and Welfare Canada, 1988. vii, 69 p. : ill. CSI 21112.217. ISBN 0-662-16517-9. MICROLOG 91-03136 1 fiche

This report presents prevalence estimates of smoking by age, sex, education, and region. In addition, estimates of cigarette consumption, and the tar nicotine level of cigarettes smoked, provide an indication of the complex set of factors that ultimately influence exposure to the deleterious health risks of smoking. These estimates are compared with estimates from earlier surveys to provide some indication of the major trends in smoking behaviour in the last two decades.

The Social challenge of global change : a report

prepared by the Institute for Research on Public Policy ; for the Social Sciences and Humanities Research Council. Halifax : Institute for Research on Public Policy, Environmental and Sustainable Development Program, 1990. xiii, 50 p. Bibliogr. MICROLOG 91-04982 1 fiche

This report advocates a substantial Social Sciences and Humanities Research Council program on the social challenge of global change. It suggests that about 2/3 of the funding for this new program should be directed towards individual academic research projects selected through the normal peer review process, and about 1/3 towards an enhanced process of dissemination and policy exercises to link the results of academic

research directly to ongoing processes of policy formation. It develops a conceptual framework which could be the basis for organizing a set of working groups to pursue applied research in this field.

Social housing in Ottawa-Carleton : catching up to the demand : discussion paper

Ottawa : Regional Municipality of Ottawa-Carleton, Planning Dept., Policy and Program Division, 1990. 35 p. : ill. CSI 89160.216. MICROLOG 91-01612 1 fiche

Social housing is an important part of the regional housing stock, providing rental housing for low and moderate income households who are not well served by the private market. This paper examines the existing and future supply of social housing within the context of the anticipated demand. The current mismatch between demand and supply will be evident. The paper concludes with recommendations, and a summary of the recent decisions by Council regarding the Region's role in the delivery of such housing.

La Société générale de financement du Québec a pour mission la promotion et la réalisation de projets de développement industriel dans des secteurs stratégiques en conformité avec les politiques de développement économique du gouvernement du Québec. En ce moment la SGF est présente dans les secteurs de l'aluminium, la pétrochimie, des produits forestiers, du matériel de transport ainsi que de la construction navale et des équipements énergétiques. Ce rapport annuel contient les rapports de la direction, et des vérificateurs ainsi que des états financiers consolidés. En tableau il décrit des ressources humaines et donne un sommaire des résultats et des investissements.

La Société québécoise en tendances, 1960-90

par S. Langlois...et al. Québec : Institut québécois de recherche sur la culture, 1990. 667 p. Bibliogr. ISBN 2-89224-133-2
MICROLOG 91-02580 7 fiches

L'objectif de cet ouvrage est de dégager les grandes tendances du changement social et culturel au Québec. Plutôt que de proposer une interprétation d'ensemble, on a privilégié une approche inductive. Cette étude consiste à extraire d'une multitude de sources, depuis les rapports statistiques produits par les agences gouvernementales et les ministères, les organismes publics et privés ou les maisons de sondage, jusqu'aux études empiriques et aux monographies effectuées par les chercheurs en sciences sociales, des propositions susceptibles de caractériser les changements sociaux observés. Pour atteindre ce but, le document se penche surtout sur les points suivants: le

contexte; les groupes d'âge; les femmes; le marché du travail, la travail et l'administration; la stratification sociale; le microsocial; les relations sociales; l'Etat et les institutions de service; les institutions mobilisatrices; l'institutionnalisation des formes sociales; les idéologies et croyances; les ressources des ménages; les modes de vie; les loisirs; le niveau scolaire; l'intégration et la marginalisation; et, les représentations sociales.

Sockeye salmon *Oncorhynchus nerka* utilization of Quesnel Lake, British Columbia

by K.F. Morton and I.V. Williams. Cultus Lake, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, Cultus Lake Research Laboratory, 1990. iv, 29 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1756) ISSN 0706-6457
MICROLOG 91-01659 1 fiche

Sockeye salmon are commercially the most valuable of the 5 species of Pacific salmon in B.C. Since juvenile sockeye spend 1-2 years of their early life in lakes prior to migrating to the sea, the freshwater element is important. Quesnel Lake is one of the major sockeye salmon producers in the Fraser River system and there are proposals to further enhance Quesnel stocks by constructing artificial spawning channels, increasing natural spawning habitat and lake fertilization. This study documents juvenile sockeye nearshore dispersal, offshore spacial distribution and feeding to identify areas where fish production may be limited. Implications of within lake sockeye distribution future enhancement as well as potential effects of logging on sockeye production are reported. Distributions were documented using hydroacoustic and visual observations, while growth and diet information were obtained from samples captured with a midwater trawler. Zooplankton community structure was determined from stratified samples collected in horizontal tows.

Soins des oeufs avant l'incubation -- Rev.

par F.G. Proudfoot et R.M.G. Hamilton.

Ottawa : Agriculture Canada, 1990. 17 p. : ill. Bibliogr. ISBN 0-662-96090-4 MICROLOG 91-01076 1 fiche

En 1988, on a incubé environ 570 millions d'oeufs de poule au Canada. Lorsqu'il est question d'un aussi grand nombre d'oeufs, une faible augmentation du pourcentage d'éclosabilité (proportion des oeufs qui éclosent) peut se traduire par des gains économiques importants. Grâce à de meilleures techniques qui permettent de prolonger la période d'entreposage des oeufs d'incubation, les accoueurs jouissent de beaucoup plus de souplesse dans l'utilisation de leurs inventaires. En outre, les sélectionneurs de volaille peuvent accroître l'échantillonnage de la descendance et améliorer l'efficacité de leurs programmes d'amélioration génétique. Ce document se penche sur cette question en fournissant de nombreux renseignements sur la question. AG CA LS SC

Soins esthétiques : esthétique : rapport d'analyse de situation de travail

Québec : Gouvernement du Québec, Ministère de l'éducation, Formation professionnelle au secondaire, 1990. 26 p. ISBN 2-550-15264-6 MICROLOG 91-04338 1 fiche

L'analyse de situation de travail a pour but de préciser les compétences sur lesquelles s'appuient les objectifs d'un programme. Afin d'analyser la situation de travail qui prévaut en esthétique, une rencontre s'est tenue les 2, 3 et 4 octobre 1989 au Château Mont-Saint-Anne à Beauséjour, en présence de spécialistes du métier. Ce rapport reproduit le plus fidèlement possible les travaux du comité d'experts réuni pour la circonstance. LA PR QU

Soixante-dix années de service

par J. House et D.L. Myles. Fredericton : Commission d'énergie électrique du Nouveau-Brunswick, 1990. 56 p. : ill. *L'éd. anglaise (Seventy years of service) : 91-01801/1. Titre de la couv. : La Commission d'énergie électrique du Nouveau-Brunswick, 1920-90.* MICROLOG 91-01802 1 fiche

La Commission d'énergie électrique du Nouveau-Brunswick a été créée en 1920 et, à l'exemple des premiers habitants de la province, a très vite construit un barrage sur la rivière Musquash pour transformer l'énergie hydraulique en électricité. Ce document raconte l'histoire d'Énergie NB, décrit son rôle dans le développement de l'industrie électrique au Nouveau-Brunswick et montre comment cette forme d'énergie est devenue essentielle à la vie quotidienne. Solar-powered desalination : a case study from Botswana

by R. Yates, T. Woto and J.T. Tihage. Ottawa : International Development Research Centre, 1990. viii, 55 p. : ill. Bibliogr. (Technical study ; 65e) ISBN 0-88936-554-7 MICROLOG 91-02982 1 fiche (Available on fiche only)

In Africa, chronic drought conditions are reducing access to and the quality of drinking water. In Botswana, recurring droughts have left 80 percent of the population reliant on water from boreholes. Drilling such boreholes is an expensive proposition and the water is often scarce or saline. One possible solution to this dilemma is solar desalination. The Solar Energy Section of the Rural Industries Innovation Centre (RIIC) in Kanye, Botswana, has been studying solar distillation methods since 1977. This document summarizes the results of an intensive 3-year field study carried out by RIIC, with the support of IDRC (International Development Research Centre), on the technical performance and suitability of

various small-scale desalinators. The study indicates that small-scale desalinators can provide a clear, palatable distillate; that certain models can provide a constant and adequate supply of potable water when the distillate is added to salty water from traditional sources; and that the technology is readily acceptable to remote area dwellers. It also highlights the importance of including intended beneficiaries in the management of a new technology, in this case, the siting, construction, operation, and maintenance of the desalinators.

Some data on the biology of the capelin (*Mallotus villosus* O.F. Miller) off the western coast of Kamchatka

by E.A. Savicheva. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1990. 7 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5512) *Originally published in Russian by TINRO, Vladivostok, U.S.S.R.* ISSN 0704-3716
MICROLOG 91-00997 1 fiche

The Far Eastern or Pacific capelin is a marine, benthic-pelagic fish of the smelt family which is widely distributed in the northern part of the Atlantic, Pacific and Arctic Oceans, with the exception of the region from Novaya Zemlya to the Bering Strait. This paper describes the biology of these capelin, based on material collected in the Sea of Okhotsk, in the Kirovskii fishery combine in June 1971 during the spawning of the capelin. Samples were collected from catches in trap nets. The age of the capelin was determined on the basis of the otoliths, and length, weight and age composition were also measured.

Some effects of wastewater from Brenda Mines on water quality, aquatic organisms, and forage crops

by J.E. Bryan. Victoria : BC Environment, 1991. viii, 40 p. : ill. Bibliogr. ISBN 0-7726-1379-6
MICROLOG 91-06902 1 fiche

Brenda Mines was a large copper-molybdenum mine operated in the Okanagan Valley of BC from 1970-90. The mine site is west of Peachland and south of Kelowna, on the Okanagan side of the height of land, between the Okanagan and Nicola valleys. This report presents sampling results during the mine's operation and documents the observed effects on water quality and on fish and invertebrates living in waters which received runoff from the

mining operations, including the tailings pond drawdown in 1984.

Some empirical features of the college system : responding to quality, access and funding trade-offs : Study Team 1 final report

Ontario Council of Regents for Colleges of Applied Arts and Technology. Vision 2000. Toronto : Ontario Council of Regents, 1990. 75 p. : ill.
MICROLOG 91-00138 1 fiche

Vision 2000 is a review of the mandate of Ontario's Colleges of Applied Arts and Technology. This report begins with a description of the college system's response to the quality-access-funding trade-off in the past decade. It then looks forward to determine how conducive the future environment will be to improving quality and access. The report concludes with a set of recommendations.

Some financial considerations to assess the feasibility of intensive thermal freshwater prawn aquaculture

by P. Niklas and G.L. Vascotto. Toronto : Ontario Hydro, Research Division, 1991. iii, 22 p. : ill. Bibliogr. (Report ; no. 90-286-K)
MICROLOG 91-07175 1 fiche

In 1984, Ontario Hydro identified the freshwater prawn as a candidate for commercial thermal aquaculture using waste heat from its generating stations. Research has shown that intensive culture of the prawns is technically feasible, making the next step the development of a pilot scale project. This preliminary economic evaluation provides focus and scope for the construction and operation of such a facility. The requirements for financial feasibility are identified and an evaluation is made taking into account heating costs, feed, labour, capital costs, marketing, and seasonal vs. year-round production.

Some observations on demography in selected macroeconomic models of Canada

by R. Bodkin and K. Marwah. Ottawa : Institute for Research on Public Policy, Studies in Social Policy, 1987. 33 p. Bibliogr. (Discussion paper ; 87.A.1)
MICROLOG 91-01503 1 fiche

This paper examines four historic macroeconomic models of the Canadian economy, to see the uses that the respective model-builders have made of demographic phenomena. It examines the large models of the Canadian economy built at the Research Department of the Bank of Canada. It also focuses on the giant CANDIDE and TIM models, and presents a summary of a number of studies dealing with a specific application of these macroeconomic models; namely, their use to attempt to gauge the medium-term impacts of varying levels of net immigration into the Canadian economy. It concludes with an assessment of the validity of the arguments of the two sides in this continuing debate.

Some practical and theoretical considerations of personal alpha-particle dosimetry : JP-2

prepared by Working Group on Internal Dosimetry ; on behalf of the Joint Panel on Occupational and Environmental Research for Uranium Production in Canada. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1989. iv, 29 p. Bibliogr.
MICROLOG 91-00390 1 fiche

The report deals with personal alpha exosimeters that integrate, over time, the concentration of radon (thoron) gas or radon (thoron) progeny or of mixtures of radon and thoron gas, and/or of radon and thoron progeny to determine the exposure to airborne radon and thoron progeny received by these workers and, simultaneously, to monitor air quality at the work place; or to determine only the exposure received by the workers, the monitoring of air quality at the work place being conducted by other means. The report presents only the principles upon which the different instruments are based, and indicates their strengths and shortcomings for specific objectives or situations.

Sommaires des rapports des Groupes de travail : pour discussion

Fonction publique 2000 (Canada). Ottawa : Fonction publique 2000, 1990. 77, 67 p. *Bilingue* (Summaries of the reports...). MICROLOG 91-00233 2 fiche

Fonction publique 2000 est une initiative annoncée par le premier ministre, M. Brian Mulroney, le 12 décembre 1989. Elle vise à renouveler la fonction publique afin qu'elle soit en mesure d'offrir les meilleurs services possibles aux Canadiens, à l'aube du 21^e siècle. Ce document passe en revue la documentation sur le sujet et mène des consultations sur la notion de service au public afin d'en arriver à une définition satisfaisante dans le contexte du secteur public. De plus, il vise à : examiner les travaux effectués jusqu'à maintenant en matière d'amélioration du service et de rehaussement de la satisfaction dans les secteurs public et privé, en vue de tirer profit de l'expérience d'autres organisations; et, recueillir des données afin d'établir des méthodes de mesure et des points de repère concernant la qualité réelle et perçue du service au public fourni par les institutions fédérales. Le Sondage d'opinion de l'ICPSI 1990 : les nouvelles conceptions de la sécurité : les attitudes du public canadien

par D. Munton. Ottawa : Institut canadien pour la paix et la sécurité internationales, 1990. 105 p. *L'éd. anglaise* (The 1990 CIIPS public...). : 91-01849/2. CSI 22305.002F. ISBN 0-662-96473-X. MICROLOG 91-01848 2 fiche

Chaque année depuis 1987, l'Institut fait réaliser un sondage de l'opinion publique canadienne dans le domaine de la paix et de la sécurité internationales, et il en publie les résultats. Contrairement aux années précédentes, ce document ne reprend pas les réponses à toutes les questions posées dans le cadre du sondage de 1990. Au lieu de cela, il se concentre sur un choix de questions et de

thèmes comme, par exemple, la meilleure image des superpuissances, les conséquences de l'unification allemande et les menaces économiques et environnementales, qui, pour diverses raisons, présentent un intérêt particulier. Toutefois, les annexes et les tableaux qui l'accompagnent donnent l'intégralité des résultats obtenus point par point. De plus, les annexes découpent ces résultats par facteurs démographiques, à savoir par sexe, région, langue et revenu.

by M. Rossignol. Ottawa : Library of Parliament, Research Branch, 1990. 25 p. Bibliogr. (Current issue review ; 87-12E) French ed. (*Afrique du Sud : la lutte...*) on the same fiche. Revised September 26 1990. ISBN 0-660-13885-9
MICROLOG 91-04814 1 fiche

The system of apartheid in South Africa has long been one of the most controversial issues in world politics. The South African government has proposed constitutional reforms in the past, but these have often been considered too extreme by part of the white community while barely meeting the demands of a large part of the black community.

However, because of the risk that confrontations between blacks and whites and within each of these communities might degenerate into armed conflict and because of the pressures applied by the international community to persuade South Africa to end apartheid, the South African government has accelerated the reform process. This review outlines what is at stake in this constitutional reform by analyzing the confrontations to which it has given rise in South African society and by examining the impact of pressure tactics applied by the international community.

Southwest custom feed sampling and nutrition consulting pilot project : year 1 annual report

by B. Peterson. Regina : Agriculture Development Fund, 1988. 4 p.
MICROLOG 91-01724 1 fiche

This project was conducted to reduce input cost and increase profitability of livestock operations through increased use of feed analysis and ration balancing; to increase the use of feed analysis services and application of balanced rations by providing a custom feed sampling and nutrition consulting service to southwest beef producers; to test the need or demand of such services; and to promote the benefits of such testing and balancing. Seven agricultural districts selected up to 10 beef producers each to have their feeds custom sampled, analyzed and professionally balanced for their winter feeding programs. Information sheets were filled out by the sampling technicians and the farm operator. Rations were then balanced for TDN, protein, calcium, phosphorus and cost using field test results and nutrient requirements of beef cattle for Saskatchewan conditions. Individual consulting was then conducted to interpret and rework rations where necessary.

The Soviet concept of reasonable sufficiency : conventional arms control in an era of transition

by E. Holoboff. Ottawa : Canadian Institute for International Peace and Security, 1990. 45 p. Bibliogr. (Working paper ; no. 29) ISBN 0-662-18178-6
MICROLOG 91-01859 1 fiche

Since Gorbachev came to power, the Soviet Union has adopted a dramatically new approach to arms control and disarmament. Based on cooperation rather than confrontation, this change in approach has contributed to a situation where both East and West now stand at the edge of radical arms reductions. This paper examines a number of fundamental principles which have guided the Soviet approach to conventional arms control issues over the past three years. The paper demonstrates that, though it was initially an idea

with little substance, the principle of reasonable sufficiency and its corollaries have become central to Soviet thinking on arms control and disarmament.

Soviet economic reforms : lost opportunities and remaining hopes

by V.V. Popov. Toronto : C.D. Howe Institute, 1991. 24 p. Bibliogr. (Commentary ; no. 30)
ISSN 0824-8001 ISBN 0-88806-279-6
MICROLOG 91-04203 1 fiche

The history of Soviet economic perestroika seems to be one of lost opportunities. A viable plan to smooth the transition to a market economy was proposed, but it was not implemented. Now, real incomes of Soviet citizens have fallen and will continue to do so as the Soviet Union's economy heads into deep recession in 1991. The purpose of this document is to analyze briefly the recent Soviet experience with economic restructuring, to outline the major options that economic reformers in the Soviet Union now face, to evaluate the political feasibility of these options, and to speculate on possible scenarios of future economic development and on the much-debated issue of Western financial assistance.

Space for all : options for a Greater Toronto Area Greenlands Strategy

by R. Kanter. Toronto : Greater Toronto Area Greenlands Strategy, 1990. 179 p. : fold maps. Bibliogr. ISBN 0-7729-7389-X
MICROLOG 91-01095 2 fiche

The Greater Toronto Area occupies less than 1 per cent of Ontario's land base, and yet it houses more than 40 per cent of the province's people. The number of people living in the GTA has been increasing at a fast rate and is expected to increase substantially in the near future. The forecast is that it will reach 5.4 million by 2011, an increase of almost 50 per cent over the 1986 population. The area also contains two major physiographic features: the Niagara Escarpment and the Oak Ridges Moraine. More than 21 per cent of the land base is forest-covered. It also houses a host of provincially rare plant and animal species and contains a number of provincially significant wetlands and natural areas. Therefore, in the GTA's plan for the future, a comprehensive look at the natural resources and attributes of the areas in light of the area's potential growth is required. This document offers options for securing greenlands.

Spatial autoregressive error components in travel flow models

by D. Bolduc, R. Lalerrière and G. Santarossa. Montreal : Université de Montréal, Centre de recherche sur les transports, 1991. 15 p. Bibliogr. (Publication ; no. 778A) French ed. (*Modèle d'explication de flux...*) : 91-05262/1.
MICROLOG 91-05261 1 fiche

This study proposes a generalization of the error component formulation to model the correlation among the errors of a regression based on travel flow data. The error term is broken down into a sum of one component related to the origin zone, one component related to the destination zone and a remainder. Each component is assumed to result from a first-order spatial autoregressive generating process. An efficient estimation approach based on maximum likelihood which addresses the practical implementation of such a model with a large sample size is suggested.

Speaking in tongues : heritage language maintenance and transfer in Canada

by R. Pendakur. Ottawa : Multiculturalism and

Citizenship Canada, 1990. iv, 32, iii, 37 p. Bibliogr. *Bilingual (Situation linguistique au Canada...)*. CSI 21152.202. MICROLOG 91-06756 1 fiche

This paper examines the use of heritage languages in Canada in an attempt to understand better the processes surrounding the maintenance or shift of these minority languages in Canada's different linguistic minority groups. Using data from the 1986 Census of Canada, it analyses the relationship between three components of language usage: mother tongue, home language, and official language knowledge.

Special Education Review : action plan

Edmonton : Alberta Education : Alberta Education Response Centre, 1991. iv, 44 p. *Executive summary (5 p.) laid in.* MICROLOG 91-05313 1 fiche

This document outlines an Action Plan from the Special Education Review Committee in Alberta. The Action Plan focuses on three main areas of interest: the coordination and delivery of services for children with special needs, funding for services to special needs children, and assessing outcomes and developing performance standards for exceptional students. Recommendations deal with an improvement in the quality of service to special needs students, particularly to learning disabled students within the community, and with methods of providing support to teaching staff.

Special report on allegations of witness tampering at the Commission hearings

Commission of Inquiry into Fraser Valley Petroleum Exploration (B.C.). Victoria : The Commission, 1990. 2 v. *Commissioner: David Anderson. Contents: Vol. 1 : Report -- vol. 2 : Appendices.* ISBN 0-7726-1225-0 MICROLOG 91-01068 2 fiche

The Commission was established to inquire into matters concerning the exploration and development of natural gas and underground natural gas storage in the Fraser Valley. During the Commission's technical hearings, a group called 'Friends of Fraser Valley' made allegations that the consortium proposing exploratory drilling, the Fraser Valley Gas Project, pressured potential witnesses into withholding information of interest to the Commission, and that civil servants who testified before the Commission did not testify honestly and truthfully. This report presents the findings of a special investigation by the Commission into these allegations.

St. Lawrence River environmental investigations, vol. 4 : assessment of water and sediment quality in the Cornwall area of the St. Lawrence River, 1985

by J. Anderson. Toronto : Environment Ontario, 1990. xi, 69 p. : ill., maps. Bibliogr. ISBN 0-7729-7562-0
MICROLOG 91-06228 1 fiche

Cornwall, Ontario and Massena, N.Y. are major industrial centres on the international section of the St. Lawrence River. Previous surveys from 1979-82 identified municipal and industrial discharges from both sides of the river which contributed to excess pollution levels. In 1985, the Cornwall-Massena area was re-identified as a Great Lakes area of concern and further surveys were begun. The 1985 surveys were designed mainly to update the 1979 sediment quality data; document existing sources of trace contaminants and assess their impact on the Cornwall area aquatic environment and water use; assess the effectiveness of plant modifications and effluent treatment by Domtar Fine Papers and other point sources; and collect information relevant to further remedial measures at Courtalds/BCL, CIL and Domtar. This report presents sediment and water quality conditions in 1985 and provides a comparison with 1979 conditions.

Stability enhancement of products from Gulf's coal beneficiation process : final report

by B.Y.H. Wong, R.J. Germain and M.A. Rashid. Calgary, Alta. : Gulf Canada Resources Limited, 1989. iv, 151 p. : ill. Bibliogr. CANMET contract: 89034-01-SQ.
MICROLOG 91-00724 2 fiche

The Gulf two-stage beneficiation process thermally treats low rank coals at 350C and upgrades the dried products with petroleum residuum. Typical products using high volatile bituminous coals from the Gulf process are low in moisture content, free from dust problems, with good appearance and possess equilibrium moistures in the range of 5-7 per cent. The commercial application of this upgrading process relies heavily on demonstration of product stability towards autogenous heating. This research investigates product stability enhancement by incorporating carbon dioxide conditioning, heating in steam environment, and product moisture adjustment. Only partial demonstration of product stability was possible due to the inconsistency of oxygen sorption test data.

Stand structure, species composition, and growth of the boreal mixedwood forest in northern Ontario : a comparison of natural stands and plantations

by D.M. Morris, M. Rose and G.B. MacDonald. Thunder Bay, Ont. : Ministry of Natural Resources, Northwestern Ontario Forest Technology Development Unit, 1988. iv, 21 p. : ill. Bibliogr. (Technical report ; no. 22)
MICROLOG 91-00053 1 fiche

Forest management is becoming increasingly intensive on mixedwood sites, making it essential that the forest manager gain a better understanding of stand dynamics, including growth, changes in species composition, and stand structure. This paper illustrates these changes for both natural mixedwoods and plantations established on mixedwood sites. The majority of the information was tabulated from an extensive data base collected from 1982-86. The mensurational and stem analysis data are from 8 circular plots of 1/8 ha each in the north central region of Ontario. Four plots were located in natural stands (ranging from 45-85 years), and the other 4 were in spruce plantations (ranging from 15-25 years).

State of the parks : 1990 profiles

Ottawa : Environment Canada, Parks Service, 1991. 229 p. : ill. ISBN 0-662-18357-6
MICROLOG 91-06050 3 fiche

This document contains a profile statement of each national park and national historic site in the parks system. Each profile provides a consistent listing of inventory data by province. Within each section, the listings are arranged chronologically by the date the site was designated nationally significant, the date a national park was proclaimed, or the date of the earliest agreement with a province or territory for establishing a national park reserve. Information for each park or site includes its purpose, establishment, location, heritage values and features, condition of resources, presentation to the public, services and facilities, visitation data, threats, opportunities, and partnerships.

Statement of votes

see Report of the Chief Electoral Officer pursuant to Section 142(2) of the Elections Act on the thirty-fifth provincial general election, September 11, 1990

Statement on accessibility

Ottawa : Association of Universities and Colleges of Canada, 1985. 2 p.
MICROLOG 91-01141 1 fiche

An educated citizenry is essential to the wellbeing of society. It is in the national interest, therefore, to ensure that all residents who wish to further their education and who are capable of benefiting academically from

university study have an opportunity to do so. This document discusses the Association's principles concerning accessibility.
● CA ED

Statement on bilingualism

Ottawa : Association of Universities and Colleges of Canada, 1985. 2 p.
MICROLOG 91-01140 1 fiche

An important role of universities is to ensure that the leaders of Canada's next generation can respond to the realities of Canadian society, one of which is that we are a country with two official languages. This document discusses the Association's principles concerning bilingualism.

Statement on Canadian universities and their international relations

Ottawa : Association of Universities and Colleges of Canada, 1985. 3 p.
MICROLOG 91-01144 1 fiche

Education and research are international in scope in all disciplines. Universities throughout the world form an international network in which Canadian universities play an active part. Canada has gained greatly from sending many of its students and faculty abroad where they have expanded their horizons and research experience. This document discusses the Association's principles concerning international relations.

Statement on the status of women in Canadian universities

Ottawa : Association of Universities and Colleges of Canada, 1986. 2 p.
MICROLOG 91-01139 1 fiche

In the past 15 years women have come to represent a much larger percentage of the student population of Canadian universities. They are still, however, under represented in some undergraduate programs and many graduate programs. This document examines principles and policies for changing this situation. It also discusses issues concerning women students, and women faculty and administrative staff.
● CA ED SA

Statement on university research

Ottawa : Association of Universities and Colleges of Canada, 1985. 7 p.
MICROLOG 91-01142 1 fiche

Research is a fundamental function of universities. Through the performance of research, universities contribute to the capital stock of knowledge upon which our nation draws in promoting its social, economic and cultural development; provide the milieu required for the specialized education of future generations for researchers; and maintain the level of scholarship necessary to foster excellence in teaching. This document discusses the Association's principles concerning research.

La Station spatiale : la contribution du Canada -- Rev.

par L.C. Myers. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 13 p. Bibliogr. (Bulletin d'actualité ; 87-5F) L'éd. anglaise (*The Space station : Canada's...*) sur la même fiche. Révisé le 10 septembre 1990. ISBN 0-660-93179-6
MICROLOG 91-04820 1 fiche

En 1984, le président Reagan a annoncé la décision des Etats-Unis de construire une station orbitale d'ici dix ans et il a invité, entre autre, le Canada à participer à la réalisation de cet ambitieux programme. Au Sommet de la Saint-Patrick, en mars 1986, le premier ministre Mulroney a annoncé que le Canada acceptait l'invitation. Ce bulletin examine le projet de configuration de la station spatiale, le rôle du Canada dans la mise au point du Centre d'entretien et de réparation mobile et les avantages qu'il compte tirer de sa contribution.

Statistical estimates and dynamical interpretations of bottom pressure variations over the Labrador-Newfoundland Shelf

by D.G. Wright, D.A. Greenberg and J.F. Middleton. Dartmouth, N.S. : Bedford Institute of Oceanography ; Dept. of Fisheries and Oceans, Scotia-Fundy Region, Physical and Chemical Sciences Branch, 1991. v, 60 p. : ill., maps. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 131) ISSN 0711-6774
MICROLOG 91-05069 1 fiche

This study examines the question of whether or not the free waves propagating past Nain Bank will maintain coherence further south along the Labrador Shelf as they attempt to traverse the intervening abrupt large-scale topographic features. The effects of mode scattering and local forcing are also investigated through a statistical study using multiple regression techniques in the frequency domain. Data sources are discussed and a cursory description of time series, spectra and complex empirical orthogonal functions is presented.

Moncton, N.B. : Dept. of Fisheries and Oceans Gulf Region, Program Coordination and Economics, 1991. 92 p. (Economic and commercial analysis report ; no. 105)
CSI 21105.234. ISSN 0843-5626
MICROLOG 91-06905 2 fiche

The Gulf Region of the Dept. of Fisheries and Oceans was established in 1981 to provide a more decentralized management regime for the fisheries of the Gulf of St. Lawrence. The federal statistical system for the region collects data on the landings of all vessels engaged in commercial fishing, while fish processing data are gathered from plants operating in the region. Data on fishermen, the fishing fleet and licences are also gathered. This review presents data on the fisheries work force (fishermen, vessels, buyers and processors), along with information on public investment by the Atlantic Canada Opportunities Agency in the processing sector; access to the resource (licences, fishing seasons, and quotas); and value and quantity of landings from 1985-89.

Status and outlook for the major commercial fish species of Lake Huron, 1991

by F.I. McNeil...et al. Owen Sound, Ont. : Ministry of Natural Resources, Lake Huron Fisheries Assessment Unit, 1991. iii, 189 p. : ill. (Report ; 1-91) CSI/ 55116.016. ISBN 1180-291X. MICROLOG 91-05836 3 fiche

The commercial harvesting of fish from Lake Huron is controlled through area specific allocations and licensee specific quotas which are subject to annual review and revision. This report traces annual harvests from 1979-90 and relates them to the allocations for those years that quota-control has been in place. It also traces the relative abundance of the primary commercial species through data derived from the commercial fishing reports. The character of the harvest and of the populations in the lake is indicated through age and size data from on-board sampling of representative commercial catches. A tracking of year-to-year reproduction was undertaken through independent fishing and comments are presented on the likely impact of the recruiting year classes. Forecasts of changes in the supply of commercial fish are made on the strength of this composite picture. FI ON PR SC ST

Status of children -- Rev.

Edmonton : Alberta Law Reform Institute, 1991. ii, 102 p. (Report ; no. 60) ISSN 0317-1604. ISBN 0-8886-4147-2. MICROLOG 91-04157 2 fiche

This document contains the revised report, the proposed Status of Children Act, and the annotated Status of Children Act. The appendix lists current Alberta statutes considered. The report gives background information and covers the U.N. Convention on the Rights of Children. It also reviews the law in other parts of Canada and then considers such issues as equality of all children, maintenance and succession to property, determination of parentage, amendments to other statutes, and provincial court jurisdiction. Statutory designations and the Retirement Plan Beneficiaries Act

Winnipeg : Manitoba Law Reform Commission, 1990. ii, 31 p. Bibliogr. (Report ; no. 73) ISBN 0-7711-0868-0
MICROLOG 91-02286 1 fiche

Individuals investing their funds are often invited by the financial institution accepting the monies to complete a 'Designation of Beneficiary' form which will permit the individual to name the person who should receive the funds in the event of her or his death. It is assumed that a formal will is then not necessary. However, concern was expressed by the Manitoba Section of the Trust Companies Association about the effectiveness of these designations for RRSPs and RRI's. This report reviews the issues raised in a discussion paper; discusses some of the responses; presents proposed recommendations; sets out the present state of the law relating to statutory designations; discusses why they are sometimes permitted to take the place of wills; and considers for which assets statutory designations should be available (with particular reference to RRSPs and RRI's). A draft statute and comments are also included.

The Western Grain Transportation Act (WGTA) confers upon the National Transportation Agency the authority to prescribe the annual rate scale for the movement of western grain by rail on or before April 30th for the next crop year. This publication provides

information on statutory grain freight rates from local delivery points to Vancouver, Prince Rupert, and Thunder Bay. The publication lists the local shipping points alphabetically, the railway serving the point, the mileage to port upon which the freight rate is based, the base rate scale, the total 1991-92 rail freight rate, the amount of rail freight rate to be paid by the federal government, and the producer share prescribed under the WGTA.

Steam injection experiments in scaled physical models : final report

by S.M. Farouq Ali...et al. Edmonton : University of Alberta, 1989. xiv, 797 p. : ill. Bibliogr. *CANMET contract* 79070-01-SS. MICROLOG 91-00721 9 fiche

Many heavy oil reservoirs in Alberta and Saskatchewan contain a bottom water layer which creates a serious field problem when a steamflood injection process is used. This research incorporated solvent injection with a steamflood process to improve oil recovery from thin heavy oil formations with underlying water zones and to guide the steam into the upper portion (oil layer) of the bottom water formation and keep it there as long as possible. Gas injection prior to a steamflood or a solvent-steamflood, and prior to steamflooding forming a limited barrier at the oil-water contact of the formation which extended radially outward from the injection well were also tried. This report describes scaled model experiments, conducted from July 8, 1987 to June 30, 1989.

Steelhead harvest analysis, 1983-84

by S.J. Billings. Victoria : Ministry of Environment, 1984. 21 p. : ill. (Fisheries technical circular ; no. 64) *CSI* 37105.006. ISSN 0319-9436. MICROLOG 91-00941 1 fiche

Since 1966, all anglers fishing for steelhead in the province have been required to purchase a steelhead licence and punchcard in addition to their basic angling licence, providing an opportunity for fisheries biologists to evaluate the steelhead trout sport fishery by conducting a mailout questionnaire survey of steelhead anglers. Those steelhead which escape the commercial fleet and Indian food fishery are available to the sport angler who is presently the only user group whose 'take home' catch can be easily regulated to ensure that enough steelhead survive to spawn. This report details the results of the 1983-84 Steelhead Harvest Questionnaire, as well as presents a comparative summary of previous years' data. Included is a review of the 1983 juvenile steelhead released from provincial and federal rearing facilities, as well as information from the questionnaires dealing with anglers and catch.

Stomach content analysis of marine benthic fish from Arctic Canada

by E.G. Atkinson and J.A. Percy. Mont-Joli, Que. : Dept. of Fisheries and Oceans, Maurice Lamontagne Institute, 1991. iv, 31 p. (Canadian data report of fisheries and aquatic sciences ; no. 840) ISSN 0706-6465. MICROLOG 91-04706 1 fiche

Although most demersal marine fish in the Arctic are small, commercially unimportant species, they are ecologically significant in northern marine food webs. Despite this, little information is available about the diets of Arctic benthic fish in general, and from Canadian waters in particular. This report presents detailed tabulations of the stomach contents of 12 species of demersal marine fish collected in Canadian Arctic waters during the course of various fisheries and benthic investigations. Collection sites were grouped in the eastern Arctic in coastal waters of southeast Baffin

Island and in the western Arctic in coastal areas of the southeast Beaufort Sea. Specimens were collected from near shore to depths of 90 m by trawl, gill net and dredge, during the day in July and August between 1963 and 1979.

Strait of Georgia sport fishery creel survey statistics for salmon and groundfish, 1989

by L.D. Collicutt and T.F. Shardlow. Nanaimo, B.C. : Dept. of Fisheries and Oceans, 1990. viii, 75 p. : ill., maps. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2097) ISSN 0706-6473. MICROLOG 91-05892 1 fiche

This report documents the 1989 catch and effort statistics for the Strait of Georgia tidal sport fishery and presents methodology for collecting these data. Data were derived by combining the results from over 31,000 interviews and 68 aerial surveys. Estimates are provided for the number of sport fishing boat trips and the catches of chinook, coho, pink, sockeye and chum salmon along with rockfish, lingcod, dogfish and other finfish. Also given are the number of marked (adipose finclipped) and unmarked chinook and coho examined during the creel survey, the age composition of chinook and the length frequency distribution of chinook, coho and lingcod catches. An appendix includes all catch and effort data for each combination of month and statistical area.

Strategic choices for sub-Saharan Africa

Ottawa : International Development Research Centre, 1991. vii, 43 p. : ill. Bibliogr. (Manuscript report ; 289e) MICROLOG 91-04063 1 fiche (Available on fiche only)

In the 1980s, the development process in sub-Saharan Africa appeared to have become stunted: there was a considerable slippage in economic growth and in social and political institutions. These difficulties undermined the region's research capacities and its ability to undertake development research generally. The question this paper addresses is whether the International Development Research Centre's current policies and procedures are adequate for effective support to research in sub-Saharan Africa. After reviewing the development needs and conditions in sub-Saharan Africa, in comparison with other developing regions, the conclusion is reached that the region requires, and is receiving, special consideration from many donor agencies.

Stratigraphy of the Jurassic System in the Wapella-Moosomin area, southeastern Saskatchewan

by L.K. Kreis. Regina : Saskatchewan Energy and Mines, Saskatchewan Geological Survey, 1991. x, 90 p. : ill., maps. Bibliogr. (Report ; 217) *Fold. maps not filmed.*
MICROLOG 91-05236 2 fiche

The Jurassic sediments of southeastern Saskatchewan represent a little studied succession of lithologies including evaporites, sandstones, siltstones, shales and carbonates. The area was chosen to include all known occurrences of Middle Jurassic petroleum production in southeastern Saskatchewan. The study establishes the stratigraphic relationship between the Jurassic section in the Wapella-Moosomin area and that in the type area in southwestern Saskatchewan, and provides an interpretation of the depositional history and the paleo-environments of the Jurassic sequence in the area of study, particularly with respect to the oil-prone Middle Jurassic Red Jacket formation proposed in this report. The study was based on data from 500 wells penetrating Jurassic strata in the Wapella-Moosomin area. Geophysical well logs, borehole sample cuttings, and some 1500 m of core representing various portions of the Jurassic section were examined.

Stream rehabilitation using LOD placements and off-channel pool development

V.A. Poulin and Associates Ltd. Victoria : Ministry of Forests, 1991. x, 99 p. : ill., maps. Bibliogr. (Land management report ; no. 61) ISSN 0702-9861 ISBN 0-7718-8775-2 MICROLOG 91-04242 2 fiche

On the Queen Charlotte Islands, mass wasting triggered by either logging or natural events is the dominant geomorphic process acting to erode unstable terrain. Studies from 1982-84 identified several options for rehabilitating the characteristically steep streams that drain much of the active logging area in the Islands. This study began in May 1986 to further develop and test aspects of log placement strategies and to apply engineering principles in the design and construction of the structures. The rehabilitation sites were identified during a reconnaissance and then subjected to an extensive pre-construction evaluation in spring 1986. This was followed by construction during summer 1986 and the first of two post-construction evaluations, including an engineering assessment and a geomorphic evaluation. The final post-construction evaluation took place one year later, in August 1987. A total of 20 large organic debris (LOD) placement sites were constructed, with Macmillan Creek selected as the principal study stream. BC EV PR SC

Strength determinations of Kidd Creek Mine no. 3 rocks

Strength in adversity : a study of the Alberta economy

by R.L. Mansell and M.B. Percy. Edmonton : University of Alberta, Western Centre for Economic Research ; Toronto : C.D. Howe, 1990. xi, 154 p. : ill. Bibliogr. (Western studies in economic policy ; no. 1) *Executive summary (2 p.) laid in.* ISBN 0-88864-232-6 MICROLOG 91-01176 2 fiche

The objective of this study is to evaluate and diagnose Alberta's apparent problem of economic instability and to suggest the general directions for appropriate policy responses. Specifically, attention is focused on the following three questions. First, 'What factors account for the severity and length of the province's economic downturn in the early 1980s and for the recent display of economic strength in adversity?' Second, 'Is this variability an isolated event attributable to an improbable combination of factors unlikely to occur again or simply the most recent manifestation of an inherent boom-bust cycle?' Third, 'Given the identified sources of this instability, what are the appropriate policy responses?' AL CO PR

Stress corrosion crack growth rates in gas pipelines

by F.A. MacLeod, C. Chalykoff and S. Rajan. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1991. 24 p. : ill. Bibliogr. (Report ; MSL 91-46(TR)) MICROLOG 91-04797 1 fiche

Stress corrosion cracking (SCC) has been observed recently in many locations on natural gas pipelines operated by TransCanada Pipelines and NOVA Corp. of Alberta. This research project determined the growth rates of intermediate or larger SC cracks under field simulated conditions. The test pipe was excavated from a 17-year old pipeline experiencing SCC and 10 environmental cells, 4 with aqueous electrolytes simulating solutions found under disbonded coating, and 6 with soil from pipeline sites where SCC was found, were placed on the pipe. Biological and physical parameters were monitored in the cells. This report presents the results of the tests. • CA CM PS SC

Le Stress relié au travail : un atelier

Atelier sur le stress relié au travail (1989 : Hamilton, Ont.). Hamilton, Ont. : Centre canadien et de sécurité au travail, 1990. 44 p. *L'éd. anglaise (Occupational Stress...) : 91-01624/1.* ISBN 0-660-93080-3 MICROLOG 91-01625 1 fiche

Le stress relié au travail est une réalité de plus en plus acceptée même aux fins de l'indemnisation des travailleurs. Plusieurs

facteurs peuvent contribuer à ce stress, dont : les changements technologiques, la réaffectation du personnel, l'augmentation continue des attentes quant à la productivité et l'organisation non appropriée du travail. Ce document se penche sur le sujet en examinant le stress en milieu de travail et la maladie ; la conception au travail, la formation et l'orientation ; et, l'indemnisation. CA HE LA

Strong medicine : budgeting for recession and recovery

by I.K. Ip. Toronto : C.D. Howe Institute, 1990. 28 p. Bibliogr. (Commentary ; no. 27) *At head of title: Fiscal Policy.* ISSN 0824-8001 ISBN 0-88806-274-5 MICROLOG 91-02226 1 fiche

The purpose of this paper is to present a possible approach to getting the public sector's net debt ratio turned around and onto a sustainable downward track over the next five years. It also addresses the problem of the federal government's responsibility for stabilization. It focuses on targeting a lower level of constant dollar expenditures per capita on key federal-only programs, as well as a redistribution of the revenue-raising and spending responsibilities of the federal and provincial governments. • CA CI CO PA

Structural load testing of Gemini single joist composite floor system

by David P. Thompson ; for H.K. Schilger Enterprises Ltd. Edmonton : Alberta Municipal Affairs, Innovative Housing Grants Program, 1989. viii, 159 p. : ill. ISBN 0-88654-282-0 MICROLOG 91-00291 2 fiche

Gemini Structural Systems Inc. of Calgary developed a composite concrete thin shell, steel cold-formed joist system which can be used in wall or floor construction. The Gemini System II consists of a 65 mm concrete floor panel supported by single steel joists, a composite floor beam consisting of concrete filled cold-formed joists, and a composite column. To gain market acceptance, the evolved system must first undergo thorough structural testing in accordance with accepted engineering practices and principles. This report details the major activities of the project, the residential economic viability of the system, the technical codes and literature which pre-determined many of the requirements for the testing program, the test procedures and objectives, the actual test observations and analyses, and the generation of load tables resulting from the engineering analysis of the test data. Student support services in the schools : actual and preferred time use of psychoeducational consultants and social workers

by R. Brown and R. Skippon. Toronto : Toronto Board of Education, Library Services Dept., Information Services Division, Research Services, 1991. 24 p. : ill. (Research report ; no. 197) ISSN 0316-8786 ISBN 0-88881-212-4. MICROLOG 91-03036 1 fiche

Largely in table and graph form, this study reports the results of a survey of Toronto board social workers and psychoeducational consultants on preferred and real time use. Individuals in each group were given a list of work-related activities and asked to indicate on a pie graph how much time was actually spent on each of these activities, and on a second graph to indicate the time they would prefer to spend on each of these activities. Principals were asked to complete real and preferred time graphs for each group in their schools. Participant views of their professional needs were also collected and are included in the second section of the report.

Students of New Brunswick community colleges, 2 reports

by P. Easterbrook-Nadeau. Fredericton : Dept. of Advanced Education and Training, Planning Services, 1990. iv, 56 p. : ill. Bibliogr. French ed. (*Etudiants des collèges communautaires...*) : 91-02800/1. CSI 46153.205. MICROLOG 91-02782 1 fiche

This report gives the results of a random sample survey of part-time community college students conducted in the Spring of 1990. The study aimed to identify these part-time clients, to gauge their opinions about their training experiences and the Department's training services, and to probe their future training expectations.

Studies of high-latitude seabirds, 1 : behavioural, energetic, and oceanographic aspects of seabird feeding ecology

edited by W.A. Montevecchi and A.J. Gaston. Ottawa : Environment Canada, Canadian Wildlife Service, 1991. 56 p. : ill., maps. Bibliogr. (Occasional paper ; no. 68) *Papers presented at the Population Biology and Conservation of Marine Birds Symposium.* ISSN 0576-6370 ISBN 0-662-18312-6. MICROLOG 91-03724 1 fiche

Papers presented at the symposium, covering behavioural, energetic, and oceanographic aspects of seabird feeding ecology. The papers illustrate ways in which technological advances allow the study of such previously hidden aspects of avian ecology as diving depths and trophic levels; demonstrate how the application of a rigorous statistical approach can improve the value of counts of birds made at sea; deal with relationships between bird distributions and biological and physical oceanographic processes that influence them; and predict interactive effects within multispecies food webs.

Studies of high-latitude seabirds, 2 : conservation biology of thick-billed murre in the Northwest Atlantic

edited by A.J. Gaston and R.D. Elliot. Ottawa : Environment Canada, Canadian Wildlife Service, 1991. 63 p. : ill., maps. Bibliogr. (Occasional paper ; no. 69) ISSN 0576-6370 ISBN 0-662-18823-3. MICROLOG 91-05887 1 fiche

The thick-billed murre is one of the most numerous seabirds breeding in the northern hemisphere, over the north Atlantic coasts of the eastern seaboard. They have always been harvested in both their breeding grounds in Greenland and the eastern Canadian Arctic and in their wintering grounds in Newfoundland and Labrador. Since the 1960s, they have suffered very heavy mortality through hunting, drowning in nets, and oiling and there is now concern over declining populations. This collection of papers are derived from a symposium held in April 1989 and cover the current dynamics of populations in West Greenland, the threat represented by salmon drift nets off West Greenland, the hunt in Newfoundland, and population changes in British Common murre and Atlantic Puffins from 1968-88.

Studies of laterally heterogeneous structures using seismic refraction and reflection data

edited by A.G. Green. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1990. 224 p. : ill., maps. Bibliogr. (Paper ; 89-13) *Fold. maps not filmed. Papers presented at the workshop.* ISSN 0068-7650 ISBN M44-89/13E. MICROLOG 91-00356 3 fiche

Papers presented at the 7th workshop, which compared and assessed the various processing and interpretation methods that can be applied to crustal seismic data. Special emphasis was given to the combined interpretation of coincident multichannel seismic reflection and seismic refraction data recorded in an onshore-offshore environment, the processing of both land and marine multichannel seismic reflection data, and the interpretation of a synthetic seismic reflection section. The observed data given to the workshop participants were collected between 1981 and 1985 by Canadian university and government geoscientists during COCRUST and LITHOPROBE studies along the continental margin of B.C.

Studies of marbled murrelets in marine habitats, during 1990

by G.W. Kaiser, T.E. Mahon and M.D. Fawcett. Edmonton : Canadian Wildlife Service, Pacific and Yukon Region, 1991. 52 p. : ill., maps. Bibliogr. (Technical report series ; no. 131) ISSN 0831-6481 ISBN 0-662-18770-9. MICROLOG 91-04419 1 fiche

Although marbled murrelets are one of the few birds that use coastal inlets in summer, little is known about their abundance or distribution. In 1989, several hundred murrelets were reported in Mussel Inlet. When tours were offered to the area in the spring of 1990, it was decided to survey the area. This report describes counts of marbled murrelets made during the May 15-30 cruise of the F/V Pacific Provider along various inlets and channels between Cape Caution and Prince Rupert. The survey developed an appropriate survey design for the birds; tested the relationship between observed densities of birds and simple habitat parameters such as sea surface temperature and salinity, channel width, and channel depth; and compared bird-use among a sample of inlets. Sampling was conducted at all times of the day.

Studies of some fundamental properties of coal and potential uses for coal

Edmonton : Alberta Energy, Research and Technology Branch, Alberta Office of Coal Research and Technology, 1991. 11 p. : ill. Bibliogr. ISBN 0-86499-837-6
MICROLOG 91-06775 1 fiche

The coal research program which has been carried out in Alberta since the early 1980s contained several projects that were primarily concerned with some fundamental properties of coal. Associated with these studies of fundamental properties was a second group of projects concerned with potential new markets for Alberta coals, or the re-defining of old markets which are still small at present but have some potential for growth. This document describes these projects, including the magnetic and electric properties, distributed chemical and physical properties, sulphur isotope studies, distribution of oxygen forms, geostatistics, electrolysis of coal slurries, and activated carbon from coal.

Studies on the extraction of gelatin from shark skin and skate skin

by C.L. Liu. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1991. 32 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5521) Originally published in Chinese, in Taiwan. ISSN 0704-3716
MICROLOG 91-04126 1 fiche

Gelatin is a derived protein that is produced by the action of an acid or alkali on collagen, the major constituent of the skin, muscles, sinews and bones of which animals are made. Taiwan has a comparatively high output of sharks and skates, which have a thick skin that contains abundant raw material for the production of gelatin. This study investigates the principle of treating these fishes' skin by an alkaline method that enables the collagen to be transformed into gelatin as a result of

denaturation that occurs on the application of an alkali. A simple, convenient heating procedure is employed under optimal conditions to extract the gelatin and thereby increase the added value of the fishery products.

The Study and predictive modelling of subsidence induced by potash mining : final report

Rio Algom Ltd. Potash Company of America Division. S.I. : The Division, 1990. iii, 112 p. : ill., fold. map. Bibliogr. On cover: Potash Mining Project, Mineral and Energy Technology, Mining Research Laboratories. CANMET contract: 89083-01-SQ.
MICROLOG 91-00377 2 fiche

Potash Co. of America mines potash and rock salt from an evaporite structure to the east of Sussex in southern New Brunswick. Mining of the potash is by a continuous cut-and-fill method while the rock salt is mined using a room-and-pillar method. The mining operation takes place under the Trans Canada Highway as well as the low-lying Kennebecasis River valley. To precisely determine ground surface movements caused by the mining activity, a preliminary finite element analysis was carried out and a high quality geodetic monitoring network was established. Surveys of various types (vertical, horizontal, satellite Global Positioning System baselines and aerial photogrammetry) were carried out over 2 years. This work will form the basis for a case history of surface subsidence induced by mining a complex evaporite body and will act as the first stage in the development of a predictive subsidence model.

A Study conducted by Universal Waxes to demonstrate the use of wax blends to prevent the entry of radon gas into buildings : phase III

by W.E. Nelson. Ottawa : Canada Mortgage and Housing Corporation, 1990. 51 p. : ill. MICROLOG 91-06294 1 fiche

Universal Waxes has developed a product which can seal basements from moisture and soil gas infiltration, clog porous surfaces such as pitted concrete, and block the entry of radon gas. Only one application is necessary and no maintenance is required. Phase I of the project measured radon gas over 24 hours in a number of residential units in the Ottawa area. In phase II, and prior to sealing, a number of wax blends were tested and applied by pouring in a liquid form, using a caulking gun and sealing with heat, and packing and troweling by hand and sealing with heat. Residences treated were at Meech Lake, Quebec, Gloucester, Ontario, and Kemptonville, Ontario.

A Study of degradable plastics

ORTECH International. Toronto : Environment Ontario, Waste Management Branch, 1990. 120 p. Bibliogr. Executive summary (16 p.) laid in. ISBN 0-7729-7415-2
MICROLOG 91-00337 2 fiche

The use of degradable plastics which may deteriorate in months rather than the many years taken for conventional plastics would seem to be an attractive option. Divergent views and legislative actions have, however, been proposed by various environmental groups and government agencies to either ban degradable plastics or to mandate degradability for certain plastic materials. This study determined if 'degradable plastics' currently in the market in Ontario actually degrade under Ontario conditions and in Ontario landfills. This report deals with Phase I of the investigation, reviewing and critiquing the literature on photodegradation and biodegradation of plastics and the adequacy of test procedures used to determine or forecast time and conditions to degrade in Ontario.

Study of founder-like changes in the hooves of beef cattle under intensive feeding conditions : final report

by P.R. Greenough. Regina : Saskatchewan Agriculture Development Fund, 1990. 20 p. : ill. Bibliogr. ISSN 0829-9455
MICROLOG 91-01880 1 fiche

Laminitis was first recognized and researched in horses, but has also been observed in dairy cattle. Recently, a sub-clinical form has been observed in young breeding bulls, causing them to be culled. This study describes and quantifies abnormalities that occur in the claws and corium of young, intensively-fed, beef cattle managed under two regimens and given rations that varied in energy and protein level. Five hundred Charolais cross steer calves, 8 months old, were purchased from commercial sources in October 1987. The steers were divided into two groups and fed 1 of 12 rations. Each ration was formulated from similar ingredients to 1 of 2 energy levels (73.5 or 78.5 per cent total digestible nutrients), and to 1 of 6 crude protein levels (11, 13, 15, 16, 17 and 19 percent). Ten animals of each group were slaughtered before the trial began and the remainder were slaughtered when backfat reached 7 mm. For all calves, digits of the left pelvic limbs were harvested and dissected.

Study of freshwater cage culture in Scotland

by T. Needham. Victoria : Ministry of Aquaculture and Fisheries, Aquaculture and Commercial Fisheries Branch, 1990. 18 p. Bibliogr. (Aquaculture industry development report ; no. 90-6) ISSN 1183-0352 ISBN 0-7726-1294-3
MICROLOG 91-03886 1 fiche

There is substantial interest in increasing the production capacity and reducing the production costs of smolts for salmon farming in BC. At present, the culture of smolts in netpens is practised only to a small extent because of limited access to sites and the apparent unsuitability of many coastal lakes. However, like netpen culture is used to a significant extent in Europe, and particularly in Scotland, to solve questions of rearing space and production cost. This report summarizes the Scottish experience with lake netpens to raise Atlantic salmon smolts and market-sized rainbow trout, including background information, rearing techniques, commercial rationale, conflicts, water quality, disease risks, and legislative controls.

Study of O2 reduction on silver-lead mixtures formed by atomic sputtering

by L.C. Schumacher. Toronto : Ontario Hydro, Research Division, 1990. iv, 18 p. : ill. Bibliogr. (Report ; no. 90-016-K)
MICROLOG 91-00815 1 fiche

Silver, along with the noble metals platinum and gold, remains one of the better O2 reduction electrocatalysts. Since silver is much cheaper than gold or platinum and more abundant than either, it is a serious alternative for a viable O2 reduction electrocatalyst in both energy conservation and generation applications. This report describes a series of studies of O2 electroreduction on mixed metal and mixed metal oxides containing silver as one of the components in the belief that some of these mixtures will exhibit a greater efficacy for O2 reduction than pure silver. Atomic sputter deposition, employed as the film fabrication method, will allow the fabrication of mixtures which are mixed on an atomic level and will also allow stable mixtures to be formed which are not achievable by more conventional growth techniques.

A Study of Ontario Hydro's contribution to ozone levels in Ontario, phase II : validation of a photochemical module

by X. Lin. Toronto : Ontario Hydro, Research Division, 1990. 27 p. : ill. Bibliogr. (Report ; no. 90-089-K)
MICROLOG 91-00799 1 fiche

Ontario Hydro is one of the emitters of NOx in this province and as such, is interested in establishing the contribution of its fossil-fuel fired power plants to ozone levels in Ontario. To this end, a study of ozone formation was initiated. Phase I of the study provided a review of the relevant literature, including some of the Eulerian models being used for regional ozone assessment. This report describes the work done under Phase II, which validated a comprehensive photochemical module to be used in a reactive plume model. To do this, a multi-layer box-modelling algorithm was designed based on vertical profile measurements, airborne measurements and the climatology of mixing height. The measurements made during an ozone episode at Dorset, a remote site in central Ontario, during the intensive Canadian Eulerian model evaluation field study in the summer of 1988 were used for the evaluation.

A Study of rheology and flow in porous media of water-in-heavy oil emulsions : final report

by R. Woo, C. Jackson and B.B. Maini. Calgary, Alta. : Petroleum Recovery Institute, 1990. iii, 51 p. : ill. Bibliogr. CANMET contract: 23440-9-9016-01-SQ
MICROLOG 91-02600 1 fiche

This report presents the results of an investigation into the effects of a chemical additive (Chevron Chaser CS1010) on rheology and flow in porous media of water-in-heavy oil emulsions. Heavy oil systems from a field under primary production (Lindbergh), and a field produced under fire flood (Wolfe Lake) were evaluated using Chevron Chaser CS1010 as the additive. The effect of the additive on emulsion rheology was evaluated by measuring the shear stress vs. shear rate curves with a Couette flow rheometer at 4 different temperatures with and without the chemical additive. The effect of the additive on drop size distribution was also measured. An apparatus for investigating the flow behaviour of water-in-oil emulsions was designed and fabricated and a microwave attenuation technique was developed to measure the in-situ saturation of free water at 4 different temperatures. The flow tests measured the pressure drop across a sand pack at different flow rates and changes in the free water saturation with time at a fixed point in the sand pack were monitored by the microwave technique. Changes in the drop size distribution and the volume fraction of emulsified water resulting from the flow through the sand pack were measured.

A Study of the merits and difficulties of coupling a softwood sawmill and an ethanol plant

by W.C. Edwards and R.G. Quan. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. ix, 120 p. : ill. Bibliogr. CANMET contract: 51SZ.23283-7-6026. ISBN 0-662-17663-4
MICROLOG 91-01218 2 fiche

Softwood sawmills produce more wood residues than are required for their own energy needs, with the excess incinerated or landfilled. This wood waste could be used as a feedstock for ethanol production for a motor gasoline additive or as an industrial grade product. This study investigates the potential for implementing an ethanol production plant at or near a B.C.

interior softwood sawmill. The study compared the merits and difficulties of producing ethanol from wood via acid hydrolysis and enzymatic hydrolysis; examined coupling the ethanol plant to an existing mill or operating it on a stand-alone basis; and examined the potential tie-ins of process energy and labour. The computer simulation program BIOSIM was used to calculate material and energy balances and estimate capital and operating costs for a number of cases. Simulations were run for both acid and enzymatic hydrolysis scenarios at 3 production capacities, using balsam fir as sawdust or planer shavings as feedstock. The results of the simulations were used to analyze the economics for each plant, including schedules of cash flow, revenues, expenses and taxes, and indicators of profitability.

Study of the production of barium chemicals from the Conwest barite deposit at Lake Ainslie, Cape Breton, Nova Scotia, phase II-B : laboratory investigations

for Conwest Exploration Company Limited ; by G.D. Lutwick. Dartmouth, N.S. : Nova Scotia Research Foundation Corporation, 1990. iv, 82 p. CANMET contract: 79005-01-SQ.
MICROLOG 91-00378 1 fiche

Concentrates of the Conwest barite deposit at Lake Ainslie were used as feedstocks to evaluate their suitability as a source of barium for barium chemicals production. There were concerns that the presence of fluorite in the concentrates would impair the reduction process and produce environmental pollutants such as hydrofluoric acid and fluorocarbons, and that if hydrofluoric acid was produced it would damage the conventional kiln refractory lining. After it was demonstrated that most of the barium could be recovered from the barite via the black ash process, a second phase was initiated to evaluate the role of impurities on purity of barium carbonate produced by this process. Phase IIB is concerned with production of commercial grade barium carbonate from black ash prepared from chemical grade French, flotation beneficiated and table beneficiated Conwest barite. Barium carbonate was prepared from each sample of black ash and analyzed to determine the degree of contamination by extraneous components in the black ash.

A Study of the rainscreen concept applied to cladding systems on wood frame walls

Morrison Hershfield Limited. Ottawa : Canada

Mortgage and Housing Corporation, Project Implementation Division, 1990. 118 p. : ill. MICROLOG 91-06786 2 fiche

The rainscreen wall system consists of an exterior cladding, drained and vented to the outside, a cavity behind the cladding, an inner plane called the air barrier system, and a set of compartment seals limiting the cavity to a modest size. This study examines the performance characteristics of a rainscreen cladding on a wood frame wall. A laboratory investigation was conducted of brick veneer, stucco, and vinyl exterior cladding systems in which sample walls were subjected to simulated wind-driven rain in an environmental chamber and the amount of water passing through the veneers was determined gravimetrically. The second part of the study investigated the compartmentalization requirement of the cavities behind the cladding and was done through the use of a full-scale construction model installed in a wind tunnel. The third part developed a simulation model to predict the pressure equalization performance of various types of exterior cladding and wall systems. Parameters included the vent areas required, air leakage areas, volume of the cavity, and stiffness or rigidity of the air barrier and the cladding elements.

Study of the savings achieved by higher efficiency gas furnaces and boilers : report

commissioned by Manitoba Energy and Mines, and Energy, Mines and Resources Canada. Winnipeg : Unies Ltd., 1988. vii, 88 p. : ill. Bibliogr.
MICROLOG 91-02302 1 fiche

This report comprises the results of an investigation of the field performance of replacement standard and higher-efficiency residential gas furnaces and boilers in Manitoba, including both an examination of changes in energy consumption and a survey of homeowner experiences with the installation and the operation of the new units. A survey was conducted of 983 homes which had new higher-efficiency furnaces and boilers installed between September 1985 and August 1986, and 294 homes studied as part of a survey of standard furnace and boiler replacements. The first survey provided 326 replies and the second provided 89 replies which were used in the current analysis. A wide distribution of older and newer houses and of lifestyles were represented.

A Study of vitamin A toxicosis in growing swine : final report

by C.E. Doige. Regina : Saskatchewan Agriculture Development Fund, 1990. 25 p. ISSN 0829-9455
MICROLOG 91-02631 1 fiche

This study investigated a syndrome of stunted growth, long bone deformity and paralysis in Saskatchewan pigs and calves thought to be

associated with the premature closure of growth plates, especially in long bones and vertebrae. The objectives of this research were to experimentally reproduce vitamin A toxicosis, to study the disease that developed, and to compare experimental findings to those seen in certain naturally occurring skeletal diseases.

The Study on environmental and safety protection equipment

by S. Yamvongsri. Bangkok, Thailand : Canadian Embassy, Commercial Division, 1990. 211 p.
MICROLOG 91-02282 3 fiche

Thailand is now facing major environmental problems. The Thai government has begun to support private companies' efforts to cooperate with the government to conserve the environment. This study identifies opportunities that exist or will exist in Thailand for Canadian investors in environmental and safety protection equipment. The study covers the general environmental situation; opportunities available in the environmental market; the personal safety equipment market and opportunities; useful organizations and related agencies; government regulations; government projects; and distributors and consultant firms. Data was obtained from interviews with manufacturers, distributors and importers, and a number of government and private agencies. A description of the Bangkok Metropolis waste project for 1992-96 and the Bangkok sewage system project is also given.

Study on the use of the hydrogenase Test to detect H2S production in oil storage and processing facilities : final report

Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1990. 8 p. Contractor: Microbios Ltd. CANMET contract: 99129-01-SQ.
MICROLOG 91-00745 1 fiche

Many oilfields that initially have low H2S levels in their oil, gas, and water phases, gradually develop higher levels of this dangerous and corrosive gas. After initiating secondary recovery operations, and as production facilities become contaminated with H2S-producing microorganisms, so-called 'sour' production can result, forcing the replacement of steel pipes and lines with more expensive H2S-resistant steel, or flushing with a biocide. The detection of H2S-producing bacteria is conventionally accomplished by complicated anaerobic culturing of planktonic bacteria, requiring 2-3 weeks to confirm the presence or absence of the bacteria. This report describes the development of a sampling device (Robbins device) that facilitates the collection of the pipe wall associated bacterial population and an enzyme based (Hydrogenase) test that detects H2S consuming (corrosive) bacterial in 2-4 hours.

A Study on the utilization of pitches in the rubber industry : final report

S.R.I. Technical Barriers Inc., Mississauga, Ont. : The Corporation, 1990. 78 p.
CANMET contract: 99021-01-SQ
MICROLOG 91-01562 1 fiche

This study on the utilization of pitches in the rubber industry was prompted by the desire to develop an economically attractive outlet for the residua produced in the hydrocracking process, whose economic viability would be considerably enhanced if the price obtained for the residua increased 3 or 4 times. The product to be made from the residua, referred to here as CANMET bottoms, was mineral rubber asphalt used in the rubber industry. The market study determined the size of the current market, pricing, import duties, packaging, product quality, product specifications, market trends, customer preferences, customer differences and attitudes.

Subsidies and the trade laws : the Canada-U.S. dimension

by J.-F. Bence and M.G. Smith. Halifax : Institute for Research on Public Policy, 1989. vii, 55 p. Bibliogr. (International economic issues)
MICROLOG 91-06221 1 fiche

In the debate on free trade with the United States, many Canadians expressed concern that social programs such as Canada's public health and hospital insurance systems might be attacked as an 'unfair' subsidy. On the U.S. side, some interest groups and congressional leaders expressed concern about perceived massive Canadian subsidies that they argued were untouched by the Free Trade Agreement. The purpose of this study is to clarify the issues and to initiate the process of developing common perspectives which may facilitate the development of mutually agreed trade rules.

Sulphate resistance of cement partially replaced by silica fume

by R.D. Hooton. Toronto : Ontario Hydro, Research Division, 1990. 12 p. (Report ; no. 90-126-K) MICROLOG 91-00797 1 fiche

Silica fume is a by-product of the silicon metal and alloy industry, consisting mainly of amorphous silica particles with a very high surface area approximately 100 times smaller than Portland cement. This report evaluates its use as a supplementary cementing material by Ontario Hydro. Seven mortar mixes were cast, with Type 10 normal Portland cement replaced by 0, 10 and 20 per cent by mass with silica fume, while maintaining the ASTM C109 standard w/cm of 0.485 (using superplasticizer in the silica fume mixes). The Type 50 sulphate resistance Portland cement was cast at w/cm = 0.465 using ASTM C305 to determine the w/cm required to obtain the proper flow range. This cement was also partially replaced 10 per cent and 20 percent by mass with silica fume using the superplasticizer to maintain the w/cm at 0.465. Strength development data and expansion data were then measured. ON PR PS SC

Summary of public comments : provincial
parks and wilderness for the 90s. ISBN
0-7726-1415-6

MICROLOG 91-06901 3 fiche

In December 1990, BC Parks and the BC Forest Service amalgamated their respective protected area planning programs into a combined planning initiative called Parks and Wilderness for the 90s. The overall goals for this process were to begin a long-term process of comprehensive and systematic planning for protected areas; to develop an inventory of potential areas of interest for park or wilderness which may be studied for these purposes in the future; and to integrate the goals of a system of provincial parks with those of a system of provincial forest wilderness areas. In February 1991, a series of open houses and meetings were sponsored across the province to solicit public advice on their planning process. This report summarizes from the record those contributions most directly related to the parks or wilderness programs. In addition to the general policy directions proposed, comments relating to specific areas were also summarized.

Sun, wind, and pedestrian comfort : a study of Toronto's central area

by P. Bosselmann...et al. Toronto : Toronto Planning and Development Dept., 1990. v, 186 p. : ill., maps. Bibliogr. On cover: Cityplan '91, 25.
MICROLOG 91-05068 2 fiche

Analysis of how future development in Toronto's central area will affect street-level sun, wind, and thermal comfort conditions, related to implementation measures under consideration for a new plan for Toronto's central area. Research examines the shadows produced by downtown buildings; considers the effects of buildings on wind conditions at street-level; evaluates the combined effects of sun and wind conditions on pedestrian comfort on an area wide basis; and illustrates the effect of future development on the visual qualities of central area streets. The study compares existing development conditions with development permissible under current planning controls and under the standards recommended in this report. Field measurements and laboratory experiments were conducted in an area defined by the CP Railroad tracks to the north, Lake Ontario to the south, Spadina Avenue to the west, and Sherbourne Street to the east.

Supplementary soil survey in the vicinity of the Highland Creek Sewage Treatment Plant Incinerator, Scarborough, 1989

by D.L. McLaughlin. Toronto : Ministry of the Environment, Air Resources Branch, 1990. 38 p. : ill. ISBN 0-7729-6903-5. MICROLOG 91-01191 1 fiche

In November 1987, a survey was conducted in the vicinity of the Highland Creek sewage treatment plant incinerator to determine if stack emissions from this source had contaminated soil in the surrounding residential area with heavy metals, dioxins (PCDDs), furans (PCDFs) or PCBs. The report concluded that emissions from the plant have had no measurable impact on the soil of residential properties. However, PCDDs and PCDFs, including some tetra-chlorinated dioxins, were detected in a few soil samples. The report was critically reviewed by an Ad Hoc Committee of local property owners, who disagreed with its conclusions. The soil was then re-sampled from the 3 sites where tetra-chlorinated dioxins were detected and additional soil sampling was conducted for inorganic contaminants. This report summarizes the results of the supplementary soil survey.

A Surface panel method for the calculation of added mass matrices for finite element models

by T.A. Vernon, B. Bara and D. Hally. Dartmouth, N.S. : National Defence, Research and Development Branch, Defence Research Establishment Atlantic, 1988. v, 60 p. : ill. Bibliogr. (DREA technical memorandum ; 88-203)
MICROLOG 91-00150 1 fiche

This report presents a method of generating the added fluid mass matrix for use in dynamic analyses of submerged structures, using a distribution of panel singularities in the form of sources or dipoles on the fluid-structure interface to represent the velocity potential in the fluid surrounding the structure. The fluid added mass matrix is calculated by relating the pressure field in the fluid to the structure surface accelerations via the Euler equation and the assumptions of potential flow theory. The results of a variety of investigations of computational performance, convergence and dynamic response involving floating cylinders, ship hulls, and propeller blades are included.

Survey of diffusion of technology in the mining industry

Ottawa : Industry, Science and Technology Canada, Information Technologies Industry Branch ; Energy, Mines and Resources Canada, CANMET ; Communications Canada ; Statistics Canada, Small Business and Special Surveys Division, 1990. xiii, 86 p. : ill. CSI 21149.221
MICROLOG 91-03789 2 fiche

This is the first national survey to measure the degree of utilization of computer based technologies for all mining operations in Canada. Twenty-eight advanced technologies and applications in automated material handling, communications and networks, control, and automated processing systems were surveyed in January, 1990. Respondents indicated both the use and planned use of the selected technologies, the level of satisfaction in their use and an evaluation of the impact of the introduction of these technologies on output, on quality and on costs. The questionnaire was mailed to all 324 known mines in Canada. This document presents the highlights of the survey, then detailed tables weighted by mines and by employees. Results were tabulated by industry, by province, by mining method, by ownership, by size, and by age of operation.

MICROLOG 91-05883 1 fiche

A national survey of professional foresters was commissioned in September 1990 to identify their views and perspectives on a wide range of forest management issues. This summary gives the key results, covering current forest conditions, forest problems, current practices

and changes in those practices, wood supply, forest harvesting and renewal, forest preservation and old growth forests, clearcutting, pesticide use, provincial and federal government performance, forest resource development agreements, forest industry performance, and the public's role in forest management.

Survey of school food programs : summary report

by M.M. Breau. Fredericton : Dept. of Education, 1991. 26 p. French ed. (*Sondage sur les programmes...*) on the same fiche.
MICROLOG 91-05888 1 fiche

The document provides a summary report on a survey of school food programs in New Brunswick. The objectives of the survey were to study the effect of existing guidelines and standards for school food programs in schools, and how they are being implemented. The results of the survey highlight provincial guidelines, district school policies, management of school food programs, responsibility and decision-making regarding food, providing for children in need, food safety and sanitation practices, providing a pleasant environment for eating, evaluating student satisfaction, recycling activities, and buying 'NB First' products.

Survey of the medical impact on environmentally hypersensitive people of a change in habitat

by S.R. Barron. Ottawa : Canada Mortgage and Housing Corporation, Research Division, 1990. vii, 82 p. Bibliogr.
MICROLOG 91-06784 2 fiche

In the winter of 1989-90, CMHC completed a Canada-wide survey identifying 92 people with environmental health problems who have modified their homes. The survey focused on building and renovation techniques used to reduce exposure to indoor inhalants and chemicals and documented a variety of approaches representing a partial picture of the nature and extent of clean air housing in Canada. The original report focused on construction techniques and specifications, with only a small part addressing the health problems. This report summarizes the medical histories of a select sub-group of respondents (29 people) to the original survey, and also includes a review of the characteristics of environmental hypersensitivity disorder.

A Survey of trumpeter swans in Alberta, Saskatchewan and Northwest Territories

by L.J. Shandruk. Edmonton : Canadian Wildlife Service, Western and Northern Region, 1991. iv, 16 p. : ill. Bibliogr. (Technical report series ; no. 119) ISSN 0831-6481 ISBN 0-662-18567-6
MICROLOG 91-03743 1 fiche

For the last 90 years, trumpeter swan breeding in Canada has made a dramatic comeback and it is now classified as a vulnerable migratory bird. Trumpeter swan flock surveys were conducted in Alberta, southwestern Saskatchewan, and the southern Mackenzie District of the NWT from July-September 5, 1990 to determine distribution and location of breeding habitat; record all wetlands used by the swans, and determine total population size of flocks surveyed. Aerial surveys were also flown in each province.

Survey results of the B.C. Manufacturers' Needs Survey

by L. Au. Victoria : Science Council of British Columbia, 1990. v, 54 p. : ill. (Spark report) CSI 38169.203
MICROLOG 91-00493 1 fiche

As the B.C. economy shifts from being primarily resource based to a service and secondary manufacturing economy, more and more manufacturing companies will play an active role in deciding the province's economic future. To gain a better understanding of the changing needs and expectations of this growing industry, the survey was created to identify key strengths and weaknesses in the manufacturing industry in order to zero in on areas which require immediate attention; to obtain a comprehensive and up-to-date needs assessment of B.C. manufacturing companies; and to help develop an aggressive support strategy which will address these needs. Approximately 3,000 manufacturing companies received the survey and the results represent the views of 12 percent of this audience. This document presents the survey results.

Survival and growth of jack pine provenances in Manitoba

Edmonton : Forestry Canada, Northwest Region, Northern Forestry Centre, 1990. 6 p. Bibliogr. (Forest management note ; no. 50) ISSN 0714-1181 ISBN 0-662-18124-7
MICROLOG 91-03946 1 fiche

A range-wide provenance test of jack pine was planted in southeastern Manitoba in 1972 as part of a cooperative study to assess the total variability of jack pine in relation to climate and site, and to provide information to delineate seed zones. The virtual destruction of the Manitoba plantation by fire after the 10-year measurement seriously curtailed attainment of the study's objectives in this region. This note presents the results to the 10th year, using the few trees which survived to the 15th year, to assess the value of provenance introduction to the area.

Surviving the nuclear age : a bibliography on nuclear weapons, arms control and disarmament, 1987 update

compiled and edited by Ron Purver and Jutta Paczulla. Ottawa : Canadian Institute for International Peace and Security, 1990. 279 p. Table of contents of 'Core bibliography, 1945-1983' (32 p.) laid in. ISSN 1180-2278 ISBN 0-662-17700-2
MICROLOG 91-03243 4 fiche

This bibliography covers the period from 1945 to 1983, with an emphasis on 1976 to 1983, and includes references to books and periodicals only. It attempts to be comprehensive in all aspects of nuclear weapons and all aspects of arms control and disarmament. A list of subject headings is provided under which the citations are arranged in the subject section. Author and key word indexes are also provided.

Sustainable development and economic instruments, part one : market incentives, resource accounting

Victoria : British Columbia Round Table on the Environment and the Economy, 1991. 16 p.

Bibliogr. ISBN 0-7726-7274-1
MICROLOG 91-05117 1 fiche

This paper is intended to outline the various economic instruments that might be used in moving toward sustainability. It suggests that there are three types of economic instruments that can promote sustainable development: market incentives, resource accounting, and resource valuation.

Sustainable development and energy

Victoria : British Columbia Round Table on Environment and Economy, 1990. 24 p. : ill. Bibliogr. ISBN 0-7726-1237-4
MICROLOG 91-02231 1 fiche

Energy is one of the foundations of B.C.'s economy and its development and use have significant impacts on the environment. This contrast of economic and environmental values is the challenge of sustainable development. This paper identifies four major issues: energy demand, energy supply, energy pricing, and global warming. It provides a brief discussion of each of these topics and identifies potential options for dealing with them.

Sustainable development and environmental assessment : perspectives on planning for a common future

by J. Jacobs and B. Sadler. Hull, Que. : Canadian Environmental Assessment Research Council, 1990. vii, 182 p. Bibliogr.
MICROLOG 91-00781 2 fiche

The objectives of this study are twofold: to promote discussion of the role and contribution that environmental assessment and related processes can make to planning and implementing sustainable development; and to identify productive directions for applied research that exemplifies and improves this relationship, including demonstration projects that 'use-test' new concepts and methods.

Sustainable development in the Caribbean region : a report on the Public Policy Implications of the Sustainable Development in the Caribbean Region Conference

compiled and edited by John Cox and C. (Sid) Embree. Halifax : Institute for Research on Public Policy, 1990. xxviii, 248 p. ISBN 0-88645-117-5
MICROLOG 91-05042 3 fiche

This document contains the conference papers which aimed to design appropriate incentives or disincentives to encourage sustainable development for three key areas: policy-enabling measures, price change policies, and policies directed at the needs of the resource user in Caribbean countries. Papers also cover ideas which would enable these countries to cope with, and respond to, international pressures which are limiting their capacity to design, implement, and regulate sustainable development. These pressures affect policies which concern international agencies and institutions regarding such issues as terms of trade, debt financing, and policing the unsustainable practices of multinational corporations, and other countries.

Sustainable development initiatives in Canada : activities in progress

Ottawa : Environment Canada, Sustainable Development/State of the Environment Reporting Branch, 1990. : iv, 29 p. French ed. (*Les Initiatives de...*) on the same fiche. ISBN 0-662-18105-0
MICROLOG 91-02021 1 fiche

The primary purpose of this document is to briefly describe the federal government's sustainable development initiatives currently

underway. It also highlights initiatives undertaken by provincial, municipal, and private agencies. The report focuses on the development of the Green Plan for Canada, the progress of the Round Tables, the sustainable development actions of Environment Canada and of the federal government as a whole. Finally, the report documents selected sustainable development actions of particular significance from all sectors.

Sustainable land and water use

Victoria : British Columbia Round Table on the Environment and the Economy, 1991. 60 p. Bibliogr. ISBN 0-7726-1328-1 MICROLOG 91-04206 1 fiche

In 1990, The BC Roundtable on the Environment and the Economy was established to help fashion a vision of a sustainable future. This theme paper is one of a number of discussion papers to help stimulate public thought and discussion about setting goals for sustainable development. It covers land and water use in the province, providing background information on the current state of the environment and the economy, highlighting key components of a sustainable development strategy, and addressing some of the difficult choices that must be faced along the way. The report summarizes some of the key issues of land and water allocation and management practices, and describes the process of change. Appendices describe the types of protected lands, management terms, and gives an example of how a sustainable development strategy would work.

Swan Hills Colloquium : discussion paper

by L. Benson and F.W. Dykeman. Edmonton : Alberta Municipal Affairs, Municipal Administrative Services Division, 1988. 22 p. MICROLOG 91-05877 1 fiche

This discussion paper reports on the issues identified by interviewing over 40 people from the oil industry, and local and provincial agencies. The most important of these issues are identified as the viability and stability of the community; municipal taxes; and the image of

the town. The paper gives a short history of the town and its composition, then identifies the reasons for the Colloquium to be held to identify the problems and issues in the town and the need for public participation in developing an action plan to address these issues.
